Hypermedia Dan H. Wishnietsky,1992 Hypermedia is not a single technology it is an integrated electronic environment that combines text audio and video into one large file Users can explore information about a subject using several technologies at the same time Although the technical foundation for hypermedia was established in the early 1970s it was not until the late 1980s and early 1990s that the hardware for supporting hypermedia became readily available In a hypermedia system each component of stored information is a node and the nodes are connected by paths The paths that a user travels are determined by interest experience and need Hypermedia systems have many classroom applications and can revolutionize a student s view of learning with the hardware and software currently available As hypermedia technology develops the educational environment will advance beyond lectures notetaking and other common forms of learning Edutainment the combining of education and entertainment and virtual reality are extensions of hypermedia that promise to improve the learning environment A 13 item resource list cites the names and addresses of organizations and journals that provide information about hypermedia SLD

The Portfolio Approach to Assessment Emily Grady,1992 The shortcomings of standardized testing as the predominant form of student assessment in the United States are reviewed and the use and potential benefits of portfolio assessment are explored Children s educational experiences and their future job prospects and standards of living are being decided by test scores Moreover these test scores may be unfair or biased against some students Instead of more tests we need a new attitude toward assessment one that encourages a variety of assessments Portfolio assessment through collections of student works can be an encompassing format for this new philosophy Before considering what a portfolio should contain it is important to establish the purpose of the assessment The experiences of Vermont illustrate the development of a portfolio assessment with consistent standards Examples of guidelines for mathematics and language arts portfolios make it clear that it is possible to establish consistent practices It is also necessary to reflect on the portfolio occasionally using self evaluations and direct questions or profiles Educators also find portfolios useful tools for preservice teachers Portfolio assessment can be the framework for a new curricular structure that integrates assessment into the learning loop SLD
