Gravani, 2013-10-29 This book critically reflects on the context in which lifelong learning policies and practices are organized in Europe with contributions of researchers and policy makers in the field Through a critical lens the book reinterprets the core content of the messages that are conveyed by the European Commission in the Memorandum for Lifelong Learning the most important policy

document in the area which after a decade from its publication still remains the vehicle for all current developments in lifelong learning in Europe With references to research findings proposed actions and applications to immediate practice that have an added value for Europeans but which either do not appear to correspond directly to what is stipulated by the European Commission or are completely ignored as part of the lifelong learning process the book offers an analytic and systematic outlook of the main challenges in creating the European Area of Lifelong Learning In times as decisive as the ones we are going through today both in social and economic terms a critical perspective of the practices and policies adopted by the EU Member States is essential The book follows the same structure as the Memorandum in order to debate and critically approach in separate sections the core issues that Europe faces today in relation to the idea of making a European area of Lifelong Learning

of post subcultural theorists the Milanese variations of goth appear to have been socially shared as socially shared were the different practices of enactment of the subculture that characterized each of them

The Turn to Biographical Methods in Social Science Prue Chamberlayne, Joanna Bornat, Tom Wengraf, 2002-09-11 Biographical research methods have become a useful and popular tool for contemporary social scientists This book combines an exploration of the historical and philosophical origins of this important field of qualitative research with comparative examples of the different ways that biographical methods have been successfully applied internationally Through these many illustrative examples of socio biography in process the authors show how formal textual analysis whilst uncovering hidden emotional defences can also shed light on wider historical processes of societal transformation Topics discussed include individual and linked lives generational change political influences on memory and identity biographical work in reflexive societies narrativity and empowerment in professional practice ways of theorising and generalising from case studies Biographical Methods in the Social Sciences promotes debate and provides opportunities for students and researchers to widen their uses of narrative research

Using Narrative in Social Research Jane Elliott, 2005-05-17 Jane Elliott's examination of the use of narrative within the broad context of social science inquiry is a must read for both qualitative and quantitative researchers novice and expert alike Journal of Advanced Nursing This important book does an impressive job of synthesising a complex literature and bringing together both qualitative and quantitative methods of narrative analysis It will become a milestone in the development of narrative methods Although ground breaking in many ways it is very clearly written and accessible to readers from a wide variety of backgrounds and methodological experience Nigel Gilbert University of Surrey An elegantly written scholarly and accessible text Jane Elliott shows a sophisticated appreciation of contemporary methodological developments and makes a persuasive case for the use of narrative approaches in both qualitative and quantitative research The book challenges and advances debates about combining methods and shows how stories can work within and across conventional research boundaries It is a truly original contribution to the literature Amanda Coffey Cardiff

School of Social Sciences An outstanding book Jane Elliott breaks new ground by demonstrating to new generations of social scientists how the power of narrative can fruitfully be harnessed in social research This is a must read book Professor Mike Savage University of Manchester This is a lucid and accessible introduction to narrative methods in social research It is also an important book about the nature role and theoretical basis of research methodology in general Jane Elliott instructs the reader on the basic methods and methodological assumptions that form the basis of narrative methods She does so in a way that is practical and accessible and in a way that will make the book a favourite with students and experienced researchers alike Elliott argues that both qualitative and quantitative methods are characterised by a concern with narrative and that our research data can best be analyzed if it is seen in narrative terms In concrete step by step terms she details for the reader how to go about collecting data and how to subject that data to narrative analysis while at the same time placing this process in its wider theoretical context She works across the traditional quantitative qualitative divide to set out the ways in which narrative researchers can uncover such issues as social change causality and social identity She also shows how the techniques and skills used by qualitative researchers can be deployed when doing quantitative research and similarly how qualitative researchers can sometimes profit from using quantitative skills and techniques This book provides both a fascinating and a challenging read What sets this text apart from other books on research methodology and methods is that it does not focus exclusively on either quantitative or qualitative research approaches but rather attempts to bridge the divide The book should be compulsory reading not only for those aspiring to undertake narrative research and those students undertaking higher degree research courses but also for those more experienced researchers wishing to explore contemporary issues in research methods and methodology As a recent recruit to a lecturer practitioner post with little recent experience in the subject area covered by this book I found it met my needs very well I would certainly recommend this book for purchase Dr Andrew Pettipher University of Nottingham UK
