**Reconstructing Psychological Practice** Ian G. McPherson, Andrew Sutton, 1981 Reconstructing Psychological Practice Ian G. McPherson, Andrew Sutton, 1981 **Practicing Feminisms, Reconstructing Psychology** Jill G Morawski, 2025-10-01 Practicing Feminisms Reconstructing Psychology is a valuable survey of developments to date in feminist psychology and a provocative assessment of its future possibilities For many psychologists engaged with the questions raised by modern feminist the reconciliation of scientific methods and feminist commitments has been a complicated and sometimes perplexing project In her book Jill Morawski attempts to move beyond the apparent impasses toward a constructive feminist psychology The book assesses the substantive advances feminist psychology has made and proposes ways in which those transformations can lead to new research and methodologies These transformative interventions Morawski argues have often consisted of local and partial alterations to established methods rather than a programmatic metatheory or a formulaic methodology She reviews a variety of exemplary studies that demonstrate how such intermittent practices taken together constitute a groundword for radically new forms of psychological inquiry The study describes feminist challenges to long held conceptions of objectivity subjectivity and validity and examines emergent problems and ongoing debates The feminist innovations discussed reveal the impossibility of a pure and abstract objective stance and demonstrate the feasibility of situated and critical objective practices Morawski also shows how experimental investigative strategies are generating new perspectives on subjectivity which incorporate agency as well as dependence reflection as well as reactivity Feminist inquiry is modifying the procedures through which knowledge is warranted with different evaluations of validation processes Despite the transformations in these areas the pursuit of a feminist psychology remains in transition in a liminal space Among the emerging issues Morawski explores are vicissitudes of reflexivity the investigator's self and the cultural bases of psychological knowledge **Reconstructing the Psychological Subject** Betty M Bayer, John Shotter, 1998-01-12 This major book offers a comprehensive overview of key debates on subjectivity and the subject in psychological theory and practice In addition to social construction's long engagement with social relations this volume addresses questions of the body technology intersubjectivity writing and investigative practices The internationally renowned contributors explore the tensions and opposing viewpoints raised by these issues and show how analyzing the psychological subject interrelates with reforming the practices of psychology Drawing on perspectives that include feminism dialogics poststructuralism hermeneutics Lacanian psychoanalysis and cultural or social studies of science readers are guided through pivotal **A Critical Reconstruction of Evidence-based Practice in Psychology** Henrik Berg, 2024-10-30 Evidence based practice in psychology is the dominant regulatory principle in clinical psychology defining psychological knowledge and its application This book provides a critical analysis and a reconstruction of the policy statement focusing on epistemology and ethics The book shows the ideological and historical background for the

development of evidence based practice in psychology It covers the main conceptual and empirical arguments leading to this transition including philosophy and evidence based medicine The book goes on to show some of the defects of evidence based practice in psychology it misconstrues psychological knowledge reduces the number of ethical resources available to regulate psychological practices does not fulfil its ambitions of being a tripartite concept and undertheorises the issue of integration The closing chapters provide a constructive critique preserving the valuable aspects of evidence based practice in psychology while developing it to make it function adequately In that sense the book aims to change the way psychological knowledge is understood and used in practice This text will be engaging and thought provoking for anyone using psychological knowledge with patients or clients It will provide analytic resources to understand psychology better and facilitate the application of psychological knowledge in various settings The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

*Training Behaviour Therapists (Psychology Revivals)* Derek Milne, 2015-03-27 Originally published in 1986 one of the major developments in behavioural psychotherapy and mental health in the previous decade had been the growing involvement of non psychologists in behaviour therapy This was a result of the fact that there were too few psychologists to cope with problem behaviour and that other professionals or carers began to appreciate more clearly their potential as agents of behaviour change Foremost among these mediators of therapy were parents nurses particularly psychiatric nurses and teachers especially remedial teachers Their involvement had greatly increased the efficiency of behaviour therapy at the time and opened up a new era in applied psychology It also entailed the development of new training formats evaluation procedures and implementation strategies The main aim of this book was to provide a summary of the research relevant to these issues and to offer practical guidelines to those who were interested in training or being trained as behaviour therapists For this reason there are chapters by researchers who have been involved in training parents nurses and teachers These chapters provide a detailed account of training in a form that was rarely available in published form at the time and even today should be of great assistance to readers

Psychological Therapies for the Elderly Ian Hanley, Mary Gilhooly, 2018-09-21 Prior to publication it had only recently been appreciated that psychology had a great deal to offer in therapeutic terms to a wide range of patients and was not merely concerned with assessing and identifying problems This is particularly so with the elderly where physical and mental problems and multiple pathology are compounded and where psychological aspects of the quality of life are so important The focus of this book originally published in 1986 is on therapeutic approaches and the effective implementation of services While the book is aimed particularly at clinical psychologists it will also be of great interest to medical nursing or occupational therapy staff working with elderly people
