Reconstructing Space:

Reconstructing Biblical Dead Sea Scrolls Edward Herbert, 2018-11-26 The first part of the book develops a battery of scientifically based tools to aid the reconstruction of biblical Dead Sea Scrolls which when applied together substantially improve the quality of reconstruction attainable The focus then moves to the important non masoretic but fragmentary biblical scroll 4QSama for which sixty two new fragment identifications and an analysis of the character of the scroll are presented Based upon this a detailed reconstruction of the 4QSama fragments of 2 Samuel is undertaken revealing 55% more deviations from the Masoretic text than had previously been identified The effectiveness of the new method is thus demonstrated Data concerning the support of key Hebrew and Greek witnesses provides a valuable foundation for the study of the history and development of the biblical text Hipsterism Tara Semple, 2022-10-30 This Open Access book utilises Hipsterism to demonstrate modes of identity collectivity conceptions and a whole spectrum of activities with varying degrees of commitment in contemporary society Analysed through the lens of Modernity Consumerism and the New Spirit of Capitalism it draws on qualitative research from two subsequent field stays in Berlin and is complemented by self reflexion within the field Young adults and their conceptions within modernity capitalism and consumerism constitute a fundamental building block to understanding society Little sociological work has been done in the field of Hipsterism although it can function as a paradigm for western affluent societies With tools such as conscious consumption conversations and ethical or creative work within a politically intended lifestyle Hipsterism emerges as an attempt to navigate between individualism and collectivity Resulting from these circumstances are a variety of forms of action while searching for better ways to contribute and engage at the same time Attempts to dissolve milieus and try to construct spaces where different cultures classes and ethnicities are welcome might fail in spatial practice but the practices in sum still leave a trace in consumer culture All these activities hint at the potential of transformative and negotiating power that Hipsterism could have This is an open access Contested Mediterranean Spaces Maria Kousis, Tom Selwyn, David Clark, 2011-06-01 book Cases on Practical Applications for Remote, Hybrid, and Hyflex Teaching Shinas, Valerie Harlow, Ly, Chu N., Ozden, Sule Yilmaz, 2022-03-18 The COVID 19 pandemic created a ripple effect that impacted education worldwide felt from Pre K through higher education In response to the pandemic teachers parents and students shifted to teaching and learning online to adjust to the affordances found in digital spaces However challenges quickly arose and it was found that research was sorely needed on adapting learning to these digital spaces including addressing issues with equitable access to technological tools meeting the social emotional needs of all learners and developing appropriate teaching strategies for young children in online spaces Situating our understanding of emerging research in this area of remote teaching and learning in Pre K through higher education is critical as we look to build upon evidence based practices to better support 21st century educators and learners Cases on Practical Applications for Remote Hybrid and Hyflex Teaching presents emerging case studies on the impacts of the COVID

19 pandemic and reports and responds to early evidence of these impacts and the predicted future impacts for students families teachers policymakers and higher education Building on knowledge of how teaching and learning in digital spaces work the literature presented in this book captures preliminary findings and emerging research examining how educators leverage teaching and learning across platforms and modalities and shares stories on how educators families and communities responded to the challenges of teaching and learning online to ensure all students were engaged and fully supported while learning remotely and as they transitioned back to the classroom Covering topics such as pedagogies remote teaching and parental responses it is ideal for teachers academicians preservice teachers professors researchers community education providers and students The Lesbian South Jaime Harker, 2018-09-25 In this book Jaime Harker uncovers a largely forgotten literary renaissance in southern letters Anchored by a constellation of southern women the Women in Print movement grew from the queer union of women's liberation civil rights activism gay liberation and print culture Broadly influential from the 1970s through the 1990s the Women in Print movement created a network of writers publishers bookstores and readers that fostered a remarkable array of literature With the freedom that the Women in Print movement inspired southern lesbian feminists remade southernness as a site of intersectional radicalism transgressive sexuality and liberatory space Including in her study well known authors like Dorothy Allison and Alice Walker as well as overlooked writers publishers and editors Harker reconfigures the southern literary canon and the feminist canon challenging histories of feminism and queer studies to include the south in a formative role Technically Together Michele A. Willson, 2006 Technically Together takes the reader on a thoughtful tour of the key writings on community and technology and the current debates that surround them to provide a clear understanding of the challenges new technologies present for theories of social interaction Spatializing Law Franz von Benda-Beckmann, Keebet von Benda-Beckmann, 2016-04-01 Spatializing Law An Anthropological Geography of Law in Society focuses on law and its location exploring how spaces are constructed on the terrestrial and marine surface of the earth with legal means in a rich variety of socio political legal and ecological settings The contributors explore the interrelations between social spaces and physical space highlighting the ways in which legal rules may localise people s rights and obligations in social space that may be mapped onto physical space This volume also demonstrates how different notions of space and place become resources that can be mobilised in social political and economic interaction paying specific attention to the contradictory ways in which space may be configured and involved in social interaction under conditions of plural legal orders Spatializing Law makes a significant contribution to the anthropological geography of law and will be useful to scholars across a broad array of disciplines The Social Life of **Memory** Norman Saadi Nikro, Sonja Hegasy, 2017-11-19 This edited volume addresses memory practices among youth families cultural workers activists and engaged citizens in Lebanon and Morocco In making a claim for the social life of memory the introduction discusses a particular research field of memory studies elaborating an approach to memory in terms of social production and engagement The Arab Spring is evoked to draw attention to new rifts within and between history and remembrance in the regions of North Africa and the Middle East As authoritarian forms of governance are challenged official panoramic narratives are confronted with a multiplicity of memories of violent pasts The eight chapters trace personal and public inventories of violence trauma and testimony addressing memory in cinema in newspapers and periodicals as an experience of public environments through transnational and diasporic mediums and amongst younger generations A War of Colors Nadine A. Sinno, 2024-04-02 Demonstrates the role of Beirut s postwar graffiti and street art in transforming the cityscape and animating resistance Over the last two decades in Beirut graffiti makers have engaged in a fierce war of colors seeking to disrupt and transform the city s physical and social spaces In A War of Colors Nadine Sinno examines how graffiti and street art have been used in postwar Beirut to comment on the rapidly changing social dynamics of the country and region Analyzing how graffiti makers can reclaim and transform cityscapes that were damaged or monopolized by militias during the war Sinno explores graffiti s other roles including forging civic engagement commemorating cultural icons protesting political corruption and environmental violence and animating resistance In addition she argues that graffiti making can offer voices to those who are often marginalized especially women and LGBTQ people Copiously illustrated with images of graffiti and street art A War of Colors is a visually captivating and thought provoking journey through Beirut where local and global discourses intersect on both scarred and polished walls in the city

Turbulence and Self-Organization Mikhail Ya Marov, Aleksander V. Kolesnichenko, 2013-01-16 The book deals with the development of continual models of turbulent natural media Such models serve as a ground for the statement and numerical evaluation of the key problems of the structure and evolution of the numerous astrophysical and geophysical objects The processes of ordering self organization in an originally chaotic turbulent medium are addressed and treated in detail with the use of irreversible thermodynamics and stochastic dynamics approaches which underlie the respective models Different examples of ordering set up in the natural environment and outer space are brought and thoroughly discussed the main focus being given to the protoplanetary discs formation and evolution The Palgrave Handbook of Literature and the City Jeremy Tambling, 2017-02-17 This book is about the impact of literature upon cities world wide and cities upon literature It examines why the city matters so much to contemporary critical theory and why it has inspired so many forms of writing which have attempted to deal with its challenges to think about it and to represent it Gathering together 40 contributors who look at different modes of writing and film making in throughout the world this handbook asks how the modern city has engendered so much theoretical consideration and looks at cities and their literature from China to Peru from New York to Paris from London to Kinshasa It looks at some of the ways in which modern cities whether capitals shanty towns industrial or rust belt The Political Life of Urban Streetscapes Reuben have forced themselves on people s ways of thinking and writing Rose-Redwood, Derek Alderman, Maoz Azaryahu, 2017-07-06 Street scapes are part of the taken for granted spaces of everyday

urban life yet they are also contested arenas in which struggles over identity memory and place shape the social production of urban space This book examines the role that street naming has played in the political life of urban streetscapes in both historical and contemporary cities The renaming of streets and remaking of urban commemorative landscapes have long been key strategies that different political regimes have employed to legitimize spatial assertions of sovereign authority ideological hegemony and symbolic power Over the past few decades a rich body of critical scholarship has explored the politics of urban toponymy and the present collection brings together the works of geographers anthropologists historians linguists planners and political scientists to examine the power of street naming as an urban place making practice Covering a wide range of case studies from cities in Europe North America Sub Saharan Africa and Asia the contributions to this volume illustrate how the naming of streets has been instrumental to the reshaping of urban spatial imaginaries and the cultural politics of place **Foreign Policy in Global Information Space** A. Chong, 2007-04-30 This book examines how foreign policy can adapt to the challenge of globalization Two central guestions are posed how can foreign policy defend or project statist political communities using soft power within a global information space Does soft power affect foreign policy by undermining statist community within the same global information space **The Destruction of Memory** Robert Bevan, 2016-02-15 Crumbled shells of mosques in Iraq the fall of the World Trade Center towers on September 11 when architectural totems such as these are destroyed by conflicts and the ravages of war more than mere buildings are at stake The Destruction of Memory now available in this accessible pocket edition reveals the extent to which a nation weds itself to its landscape Robert Bevan argues that such destruction not only shatters a nation s culture and morale but is also a deliberate act of eradicating a culture s memory and ultimately its existence Bevan combs through world history to highlight a range of wars and conflicts in which the destruction of architecture was pivotal From Cortez's razing of Aztec cities to the carpet bombings of Dresden and Tokyo in World War II to the war in the former Yugoslavia The Destruction of Memory exposes the cultural war that rages behind architectural annihilation revealing that in this subliminal assault lies the complex aim of exterminating a people He provocatively argues for the fatally intertwined experience of genocide and cultural genocide ultimately proposing the elevation of cultural genocide from collateral damage to a crime punishable by Data Analysis Techniques for High-Energy Physics Rudolf Frühwirth, M. Regler, 2000-08-17 Now international law thoroughly revised and up dated this book describes techniques for handling and analysing data obtained from high energy and nuclear physics experiments The observation of particle interactions involves the analysis of large and complex data samples Beginning with a chapter on real time data triggering and filtering the book describes methods of selecting the relevant events from a sometimes huge background The use of pattern recognition techniques to group the huge number of measurements into physically meaningful objects like particle tracks or showers is then examined and the track and vertex fitting methods necessary to extract the maximum amount of information from the available measurements are explained The final chapter describes tools and methods which are useful to the experimenter in the physical interpretation and in the presentation of the results This indispensable guide will appeal to graduate students researchers and computer and electronic engineers involved with experimental physics Models and Applications of Chaos Theory in Modern Sciences Elhadj Zeraoulia, 2011-09-07 This book presents a select group of papers that provide a comprehensive view of the models and applications of chaos theory in medicine biology ecology economy electronics mechanical and the human sciences Covering both the experimental and theoretical aspects of the subject it examines a range of current topics of interest It The SAGE Handbook of Economic Geography Andrew Leyshon, Roger Lee, Linda McDowell, 2011-03-04 What difference does it make to think about the economy in geographical terms The SAGE Handbook of Economic Geography illustrates the significance of thinking the economy and the economic geographically It identifies significant stages in the discipline s development and focuses on the key themes and ideas that inform present thinking in economic geography Organised in sections with multiple chapters The SAGE Handbook of Economic Geography is a complete overview of the discipline that critically assesses Location the quantitative revolution the new economic geography Geographies of globalization making sense of globalization and its consequences the geography of capitalism Geographies of scale and place local and global space and place Geographies of nature agriculture sustainable development the political ecology and the social construction of nature Geographies of uneven development economic decline technology money and finance Geographies of consumption and services formal and informal spaces of consumption the culture industries performance Geographies of regulation and governance neo liberalism regulation welfare Placing the discipline in vivid historical and contemporary context The SAGE Handbook of Economic Geography is a timely essential work for postgraduates researchers and academics in economic geography War and the City Sara Fregonese, 2019-11-14 War and the City examines the geopolitical significance of the Lebanese Civil War through a micro level exploration of how the urban landscape of Beirut was transformed by the conflict Focusing on the initial phase of the war in 1975 and 1976 the volume also draws significant parallels with more recent occurrences of internecine conflict and with the historical legacies of Lebanon's colonial past While most scholarship has thus far focused on post war reconstruction of the city the initial process of destruction has been neglected This volume thus moves away from formal macro level geopolitical analysis to propose instead an exploration of the urban nature of conflict through its spaces infrastructures bodies and materialities. The book utilizes urban viewpoints in order to highlight the nature of sovereignty in Lebanon and how it is inscribed on the urban landscape War and the City presents a view of geopolitics as not only shaping narratives of international relations but as crucially reshaping the space of cities Japan's Pan-Asian Empire Seok-Won Lee, 2020-12-30 This book is a study of how the theories and actual practices of a Pan Asian empire were produced during Japan s war 1931 1945 As Japan invaded China and conducted a full scale war against the United States in the late 1930s and early 1940s several versions of a Pan Asian empire were presented

by Japanese intellectuals in order to maximize wartime collaboration and mobilization in China and the colonies A broad group of social scientists including R yama Masamichi Kada Tetsuji Ezawa J ji Takata Yasuma and Shinmei Masamichi presented highly politicized visions of a new Asia characterized by a newly shared Asian identity Critically examining how Japanese social scientists contrived the logic of a Japan led East Asian community Part I of this book demonstrates the violent nature of imperial knowledge production which buttresses colonial developmentalism In Part II the book also explores questions around the re making of colonial Korea as part of Japan's regional empire generating theoretical and realistic tensions between resistance and collaboration Japan's Pan Asian Empire provides original theoretical perspectives on the construction of a multi ethnic and multi cultural empire It will appeal to students and scholars of modern Japanese history colonial and postcolonial studies as well as Korean studies The Myth of Emptiness and the New American Literature of Place Wendy Harding, 2014-10-01 From the moment the first English speaking explorers and settlers arrived on the North American continent many have described its various locations and environments as empty Indeed much of American national history and culture is bound up with the idea that parts of the landscape are empty and thus open for colonization settlement economic improvement claim staking taming civilizing cultivating and the exploitation of resources In turn most Euro American nonfiction written about the landscape has treated it either as an object to be acted upon by the author or an empty space unspoiled by human contamination to which the solitary individual goes to be refreshed and rejuvenated In The Myth of Emptiness and the New American Literature of Place Wendy Harding identifies an important recent development in the literature of place that corrects the misperceptions resulting from these tropes Works by Rick Bass Charles Bowden Ellen Meloy Ionathan Raban Rebecca Solnit and Robert Sullivan move away from the tradition of nature writing with its emphasis on the solitary individual communing with nature in uninhabited places to recognize the interactions of human and other than human presences in the land In different ways all six writers reveal a more historically complex relationship between Americans and their environments In this new literature of place writers revisit abandoned threatened or damaged sites that were once represented as devoid of human presence and dig deeper to reveal that they are in fact full of the signs of human activity These writers are interested in the role of social political and cultural relationships and the traces they leave on the landscape Throughout her exploration Harding adopts a transdisciplinary perspective that draws on the theories of geographers historians sociologists and philosophers to understand the reasons for the enduring perception of emptiness in the American landscape and how this new literature of place works with and against these ideas She reminds us that by understanding and integrating human impacts into accounts of the landscape we are better equipped to fully reckon with the natural and cultural crisis that engulfs all landscapes today
