Recombinant Urbanism Conceptual Modeling In Architecture Urban Design And City Theory:

Recombinant Urbanism David Grahame Shane, 2005-06-17 This book provides a simple but comprehensive framework for the emerging academic discipline of urban design from its origins in Europe and America to contemporary issues of imagery finance and marketing in an age of globalisation There is currently no contemporary textbook for urban design that includes a general history and theory of the subject Internationally urban design is more and more becoming a core subject taught in architecture schools The AIA US and the RIBA UK both require undergraduates and graduates to study the urban dimension of architectural design On a wider scale in Europe the EU is developing a common architectural curriculum which includes an urban component for under graduates The situation is similar in schools across Asia and Australia Aimed at both students and teachers this book provides a simple and accessible framework from the origins of urban design and the main techniques developed to deal with the design of fragments of cities to participatory planning processes codes imagery finance and marketing Finally it proposes an innovative vision of contemporary practice based on the work of leading actors and projects in the field This book is set to become the key textbook at undergraduate and graduate levels It is written in an accessible and direct tone and highly illustrated with many colour and black and white diagrams It includes a general history and theory of urban design and provides an up to date account of contemporary urban conditions Praise for *Recombinant Urbanism* Documents a major intellectual advance eagerly awaited by academics and practitioners all around the world should become a standard text for schools of architecture and urbanism Leon Van Schaik Innovation Professor of Architecture RMIT Australia both unique and instrumentally positive The book is the result of many years of research and writing and is a small masterpiece in urban studies It has already proved its worth in the teaching of urban studies at Columbia the AA the Bartlett School and Cooper Union to mention only a few of the universities where Dr Shane has had a powerful influence It is indeed one of the very best manuscripts I have read in the field in the last few years Anthony Vidler Professor and Dean Irwin S Chanin School of Architecture Cooper Union New York USA I can say without hesitation that I fully endorse Grahame s work the issues it covers are highly topical and such a book would indeed be widely read by architecture students urban designers and planners Colin Fournier Professor of Architecture again Shane has made important urban theories and thinking more widely available to an international student audience The legacy the book will have will be in convincing people that the design of cities matters not in the overbearing and over controlling sense of new urbanism but in reinforcing the multiple possibilities of contemporary life Brian McGrath Adjunct Associate Professor of Architecture Columbia University USA *Basics Landscape Architecture 01: Urban Design* Tim Waterman, Ed Wall, 2017-11-02 *Basics Landscape Architecture 01 Urban Design* seeks to define and describe the role played by landscape architecture in urban design an interdisciplinary practice that is concerned with defining the form of human settlements It provides a brief history and definition of urban design and the roles of the various professions involved Urban Design looks at

the elements of urban form and the importance of contextual details from the scale of the city and its region to the importance of materials The text uses case studies to explore the philosophies and methodologies of urban design and to explain the importance of urban design to landscape architecture and in turn the importance of landscape architecture to urban design Explorations in Urban Design Matthew Carmona, 2017-05-15 Whilst recognising that distinctly different traditions exist within the study and practice of urban design this book advances an interdisciplinary and innovative approach which is of direct importance to understanding the urban forms conditions practices and processes It enthuses and inspires users who are grappling with urban design research problems but who need inspiration to move from idea to methodological approach Through the work of 32 urban researchers from the arts sciences and social sciences it demonstrates a wide range of problems and approaches and shows how the diverse range of complementary approaches can come together to provide a holistic understanding to the design of cities While each of the contributors presents a particular approach to researching the field sometimes focusing centrally on particular research methodologies others cutting across methods or focusing on theory all include discussion of actual research projects to illustrate their application to real world problems This book will be valuable to everyone from the informed undergraduate student about to embark on their first dissertation to PhD students and seasoned researchers immersed in methodological and conceptual complexity and wishing to compare available and appropriate methodological paths **Urban Experience and Design** Justin B. Hollander, Ann Sussman, 2020-10-15 Embracing a biological and evolutionary perspective to explain the human experience of place Urban Experience and Design explores how cognitive science and biometric tools provide an evidence based foundation for architecture and planning Aiming to promote the creation of a healthier and happier public realm this book describes how unconscious responses to stimuli outside our conscious awareness direct our experience of the built environment and govern human behavior in our surroundings This collection contains 15 chapters including contributions from researchers in the US the UK the Netherlands France and Iran Addressing topics such as the impact of eye tracking analysis and seeing beauty and empathy within buildings Urban Experience and Design encourages us to reframe our understanding of design including the narrative of how modern architecture and planning came to be in the first place This volume invites students academics and scholars to see how cognitive science and biometric findings give us remarkable 21st century metrics for evaluating and improving designs even before they are built *Chasing the City* Joshua M Nason, Jeffrey S Nesbit, 2018-10-08 Historically many architects planners and urban designers solicit idealistic depictions of a controllable urban environment made from highly regulated geometrical organizations and systematically defined processes Rather than working as urban designers who set out to control and implant external processes we shift our approach to that of urban detectives who set out to chase the city Charged with approaching the city more responsively we investigate what we do not know allowing the city to direct our work As urban detectives we have the ability to interrogate and respond to the elaborate patterns emerging from self

generated internalized urban interactions Chasing the City asks what are the current design trends shaping how we first understand the cities of today to then produce informed decisions on the continuously undefined evolving city of tomorrow Intentionally the work here does not adhere to rudimentary notions of supposed singularities or rely upon past generations of idealistic utopian models Rather Chasing the City delineates current models of urban investigation that seek to respond to the nature of cities and develop heretofore urban strategies as concurrently negotiated future urbanism This edited volume provides a collection of innovative design research projects based on shared notions of Chasing the City through three bodies of strategic frameworks 1 Mapping 2 Resource and 3 Typology This structure ultimately allows readers as fellow urban detectives access to exploratory tools and methods of detection that accumulate from our environs both practical and projective in our chase of the city

Touching Architecture Anthony Brand, 2022-12-30 This book is about perception emotion and affect in architecture how and why we feel the way that we do and the ways in which our surroundings and bodies contribute to this Our experience of architecture is an embodied one with all our senses acting in concert as we move through time and space The book picks up where much of the critique of architectural aestheticism at the end of the twentieth century left off illustrating the limitations and potential consequences of attending to architecture as the visually biased practice which has steadily become the status quo within both industry and education It draws upon interdisciplinary research to elucidate the reasons why this is counter productive to the creation of meaningful places and to articulate the embodied richness of our touching encounters A felt phenomenology is introduced as a more than visual alternative capable of sustaining our physical emotional and psychological well being By recognising the reciprocal and participatory relationship that exists between atmospheric affect and our phenomenological bodies we begin to appreciate the manifold ways in which we touch and are touched by our built environment As such Touching Architecture will appeal to those with an interest in architectural history and theory as well as those interested in the topic of atmospheres affect and embodied perception

Smart Global Megacities T.M. Vinod Kumar, 2021-06-13 This book the second volume highlights 7 out of a total of about 36 megacities in the World which by definition have 10 million inhabitants The cities chapters presented in this book are based on recent advance such as the wide use of ICT IOT e Governance e Democracy smart economy and flattening and acceleration of the world that is taking place in recent times as reported by 3 times Pulitzer Prize Winner Thomas Friedman It therefor departs from other ideologies where only a certain megacity qualifies for the title of smart global megacities while in reality every megacity can and presents how smart global megacities can be created

The Handbook of Interior Architecture and Design Graeme Brooker, Lois Weinthal, 2013-10-24 The Handbook of Interior Architecture and Design offers a compelling collection of original essays that seek to examine the shifting role of interior architecture and interior design and their importance and meaning within the contemporary world Interior architecture and interior design are disciplines that span a complexity of ideas ranging from human behaviour and anthropology to history and the technology

of the future Approaches to designing the interior are in a constant state of flux reflecting and adapting to the changing systems of history culture and politics It is this process that allows interior design to be used as evidence for identifying patterns of consumption gender identity and social issues The Handbook of Interior Architecture and Design provides a pioneering overview of the ideas and arrangements within the two disciplines that make them such important platforms from which to study the way humans interact with the space around them Covering a wide range of thought and research the book enables the reader to investigate fully the changing face of interior architecture and interior design while offering questions about their future trajectory

Metropolitan Landscapes Antonella Contin,2021-08-24 This edited volume covers many aspects of the Metropolitan Landscapes Solutions are needed to meet the demand of the citizens of a renewed metropolitan region landscape It opens up discussions about possible toolkits for strategic actions based on understanding the territory from geographical urban architectural economic environmental and public policy perspectives This book intends to promote the Metropolitan dwelling quality ensuring human well being proposing a discussion on the resilient articulation of the interface space among the city s infrastructure agriculture and nature This book results from the Symposium Metropolitan Landscapes that MSLab of the Politecnico di Milano and ETSA Sevilla organized at the IALE 2019 Conference Milan July 2019 to manage radical territory transformation with a strategic vision The widespread growth of urban areas indicates the importance of building resilient sustainable cities capable of minimizing climate change impact production The Symposium aimed to discuss the Urban Metabolism approach considering the combination of Landscapes set in a single Metropolitan Ecosystem Accordingly new design strategies of transformation replacement or maintenance can compose Urban Rural Linkage patterns and a decalage of different landscape contexts Ecological interest in environmental sustainability compatibility and resilience is not tied exclusively to the balance between production and energy consumption Thus it is the integration over time and at several scales of the urban and rural landscapes and their inhabitants that nourish the Metropolitan Bioregion Moreover the Metropolitan Landscape Book s research hypothesis is the need for a Glossary strengthening the basis of understanding Metropolitan Landscape s complexity This book s topic is particularly relevant to Landscape Urbanism Architecture Urban disciplines Scholars Students and Practitioners who want to be connected in a significant way with Metropolitan Discipline s research field

The Emerging Public Realm of the Greater Bay Area Miodrag Mitrašinović,Timothy Jachna,2021-07-29 Through illustrated case studies and conceptual re framings this volume showcases ongoing transformations in public space and its relationship to the public realm more broadly in the world s most populous urban megaregion the Greater Bay Area of southeastern China projected to reach eighty million inhabitants by the year 2025 This book assembles diverse approaches to interrogating the forms of public space and the public realm that are emerging in the context of this region s rapid urban development in the last forty years bringing together authors from urbanism architecture planning sociology anthropology and politics to examine innovative ways of framing and

conceptualizing public space in of the Greater Bay Area The blend of authors first hand practical experiences has created a unique cross disciplinary book that employs public space to frame issues of planning political control social inclusion participation learning education and appropriation in the production of everyday urbanism In the context of the Greater Bay Area such spaces and practices also present opportunities for reconfiguring design driven urban practice beyond traditional interventions manifested by the design of physical objects and public amenities to the design of new social protocols processes infrastructures and capabilities This is a captivating new dimension of urbanism and critical urban practice and will be of interest to academics students and practitioners interested in urbanization in China **Sustainable**

a unique glance into the process of globalisation of the architectural practice during the last three decades through the lenses of innovative methodologies in architectural history based on quantitative data Focusing on the golden age of globalisation 1990 2019 it investigates the transnational work of more than one thousand architectural firms of different business models from Europe North America and the Asia Pacific in a broad sample of emerging markets Mainland China South East Asia India the Persian Gulf Sub Saharan Africa Russia and Kazakhstan and Latin America In the book different thematic geographies are presented to explore the global scope of the contemporary profession examine significant projects and the structural conditions behind them and reveal the debates that such works generated Understanding the global agency of design firms in emerging markets also becomes a way to study different market conditions modes of production and architectural trends comparatively and to highlight the shifts that occurred in the profession over the last few decades The use of quantitative methodologies produces a novel and updated narrative on contemporary architecture in emerging markets grounded in quantitative data rather than in preassumptions and purely qualitative interpretations Richly illustrated this book is further enhanced by an ample set of maps graphs and tables to visualise data better *Strategies for Landscape*

Representation Paul Cureton, 2016-12-08 *Strategies for Landscape Representation* discusses a variety of digital and analogue production techniques for the representation of landscape at multiple scales. Careful consideration is required to represent time and to ensure accuracy of representation and evaluation in the landscape. Written as a guide for making appropriate selection of a wide variety of visualisation tools for students and built environment professionals with an interest in landscape, the book charts emerging technologies and historical contexts whilst also being relevant to landscape legislation such as Building Information Modelling (BIM) and Landscape Assessment. This book is an innovation driven text that encourages readers to make connections between software technology and analogue modes. The management choice and combination of such modes can arguably narrow the unknown of landscape character, address the issues of representing time and change in landscape and engage and represent communities' perceptions and experience of landscape. Showcasing international examples from landscape architecture, planning, urban design and architecture, artists, visualisers, geographers, scientists and model makers, the vitality of making and intrinsic value of representational work in these processes and sites is evidenced. An accompanying companion website provides access to original source files and tutorials totalling over a hundred hours in mapping and GIS diagrams and notation, photomontage, 3D modelling and 3D printing.

The Routledge Handbook of Planning Theory Michael Gunder, Ali Madanipour, Vanessa Watson, 2017-08-23 *The Routledge Handbook of Planning Theory* presents key contemporary themes in planning theory through the views of some of the most innovative thinkers in planning. They introduce and explore their own specialized areas of planning theory to conceptualize their contemporary positions and to speculate how these positions are likely to evolve and change as new challenges emerge. In a changing and often unpredictable globalized world, planning theory is core to understanding how planning and its practices both function and evolve. As illustrated in this book, planning and its many roles have changed profoundly over the recent decades, so have the theories, both critical and explanatory, about its practices, values and knowledges. In the context of these changes and to contribute to the development of planning research, this handbook identifies and introduces the cutting edge and the new emerging trajectories of contemporary planning theory. The aim is to provide the reader with key insights into not just contemporary planning thought but potential future directions of both planning theory and planning as a whole. This book is written for an international readership and includes planning theories that address or have emerged from both the global North and parts of the world beyond.

Future Cities ECAADE (Association), 2010 *Future Cities* For the first time in human history, more than 50% of the world's population lives in urban regions. Cities are the largest, most complex and most dynamic man-made systems. They are vibrant centers of cultural life and engines that drive the global economy. Contemporary cities are environmentally, socially and economically unsustainable. The quality of urban life is threatened by such factors as pollution, rising temperatures, limited resources, congestion, social inequalities, aging of large sectors of the world population, poverty, informality, crime and economic imbalances. The overall planning of future cities is a challenge that can only be faced

Handbook of Research on Urban-Rural Synergy Development Through Housing, Landscape, and Tourism Krstić-Furundžić, Aleksandra, Djukić, Aleksandra, 2019-11-29 As cities continue to grow with advancing technologies the spatial and temporal gaps between rural and urban areas are shrinking thereby requiring the sectors to interact with each other While the prospect is to develop each area without hampering the newfound synergy between them there are still many barriers and concerns that hinder this inevitable urban rural relationship The Handbook of Research on Urban Rural Synergy Development Through Housing Landscape and Tourism is a pivotal reference source that focuses on the applications and challenges of creating cooperation between urban and rural areas along various fields While highlighting topics including suburbanization weekend residence zones and homeostasis this publication is ideally designed for architects sector managers region developers urban planners urban developers construction managers urban studies professionals academicians researchers and students seeking current research on lessening the urban rural gap in both global and local contexts

Emergent Spatio-temporal Dimensions of the City Fabian Neuhaus, 2015-01-05 This book focuses on the creation of space as an activity The argument draws not only on aspects of movement in time but also on a cultural and specifically social context influencing the creation of the spatial habitus The book reconsiders existing theories of time and space in the field of urban planning and develops an updated account of spatial activity experience and space making Recent developments in spatial practice specifically related to new technologies make this an important and timely task Integrating spatial temporal dynamics into the way we think about cities aids the implementation of sustainable forms of urban planning The study is composed of two different case studies One case is based on fieldwork tracking individual movement using GPS the other case utilises data mined from Twitter One of the key elements in the conclusion to this book is the definition of temporality as a status rather than a transition It is argued that through repetitive practices as habitus time has presence and agency in our everyday lives This book is based on the work undertaken for a PhD at the Centre for Advanced Spatial Analysis and was and accepted as thesis by University College London in 2013

Shopping Malls and Public Space in Modern China Nicholas Jewell, 2016-03-03 China's rise as an economic superpower has been inescapable Statistical hyperbole has been accompanied by a plethora of highly publicized architectural forms that brand the regeneration of its increasingly globalized urban centres Despite the sizeable body of literature that has accompanied China's modernization the essence and trajectory of its contemporary cityscape remains difficult to grasp This volume addresses a less explored aspect of China's urban rejuvenation the prominence of the shopping

mall as a keystone of its public spaces Here the presence of the built form most representative of Western capitalism's excess is one that makes explicit the tensions between China's Communist state and its ascent within the free market This book examines how these interrelationships are manifested in the culturally hybrid built form of the shopping mall and its role in contesting the public space of the modern Chinese city By viewing these interrelationships as collisions of global and local narratives a more nuanced understanding of the shopping mall typology is explored Much architectural criticism has failed to address the levels of meaning implicit within the shopping mall yet it is a building type whose public popularity has guaranteed its endurance Consequently if architecture is to remain a relevant social art a more holistic understanding of this phenomenon will be indispensable to the process of adapting to globalizing forces This examination of Chinese shopping malls offers a timely and relevant case study of what is happening in all our cities today
