Mindful Spirit in Late Medieval Literature Bonnie Wheeler, 2016-04-30 In what varieties of ways is late medieval literature inflected by spiritual insight and desires What weaves of literary cloth especially suit religious insight In this collection dedicated to Elizabeth D Kirk Emeritus Professor of English at Brown University several renowned scholars assess those related issues in a range of Medieval texts

An Introduction to Medieval English Literature Anna Baldwin, 2015-11-15 This is a comprehensive guide to a literary period characterized by great variety and imagination and vividly alert to the social transformations overtaking society Spanning almost two centuries it introduces the reader to a diverse range of authors writing for a fast developing readership of both men and women Each chapter focuses on a group of genres primarily associated with a particular social class from the Drama and Saints Lives accessible to the illiterate to the sophisticated Romances of Love savoured by the aristocracy and the Court Lively historical narratives place each group of texts in their social political and cultural contexts Significant or typical texts are given more detailed analysis that includes critical issues and questions to guide the reader's own approach and each section is supported by a detailed bibliography of further reading

The Grounds of English Literature Christopher Cannon, 2004-12-09 The centuries just after the Norman Conquest are the forgotten period of English literary history In fact the years 1066 1300 witnessed an unparalleled ingenuity in the creation of written forms for this was a time when almost every writer was unaware of the existence of other English writing In a series of detailed readings of the more important early Middle English works Cannon shows how the many and

varied texts of the period laid the foundations for the project of English literature. This richness is for the first time given credit in these readings by means of an innovative theory of literary form that accepts every written shape as itself a unique contribution to the history of ideas. This theory also suggests that the impoverished understanding of literature we now commonly employ is itself a legacy of this early period: an attribute of the single form we have learned to call romance. A number of reading methods have lately taught us to be more generous in our understandings of what literature might be, but this book shows us that the very variety we now strive to embrace anew actually formed the grounds of English literature: a richness we only lost when we forgot how to recognize it.

The N-Town Plays Victor I. Scherb, Douglas Sugano, 2007-05-01. In the late 1400s in eastern England a scribe was in the process of compiling a large dramatic manuscript of over two hundred vellum folios. The manuscript contains components of an independent Mary Play, parts one and two of an independent Passion Play, and an independent Assumption of Mary Play, as well as ten play subjects that appear in no other English cycles: the killing of Lamech in the Noah Play, the Root of Jesse, the story of Joachim and Anne, the Presentation of Mary in the Temple, the Parliament of Heaven, the Trial of Mary and Joseph, the scene of Mary and the cherry tree in the Nativity Play, the Death of Herod, the scene of Veronica's handkerchief in the Procession to Calvary, and the appearance of the risen Christ to the Virgin Mary in her Assumption Play. This edition acknowledges the N-Town compiler, who took plays from various contexts and integrated them into an existing cycle of plays, thus treating the manuscript as if it were a superstructure whose parts could be replaced, renovated, and supplemented without altering the fundamental coherence of the overarching design.

The Voices of Medieval English Lyric Anne L. Klinck, 2019-11-28. What was the medieval English lyric? Moving beyond the received understanding of the genre, *The Voices of Medieval English Lyric* explores through analysis, discussion, and demonstration what the term lyric most meaningfully implies in a Middle English context. A critical edition of 131 poems that illustrate the range and rich variety of lyric poetry from the mid-twelfth century to the early sixteenth century, *The Voices of Medieval English Lyric* presents its texts freshly edited from the manuscripts in thirteen sections, emphasizing contrasting and complementary voices and genres. As well as a selection of religious poetry, the collection includes a high proportion of secular lyrics, many on love and sexuality, both earnest and humorous. In general, major authors who have been covered thoroughly elsewhere are excluded from the edited texts, but some especially Chaucer are quoted or mentioned as illuminating comparisons. Charles d'Orléans and the Scots poets Robert Henryson and William Dunbar add an extra-national dimension to a single language collection. Textual and thematic notes are provided as well as

versions of the poems in Latin or French when these exist Adopting new perspectives The Voices of Medieval English Lyric offers an up to date accessible and distinctive take on Middle English poetry

The Case for Women in Medieval Culture Alcuin Blamires,1998-08-27 Misogyny is of course not the whole story of medieval discourse on women medieval culture also envisaged a case for women But hitherto studies of profeminine attitudes in that periods culture have tended to concentrate on courtly literature or on female visionary writings or on attempts to transcend misogyny by major authors such as Christine de Pizan and Chaucer This book sets out to demonstrate something different that there existed from early in the Middle Ages a corpus of substantial traditions in defence of women on which the more familiar authors drew and that this corpus itself consolidated strands of profeminine thought that had been present as far back as the patristic literature of the fourth century The Case for Women surveys extant writings formally defending women in the Middle Ages breaks new ground by identifying a source for profeminine argument in biblical apocrypha offers a series of explorations of the background and circulation of central arguments on behalf of women and seeks to situate relevant texts by Christine de Pizan Chaucer Abelard and Hrotsvitha in relation to these arguments Topics covered range from the privileges of women and pro Eve polemic to the social and moral strengths attributed to women and to the powerful models frequently disruptive of patriarchal complacency presented by Old and New Testament women The contribution made by these emphases which are not to be confused with feminism in a modern sense to medieval constructions of gender is throughout critically assessed and the book concludes by asking how far defenders were controlled by or able to query assumptions about what was natural and therefore imagined inflexible in gender theory

Performing Arguments Maura Giles-Watson,2024-03-04 Performing Arguments Debate in Early English Poetry and Drama proposes a fresh performance centered view of rhetoric by recovering tracing and analyzing the trope and tradition of aestheticized argumentation as a mode of performance across several early ludic genres Middle English debate poetry the fifteenth century disguising play the Tudor Humanist debate interlude and four Shakespearean works in which the dynamics of debate invite the plays reconsideration under the new rubric of rhetorical problem plays Performing Arguments further establishes a distinction between instrumental argumentation through which an arguer seeks to persuade an opponent or audience and performative argumentation through which the arguer provides an aesthetic display of verbal or intellectual skill with persuasion being of secondary concern or of no concern at all This study also examines rhetorical and performance theories and practices contemporary with the early texts and genres explored and is further influenced by more recent critical perspectives on resonance and reception and theories of audience response and reconstruction

The Auchinleck Manuscript Susanna Fein,2016 Fresh examinations of the manuscript which is one of the chief compendiums of literature in the Middle English period

The Arts of Disruption Nicolette Zeeman,2020-07-22 The monograph series Oxford Studies in Medieval Literature and Culture showcases the plurilingual and multicultural quality of medieval literature and actively seeks to promote research that not only focuses on

the array of subjects medievalists now pursue in literature theology and philosophy in social political jurisprudential and intellectual history the history of art and the history of science but also that combines these subjects productively It offers innovative studies on topics that may include but are not limited to manuscript and book history languages and literatures of the global Middle Ages race and the post colonial the digital humanities media and performance music medicine the history of affect and the emotions the literature and practices of devotion the theory and history of gender and sexuality ecocriticism and the environment theories of aesthetics medievalism *The Arts of Disruption Allegory and Piers Plowman* offers a series of new readings of the allegorical poem *Piers Plowman* but it is also a book about allegory It argues not just that there are distinctively disruptive arts that occur in allegory but that allegory because it is interested in the difficulty of making meaning is itself a disruptive art The book approaches this topic via the study of five medieval allegorical narrative structures that exploit diegetic conflict and disruption Although very different they all bring together contrasting descriptions of spiritual process in order to develop new understanding and excite moral or devotional change These five structures are the paradiastolic hypocritical figure such as vices masked by being made to look like adjacent virtues personification debate violent language and gestures of apophasis narratives of bodily decline and grail romance Each appears in a range of texts which the book explores along with other connected materials in medieval rhetoric logic grammar spiritual thought ethics medicine and romance iconography These allegorical narrative structures appear radically transformed in *Piers Plowman* where the poem makes further meaning out of the friction between them Much of the allegorical work of the poem occurs at the points of their intersection and within the conceptual gaps that open up between them Ranging across a wide variety of medieval allegorical texts the book shows from many perspectives allegory's juxtaposition of the heterogeneous and its questioning of supposed continuities *Sanctity as literature in late medieval Britain* Anke Bernau, Eva von

Contzen, 2015-05-01 This collection explores some of the many ways in which sanctity was closely intertwined with the development of literary strategies across a range of writings in late medieval Britain Rather than looking for clues in religious practices in order to explain such changes or reading literature for information about sanctity these essays consider the ways in which sanctity as concept and as theme allowed writers to articulate and to develop further their craft in specific ways While scholars in recent years have turned once more to questions of literary form and technique the kinds of writings considered in this collection writings that were immensely popular in their own time have not attracted the same amount of attention as more secular forms The collection as a whole offers new insights for scholars interested in form style poetics literary history and aesthetics by considering sanctity first and foremost as literature **Forms of Devotion in Early English Poetry** Jennifer A.
