Calow, 2009-07-08 At the heart of environmental protection is risk assessment the likelihood of pollution from accidents the likelihood of problems from normal and abnormal operation of industrial processes the likely impacts associated with new synthetic chemicals and so on Currently risk assessment has been very much in the news the risks from BSE and E coli and the public perception of risks from nuclear waste etc This new publication explains how scientific methodologies are used to assess risk from human activities and the resultant objects and wastes on people and the environment Understanding such risks supplies crucial information to frame legislation manage major habitats businesses and industries and create development programmes Unique in combining the science of risk assessment with the development of management strategies Covers science and social science politics economics psychology aspects Very timely risk assessment lies at the heart of decision making in various topical environmental questions BSE Brent Spar nuclear waste

**The Ecological Risks of Engineered Crops** Jane Rissler, Margaret G. **Virus-Resistant Transgenic Plants: Potential Ecological Impact** Mark Tepfer, Ervin Balazs, 2013-04-17

The introduction of novel genes into plants by genetic transformation holds great promise for plant breeding and many crop species have been rendered virus resistant by expression of viral sequences However it is essential to also evaluate the potential risks associated with this new technology Among the types of genetically modified plants that could represent potential ecological risks ones expressing viral sequences pose questions of particular interest In this volume special attention is given to recombination in plants expressing sequences of RNA or DNA viruses heterologous encapsidation or other forms of complementation in plants expressing coat protein genes potential deleterious effects of satellite RNAs associated with cucumber mosaic virus and sexual transmission of virus resistance genes to potentially weedy relatives
