**Riparian Areas** National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Water Science and Technology Board, Committee on Riparian Zone Functioning and Strategies for Management, 2002-10-10 The Clean Water Act CWA requires that wetlands be protected from degradation because of their

important ecological functions including maintenance of high water quality and provision of fish and wildlife habitat. However, this protection generally does not encompass riparian areas, the lands bordering rivers and lakes, even though they often provide the same functions as wetlands. Growing recognition of the similarities in wetland and riparian area functioning and the differences in their legal protection led the NRC in 1999 to undertake a study of riparian areas which has culminated in *Riparian Areas Functioning and Strategies for Management*. The report is intended to heighten awareness of riparian areas commensurate with their ecological and societal values. The primary conclusion is that because riparian areas perform a disproportionate number of biological and physical functions on a unit area basis, restoration of riparian functions along America's waterbodies should be a national goal. *Riparian Ecosystems*, 1981 **Science and Children**, 1999

**Riparian Areas of the Southwestern United States** Peter F. Ffolliott, Leonard F. DeBano, 2003-07-28. The demand for water resulting from massive population and economic growth in the southwestern U.S. overwhelmed traditional uses of riparian areas. As a consequence, many of these uniquely structured ecosystems have been altered or destroyed. Within recent years, people have become increasingly aware of the many uses and benefits of riparian zones. Biological Abstracts Jacob Richard Schramm, 1974
