Society of Risk-Takers William C. Cockerham, 2005-08-19 What causes an individual to be a risk taker In this timely and provocative new book William C Cockerham provides an up to date sociological examination of risk takers and risk

taking processes through the lens of some of America's most dangerous behaviors: sexually transmitted diseases, alcohol, drug use, smoking, and extreme sports. Not content with simply discussing these subjects, Cockerham also creates an original and innovative risk response model designed to advance the sociological analysis of risk takers. Society of Risk Takers can be incorporated into a variety of courses in sociology, social problems, culture and society, and medical sociology. **The Big Gamble** Milena Belloni, 2019-12-17 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Tens of thousands of Eritreans make perilous voyages across Africa and the Mediterranean Sea every year. Why do they risk their lives to reach European countries where so many more hardships await them? By visiting family homes in Eritrea and living with refugees in camps and urban peripheries across Ethiopia, Sudan, and Italy, Milena Belloni untangles the reasons behind one of the most under-researched refugee populations today. Balancing encounters with refugees and their families, smugglers, and visa officers, *The Big Gamble* contributes to ongoing debates about blurred boundaries between forced and voluntary migration, the complications of transnational marriages, the social matrix of smuggling, and the role of family expectations, emotions, and values in migrants' choices of destinations. *Empowerment, Health Promotion and Young People* Grace Spencer, 2013-10-30 Globally, young people's health is an increasing priority area for health practitioners, policy makers, and researchers, and concepts of empowerment feature strongly in international public health discourses on young people's health. Yet the concept of empowerment remains under-theorized, and its relationship to young people's health is not well understood. This innovative volume critically examines the concept of empowerment and its relationship to young people's health. *Empowerment, Health Promotion and Young People* is set out in two main parts. Part one examines differing conceptions of power and empowerment and how these concepts have been variously defined and used in relation to young people's health and health promotion. Part two offers a new theoretical framework for understanding empowerment as it relates to young people's health. Drawing together key works in the field and findings from an empirical enquiry on young people's health, this framework looks at health as it is defined by young people themselves and offers new directions for empowerment and critical insights into the field of young people's health and health promotion. Critically engaging with the concept of power and opening up the debate about the relevance and effectiveness of using contemporary understandings of empowerment to promote health, this book is suitable for researchers and students of health sociology, education, and youth studies interested in young people's health and health promotion. **Handbook of Social Problems** George Ritzer, 2003-11-13 Ritzer's *Handbook of Social Problems* offers a comprehensive treatment of today's major societal issues. The articles are authored by some of the top scholars in the field and address problem areas that will capture the interests of students and professors alike. The international coverage is most welcome in this time of intensifying global inequalities. Nancy Jurik, Arizona State University. *The Handbook of Social Problems: A Comparative International Perspective* provides a unique, broadly comparative perspective on the current state of social problems and deviance in a variety of societies around

the world Editor George Ritzer along with leading U S and international sociologists examines the relationship between social problems and a society's level of development and affluence The essays in this volume focus on four interrelated issues involved in the relationship between social problems and the level of development and affluence Less developed and less affluent societies are more likely to experience a range of social problems than developed and affluent societies Affluence causes or at least brings with it a series of social problems that do not exist in less affluent societies It is only with affluence that certain things can come to be imagined as social problems such as excessive consumption The very affluence of a society makes it vulnerable to problems that would not be social problems in poorer societies The Handbook explores the theory of the weakness of the strong in other words strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies This theory is clearly illustrated in this volume by the aftermath of September 11 2001 depicting the vulnerability of the U S to social problems in far removed corners of the world In addition the international and comparative essays in this volume cover other important issues such as the impact of modern technologies on social problems ecological problems global inequality health as a social problem and much more The Handbook of Social Problems is a vital resource for sociologists and graduate students as well as an excellent addition to any academic library

Risk and Morality Richard V. Ericson, Aaron Doyle, 2003-01-01 Collectively the contributors explain why risk is such a key aspect of Western culture and demonstrate that new regimes for risk management are transforming social integration value based reasoning and morality

Risk and the English Novel Julia Hoydis, 2019-09-23 Taking the cue from the currency of risk in popular and interdisciplinary academic discourse this book explores the development of the English novel in relation to the emergence and institutionalization of risk from its origins in probability theory in the late seventeenth century to the global risk society in the twenty first century Focussing on 29 novels from Defoe to McEwan this book argues for the contemporaneity of the rise of risk and the novel and suggests that there is much to gain from reading the risk society from a diachronic literary cultural perspective Tracing changes and continuities the fictional case studies reveal the human preoccupation with safety and control of the future They show the struggle with uncertainties and the construction of individual or collective logics of risk which oscillate between rational calculation and emotion helplessness and denial and an enabling or destructive sense of adventure and danger Advancing the study of risk in fiction beyond the confinement to dystopian disaster narratives this book shows how topical notions such as chance and probability uncertainty and responsibility fears of decline and transgression all cluster around risk

The End of Fortuna and the Rise of Modernity Arndt Brendecke, Peter Vogt, 2017-09-25 The late 16th century and the first half of the 17th century saw a final resurgence of the concept of Fortuna Shortly thereafter this goddess of chance and luck who had survived for millennia rapidly lost her cultural and intellectual relevance This volume explores the late heyday and subsequent erasure of Fortuna It examines vernacular traditions and confessional differences analyses how the iconography and semantics of

Fortuna motifs transformed and traces the rise of complementary concepts such as those of probability risk fate and contingency Thus a multidisciplinary team of contributors sheds light on the surprising ways in which the end of Fortuna intersected with the rise of modernity

Early Motherhood in Digital Societies Ranjana Das,2019-12-11 Early Motherhood in Digital Societies offers a nuanced understanding of what the digital turn has meant for new mothers in an intense and critical period before and after they have a baby often called the perinatal period The book looks at an array of digital communication and content by drawing on an extensive research project involving in depth qualitative data from interviews with new mothers in the United Kingdom and online case studies These stories are analysed to investigate the complexity of emotions around birth the diversity of birth experiences and the myriad ways in which television the press and social media impede and empower women giving birth The book asks what does the use of technology mean in the perinatal context and what implications might it have for maternal well being It argues for a balanced and context sensitive approach to the digital for maternal well being in the critical perinatal period By doing this the book fills a gap in media studies addressing itself to gaps within audience analysis health communication and parenting It will be essential reading for research and teaching modules in media studies cultural studies sociology health communication and sociology of medicine and health

On Vulnerability Patrick Brown,2021-07-12 On Vulnerability maps out an array of perspectives for critically examining the nature of vulnerability its unequal patterning across different social groups alongside the everyday social processes that render us vulnerable interactions identity and group dynamics Each chapter equips the reader with a particular sensitising framework for navigating and questioning what it means to be vulnerable or how people cope amid vulnerability From deviance stigma and the spoiling or fracturing of identity to perspectives such as intersectionality risk emotions and the vulnerable body the book traces the theoretical roots of these different analytical lenses before applying these through illuminating examples and case studies Drawing on scholarship across more interpretative analytic and critical traditions the chapters combine into a multi dimensional toolkit which will enable the study of the cultural meanings of vulnerability the political economic factors that shape its patterning with a critical sensibility for unlearning many assumptions therefore challenging our sense of who is or who can be vulnerable This book is designed to equip undergraduate and post graduate students and researchers across the social health and human sciences aiding them as they study and question the experiences and structures of vulnerability in our social world

Counselling Male Sexual Offenders Andrew Smith,2017-11-22 Counselling Male Sexual Offenders A Strengths Focused Approach informs readers how to utilize an easily accessible integrative strengths focused counselling approach with men who pose a sexual risk There is currently a scarcity of published material which teaches people in a practical way how to conduct one to one counselling with different sorts of male sex offenders However as the number of internet offenders increases exponentially and more historic abuse cases emerge understanding and treating the phenomenon of sex offending can play a significant role in preventing sexual crime

and reducing harm to victims In addition to being a how to do book in Counselling Male Sexual Offenders the author explores at depth the inner processes of counsellors working with this client group It presents treatment formats and exercises for engaging individuals who deny and minimize harmful sexual behaviour With illustrative case studies of various types of sex offenders as well as statements from sex offenders and probation officers themselves this text provides one of the most comprehensive insights available into the authentic experience of treating this population Counselling Male Sexual Offenders will be of value to counsellors and psychotherapists alongside other practitioners such as psychologists social workers probation officers and support workers

Risk, Disaster and Crisis Reduction Valerie November, Yvan

Leanza, 2014-10-06 In the field of risks and crises both the access to relevant information and its circulation are seen as crucial factors Based on a new integrated theoretical model focusing on the stakeholder the book proposes analysis of information reformulation and circulation in risk environments and crisis situations Simply circulating the information does not mean that it will be picked up by those who could benefit from it This has been amply demonstrated by the various crises and catastrophes that have shaken the planet in recent years In order to be able to deal with risk situations and crises it must be possible for information when it circulates to be understood and interpreted by a wide range of stakeholders working in fields such as health and natural or environmental risks By observing closely in three very different situations the way in which information is gathered processed distributed and used this book examines the countless reformulations redefinitions and even reorientations to which all information is subjected This multiple reformatting at least according to the hypothesis put forward in this book is an important element in ensuring that the information produced circulates and reaches those for whom it is intended The intention is then to analyze the way in which information circulates in situations of risk and crisis In order to do it the authors propose a new theoretical model based on different approaches This model is anchored in the trend of research that has been oriented towards a wider understanding of risks and their territorial and social consequences These ideas question the approach to risk which focuses primarily on technical aspects and probability The model also draws from approaches to risk that focus on the stakeholders involved in the debates and the need for an integrated vision of risks Risks are thus considered heterogeneous plural and transcalar The information flow about risks was studied first in the SHOC Room of the World Health Organization WHO in Geneva a central place through which passes all information destined to managing world wide epidemic risks Then the research team monitored the constitution and the reception of a field library about risks management and reduction sent to Madagascar an island systematically hit by cyclones This following process has permitted the analysis of information dissemination during a crisis situation The third field work was done in Cameroun to observe the use and transmission of information in two NGO specializing in sanitary risks prevention using traditional and biomedical conceptualization of health and illness The book ends with a practical tool to assess and help the information circulation in risk and crisis situations
