Excerpt from *On the Senses Instincts and Intelligence of Animals With Special Reference to Insects* In the present volume I have collected together some of my recent observations on the senses and intelligence of animals and especially of insects While attempting to understand the manners and customs habits and behaviour of animals as well as for the purpose of devising test experiments I have found it necessary to make myself acquainted as far as possible with the mechanism of the senses and the organs by means of which sensations are transmitted With this object I had to look up a great number of memoirs in various languages and scattered through many different periodicals and it seemed to me that it might be interesting and save others some of the labour I had to undergo myself if I were to bring together the notes I had made and give a list of the principal memoirs consulted I have accordingly attempted to give very briefly some idea of the organs of sense commencing in each case with those of man himself About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *On the Senses, Instincts and Intelligence of Animals* John Lubbock, 2017-10-26
