Reconstruction Of Mature Theory Change A Theory Change Model:

Reconstruction of Mature Theory Change Rinat M. Nugayev, 1999 This monograph is aimed at an analysis of the reasons for theory change in science The writer develops a new model of theory change according to which the origins of scientific revolutions lie not in a clash of mature theories with facts but of old mature theories with each other leading to contradictions that can only be eliminated in a more general theory The model is illustrated with reference to physics in the early 20th century the three old theories in this case being Maxwellian electrodynamics statistical mechanics and thermodynamics It is suggested that special relativity both in its creation and its acceptance can be understood only with reference to developments in quantum theory

Einstein's Revolution: A Study Of Theory Unification Rinat M. Nugayev, 2018-03-06 Einstein's Revolution A Study of Theory Unification gives students of physics and philosophy and general readers an epistemological insight into the genesis of Einstein's special relativity and its further unification with other theories The book starts with an introductory analysis of the reasons for mature theory change in science This leads to a discussion about special relativity genesis It is contended that Einstein's ingenious approach to special relativity creation substantially distinguishing him from Lorentz's and Poincaré's invaluable impacts turns to be a milestone of Maxwellian electrodynamics statistical mechanics and thermodynamics reconciliation design Special relativity turns out to be grounded on Einstein's breakthrough 1905 light quantum hypothesis Eventually the author amends the received view on the general relativity genesis by stressing that the main reason for Einstein's victory over the rival programmes of Abraham and Nordström was a unificationist character of Einstein's research programme

The Genesis of the Second Scientific Revolution Rinat M. Nugayev, 2025-04-29 The present book elicits the reasons for the second scientific revolution According to Chapter 1 one has to abandon the great genius approach in favor of mundane Heidegger's existential analytic with Dasein as a way of life shared by the members of scientific community Scientific revolutions should be considered as clashes of diverse mathematical projections of nature consisting of bundles of practices In Chapter 2 it is revealed that Quantum and the Relativistic revolutions had a common origin a skirmish between the Newtonian mechanics Maxwellian electrodynamics Boltzmann's statistical mechanics and Thomson's thermodynamics The skirmish was disclosed by Planck who stressed that the paradigms must be modified to remain compatible Planck took the first step while Einstein took the next ones owing to light quanta and special relativity According to Chapter 3 general relativity was better than its rivals for the reason that it encompassed them all

Eliot's Early Criticism Hugo Roeffaers, 2000 This study assesses the relationship between Philosophy and Literary Criticism in casu the bearing of Eliot's philosophical dissertation Knowledge and Experience on his first book of criticism The Sacred Wood

Annales de la Fondation Louis de Broglie, 2000 **Science & Public Policy**, 2001 **Thomas Kuhn** Juan V. Mayoral, 2025-09-22 This new biography of Thomas S Kuhn pays attention to the continuous development of his ideas Mayoral provides a comprehensive overview of Kuhn's life and work The book explores

how Kuhn's theory develops from its beginnings at Harvard University in the early 1950s through the early 1990s at the MIT and also describes Kuhn's parallel lifetime. Between those decades 1950s and 1990s Kuhn went through different academic institutions, obtained a high status as a public intellectual, and shifted from the history of science to the philosophy of science and back as his main research target. All of this left a trace in his philosophical view of science, enriching and changing it since his early training as a theoretical physicist. In this book Kuhn is considered as an intellectual in evolution, and his contributions are assessed against the backdrop of the different contexts that he traversed. Therefore, there shall not be a static figure of this intellectual, as there shall not be a static figure of the surrounding intellectual contexts either. At the same time, however, this book is planned so that each chapter provides the reader with a picture of a significant period in Kuhn's development and the main ideas that can be observed in it. The book is useful for upper undergraduates in philosophy, especially in philosophy of science, in general history and history of science, in the social sciences, and other fields of humanities, and for scientifically trained individuals interested in this author. Kuhn scholars shall find this book useful for their studies on Kuhn insofar as new unpublished documents are employed, new facts about Kuhn's life are provided, and a full interpretation of Kuhn's evolving system of philosophy of science is built and discussed.

The Adult Learner Malcolm Knowles, Elwood F. Holton III, Petra A. Robinson, Corina Caraccioli, 2025-01-28. How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy, which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 10th edition of *The Adult Learner* has been revised to include two chapters on diversity, inclusion, and belonging in adult learning and andragogy, and the online adult learner have been greatly expanded to
