On The Eve Of The 21st Century Challenges And Responses:

On the Eve of the 21st Century Erzsébet Gidai, Judit Balázs, 1998 In this book prominent Hungarian futurologists are investigating some of the great questions of the 21st century They attempt to identify prospective ways into the future on the basis of analyses of the recent era The present collection of essays is not only recommended to specialists of futurology It can also be profitably used as a university textbook *Christian Responses to Spiritual Incursions into the 21st Century Church and Society* Nikolaos Asproulis, Stuart Devenish, 2020-10-30 This volume provides an account of the surprising in breaking of spiritual life that persists in our culture despite the best efforts of atheist spokespersons and secular theorists Spirituality in its varying forms is irrepressible resisting our attempts to exclude it by continuing to seep through the cracks and leak through the gaps When it is allowed to manifest itself through the Christian faith tradition it has the power to surprise transform and renew everything it touches This volume contains a series of case studies each of which describes the inner functionings and out workings of the spiritual life as a transformative point of contact between God world society and self Each chapter contains high level inquiry drawing on best practice scholarship that is deeply aware of the needs and opportunities that confront 21st century society **Africa on the Eve of the 21st Century**, 1997 The 2nd ASEAN Reader Sharon Siddique, Sree Kumar, 2003-10-17 A sequel to the first ASEAN Reader Some of the classic readings from the original ASEAN reader have been incorporated into this new compilation but the majority of the readings cover events of the past decade 1993 2003 During this decade ASEAN as an organization was revamped and its membership increased from six to ten **Current Issues in Human Rights and International Relations** Clemens Nathan, 2009-11-23 Following its creation in 2004 initially as the research arm of the Consultative Council of Jewish Organisations CCJO and later in a more independent role the Clemens Nathan Research Centre CNRC has rapidly become an important element within the Human Rights movement in the United Kingdom and beyond A striking feature of the CNRC s work has been its organisation of a series of very successful multi disciplinary seminars on topics related to Human Rights and to international relations This book comprises many of the papers presented at these seminars as well as two public lectures linked to CNRC CCJO activities The papers and lectures reflect the high quality of the materials produced for CNRC projects and are distinguished by the broad range of experience of the contributors who include academics clergymen and senior officials of international organisations as well as military officers of the highest rank and civil servants at the heart of government decision making The publishers are pleased to be able to give those who have been unable to attend CNRC seminars the opportunity to enjoy and be enriched by this selection of papers **Energy Security Challenges for the 21st Century** Gal Luft, Anne Korin, 2009-08-10 The impact of energy on global security and economy is clear and profound and this is why in recent years energy security has become a source of concern to most countries However energy security means different things to different countries based on their geographic location their endowment of resources their strategic and economic conditions

In this book Gal Luft and Anne Korin with the help of twenty leading experts provide an overview of the world's energy system and its vulnerabilities that underlay growing concern over energy security. It hosts a debate about the feasibility of resource conflicts and covers issues such as the threat of terrorism to the global energy system, maritime security, the role of multinationals and non-state actors in energy security, the pathways to energy security through diversification of sources and the development of alternative energy sources. It delves into the various approaches selected producers, consumers and transit states have toward energy security and examines the domestic and foreign policy tradeoffs required to ensure safe and affordable energy supply. The explains the various pathways to energy security and the tradeoffs among them and demonstrates how all these factors can be integrated in a larger foreign and domestic policy framework. It also explores the future of nuclear power, the complex relations between energy security and environmental concerns and the role for decentralized energy as a way to enhance energy security.

Nationalism Today M. Troy Burnett, 2020-08-04 This extensive reference examines extreme political movements and the political, cultural and economic conditions that breed them from the alt right in the United States to the Houthi rebel movement in Yemen and the question of Taiwan's independence. Nationalism Today: Extreme Political Movements around the World is an authoritative guide for students and teachers who seek to understand nationalist movements across the globe. The two-volume work opens with essays that describe different types of nationalist movements: extremist, revisionist and separatist. Arranged by country, the entries that follow provide the geographic, cultural, economic and political context for the development of nationalist movements. The entries provide expert analysis of specific movements and lay the groundwork for comparison of the many different types of extreme political movements that are exerting themselves around the world today. In addition, easy-to-read tables give cultural, economic and political facts and figures for each country. A comprehensive scholarly bibliography of secondary sources rounds out the book.

Racism in the Neoliberal Era Randolph Hohle, 2025-08-22 *Racism in the Neoliberal Era* explains how simple racial binaries like black/white are no longer sufficient to explain the persistence of racism, capitalism and elite white power. The neoliberal era features the largest Black middle class in US history and extreme racial marginalization. Racial languages change the meaning of public and private, political economy's two fundamental terms. Randolph Hohle focuses on how the origins and expansion of neoliberalism depended on a racial language of white/private/black/public. The language of neoliberalism explains how the white racial frame operates like a web of racial meanings that connect social groups with economic policy, geography and police brutality. When America was racially segregated, elites

consented to political pressure to develop and fund white public institutions The Black civil rights movement eliminated legal barriers that prevented racial integration The elite white response to Black civic inclusion was to deregulate the Voting Rights Act and banking policy Elites gave themselves tax cuts and implemented austerity measures on government programs to aid the poor They privatized neighborhoods schools and social welfare creating markets around poverty They oversaw the mass incarceration and systemic police brutality against people of color Citizenship was recast as a privilege instead of a right Neoliberalism is the result of an elite white meta strategy to maintain political and economic power This new edition is thoroughly revised and updated to take account of the further history and debates over neoliberalism in the Trump and Biden eras and the significant social and political discussions around race and racism policing housing health care and citizenship as they interconnect with the American neoliberal economic and political system The new edition will be a vital textbook for students instructors and researchers in sociology politics race and economics **Keys to the 21st Century** Jérôme
