ECOOP 2004 - Object-Oriented Programming Martin Odersky, 2004-11-24 ECOOP is the premier forum in Europe for bringing together practitioners, researchers and students to share their ideas and experiences in a broad range of disciplines woven with the common thread of object technology. It is a collage of events including outstanding invited speakers, carefully refereed technical papers, practitioner reports reflecting real world experience, panels, topic focused workshops, demonstrations and an interactive posters session. The 18th ECOOP 2004 conference held during June 14-18 2004 in Oslo, Norway represented another year of continued success in object oriented programming both as a topic of academic study and as a vehicle for industrial software development. Object oriented technology has come of age; it is now the commonly established method for most software projects. However, an expanding field of applications and new technological challenges provide a strong demand for research in foundations, design and programming methods as well as implementation techniques. There is also an increasing interest in the integration of object orientation with other software development techniques. We anticipate therefore that object oriented programming will be a fruitful subject of research for many years to come. This year the program committee received 132 submissions of which 25 were accepted for publication after a thorough reviewing process. Every paper received at least 4 reviews. Papers were evaluated based on relevance, significance, clarity, originality and correctness. The topics covered include programming concepts, program analysis, software engineering aspects and components, middleware, verification systems and implementation techniques. These were complemented by two invited talks from Matthias Felleisen and Tom Henzinger. Their titles and abstracts are also included in these proceedings.

Social Computing and Social Media: Experience Design and Social Network Analysis Gabriele Meiselwitz, 2021-07-03 This two volume set LNCS 12774 and 12775 constitutes the refereed proceedings of the 13th International Conference on Social Computing and Social Media SCSM 2021 held as part of the 23rd International Conference HCI International 2021 which took place in July 2021. Due to COVID 19 pandemic the conference was held virtually. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers of SCSM 2021 Part I are organized in topical sections named Computer Mediated Communication, Social Network Analysis, Experience Design in Social Computing.
