problems such as poverty and AIDS and failed states magnify the effects of natural disasters such as hurricanes and earthquakes. In response to the multiple threats posed by failed states, working states sometimes acting alone, sometimes in concert with others, have undertaken military operations often under the rubric of humanitarian intervention. This book is a historical study of state failure, underdevelopment, and foreign intervention in light of the Haitian experience with all three. Its main thesis is that state failure has been a recurring feature of Haitian political life for much of the country's history, and this inability of the Haitians to craft a viable political order is at the heart of Haitian poverty and underdevelopment. Haitian state-making failure is underwritten by a complex array of deleterious local and external institutions as well as natural constraints including class, lack of elite cohesion, geography, population growth, the social origins of the Haitian polity, imperialism, and technology.

Handbook of Historical Studies in Education Tanya Fitzgerald, 2020-04-03. This book offers an in-depth historiographical and comparative analysis of prominent theoretical and methodological debates in the field. Across each of the sections, contributors will draw on specific case studies to illustrate the origins, debates, and tensions in the field and overview new trends, directions, and developments. Each section includes an introduction that provides an overview of the theme and the overall emphasis within the section. In addition, each section has a concluding chapter that offers a critical and comparative analysis of the national case studies presented. As a Handbook, the emphasis is on deeper consideration of key issues rather than a more superficial and broader sweep. The book offers researchers, postgraduate and higher degree students, as well as those teaching in this field, a definitive text that identifies and debates key historiographical and methodological issues. The intent is to encourage comparative historiographical perspectives of the nominated issues that overview the main theoretical and methodological debates and to propose new directions for the field.

Twentieth Century Colonialism and China Bryna Goodman, David Goodman, 2012-07-26. Colonialism in China was a piecemeal agglomeration that achieved its greatest extent in the first half of the twentieth century, the last edifices falling at the close of the century. The diversity of these colonial arrangements across China's landscape defies systematic characterization. This book investigates the complexities and subtleties of colonialism in China during the first half of the twentieth century. In particular, the contributors examine the interaction between localities and forces of globalization that shaped the particular colonial experiences characterizing much of China's experience at this time. In the process, it is clear that an emphasis on interaction, synergy, and hybridity can add much to an understanding of colonialism in Twentieth Century China based on the simple binaries of colonizer and colonized, of aggressor and victim, and of a one-way transfer of knowledge and social understanding. To provide some kind of order to the analysis, the chapters in

Unraveling Somalia Catherine Besteman, 2014-01-27 In 1991 the Somali state collapsed Once heralded as the only true nation state in Africa the Somalia of the 1990s suffered brutal internecine warfare At the same time a politically created famine caused the deaths of a half a million people and the flight of a million refugees During the civil war scholarly and popular analyses explained Somalia's disintegration as the result of ancestral hatreds played out in warfare

between various clans and subclans In Unraveling Somalia Catherine Besteman challenges this view and argues that the actual pattern of violence inflicted disproportionately on rural southerners contradicts the prevailing model of ethnic homogeneity and clan opposition She contends that the dissolution of the Somali nation state can be understood only by recognizing that over the past century and a half there emerged in Somalia a social order based on principles other than simple clan organization a social order deeply stratified on the basis of race status class region and language **The American Monthly Review of Reviews** ,1901
