Studying Human Origins Raymond Corbey, Wil Roebroeks, 2001 This history of human origin studies covers a wide range of disciplines

This important new study analyses a number of key episodes from palaeolithic archaeology palaeoanthropology primatology and evolutionary theory in terms of various ideas on how one should go about such reconstructions and what if any the uses of such historiographical exercises can be for current research in these disciplines Their carefully argued point is that studying the history of palaeoanthropological thinking about the past can enhance the quality of current research on human origins The main issues in the present volume are the uses of disciplinary history in terms of present day research concerns the relative weight of cultural and other external contexts and continuity and change in theoretical perspectives The book's overall approach is an epistemological one It does not in other words primarily address anthropological data as such but our ways of handling such data in terms of our most fundamental but usually quite implicit theoretical presuppositions

Primate Behavior and Human Origins Glenn King, 2015-10-30 This comprehensive introduction demonstrates the theoretical perspectives and concepts that are applied to primate behavior and explores the relevance of non human primates to understanding human behavior Using a streamlined and student friendly taxonomic framework King provides a thorough overview of the primate order The chapters cover common features and diversity and touch on ecology sociality life history and cognition Text boxes are included throughout the discussion featuring additional topics and more sophisticated taxonomy The book contains a wealth of illustrations and further resources to support teaching and learning are available via a companion website Written in an engaging and approachable style this is an invaluable resource for students of primate behavior as well as human evolution

Human Evolution Source Book Russell L. Ciochon, John G. Fleagle, 2016-12-05 For Junior Senior and Graduate courses in Human Evolution taught in anthropology and biology departments This book is the most comprehensive collection of cutting edge articles on human evolution Designed for use by students in anthropology paleontology and evolutionary biology this edited volume brings together the major ideas and publications on human evolution of the past three decades The book spans the entire scope of human evolution with particular emphasis on the fossil record including archaeological studies

Processes in Human Evolution Francisco José Ayala, Camilo José Cela Conde, 2017 The discoveries of the last decade have brought about a completely revised understanding of human evolution due to the recent advances in genetics palaeontology ecology archaeology geography and climate science Written by two leading authorities in the fields of physical anthropology and molecular evolution *Processes in Human Evolution* presents a reconsidered overview of hominid evolution synthesising data and approaches from a range of inter disciplinary fields The authors pay particular attention to population migrations since these are crucial in understanding the origin and dispersion of the different genera and species in each continent and to the emergence of the lithic cultures and their impact on the evolution of cognitive capacities *Processes in Human Evolution* is intended as a primary textbook for university courses on human evolution and may also be used as supplementary reading in advanced undergraduate and graduate courses It is also suitable for a more general audience seeking a readable but up to date and inclusive treatment of human origins and

evolution *Human Evolution* Roger Lewin, 2009-02-18 The brief length and focused coverage of *Human Evolution An Illustrated Introduction* have made this best selling textbook the ideal complement to any biology or anthropology course in which human evolution is taught The text places human evolution in the context of humans as animals while also showing the physical context of human evolution including climate change and the impact of extinctions Chapter introductions numerous drawings and photographs and an essential glossary all add to the accessibility of this text The fifth edition has been thoroughly updated to include coverage of the latest discoveries and perspectives including New early hominid fossils from Africa and Georgia and their implications New archaeological evidence from Africa on the origin of modern humans Updated coverage of prehistoric art including new sites New perspectives on molecular evidence and their implications for human population history An Instructor manual CD ROM for this title is available Please contact our Higher Education team at HigherEducation wiley com for more information **Human Evolution and the Origins of Hierarchies** Benoît Dubreuil, 2010-09-06 In this book Beno t Dubreuil explores the creation and destruction of hierarchies in human evolution Combining the methods of archaeology anthropology cognitive neuroscience and primatology he offers a natural history of hierarchies from the point of view of both cultural and biological evolution This volume explains why dominance hierarchies typical of primate societies disappeared in the human lineage and why the emergence of large scale societies during the Neolithic period implied increased social differentiation the creation of status hierarchies and eventually political centralisation **Human Evolution** John H. Langdon, 2023-01-01 This is an introductory textbook for the study of human evolution and covers all major topics of human origins taught under paleoanthropology anthropology archaeology and evolutionary biology courses This book differs from the existing selection of textbooks in the following ways It incorporates the most recent fossil discoveries and interpretations It balances the discussion between descriptions of fossils and interpretations of behavior of hominins in different time periods It includes current findings of genomics into understanding the more recent stages of human evolution This important subdiscipline is badly underserved by current texts It consistently addresses the relationship of evidence to our current hypotheses and interpretations The book has an engaging and lucid style suitable for those entering the field Students will find ample case studies illustrations and examples helpful in understanding difficult concepts Tables timelines and maps in every chapter include data summaries and key points The book highlights peripheral points and background concepts in side boxes for easy reference and lists key ideas at the end of each chapter This up to date and easy to read text is suitable for both classroom study and self learning Time Maps Eviatar Zerubavel, 2003-05-15 *Time Maps* extends beyond all of the old clich s about linear circular and spiral patterns of historical process and provides us with models of the actual legends used to map history It is a brilliant and elegant exercise in model building that provides new insights into some of the old questions about philosophy of history historical narrative and what is called straight history Hayden White University of California Santa Cruz Who were the first people to inhabit North America

Does the West Bank belong to the Arabs or the Jews Why are racists so obsessed with origins Is a seventh cousin still a cousin Why do some societies name their children after dead ancestors As Eviatar Zerubavel demonstrates in *Time Maps* we cannot answer burning questions such as these without a deeper understanding of how we envision the past In a pioneering attempt to map the structure of our collective memory Zerubavel considers the cognitive patterns we use to organize the past in our minds and the mental strategies that help us string together unrelated events into coherent and meaningful narratives as well as the social grammar of battles over conflicting interpretations of history Drawing on fascinating examples that range from Hiroshima to the Holocaust from Columbus to Lucy and from ancient Egypt to the former Yugoslavia Zerubavel shows how we construct historical origins how we tie discontinuous events together into stories how we link families and entire nations through genealogies and how we separate distinct historical periods from one another through watersheds such as the invention of fire or the fall of the Berlin Wall Most people think the Roman Empire ended in 476 even though it lasted another 977 years in Byzantium Challenging such conventional wisdom *Time Maps* will be must reading for anyone interested in how the history of our world takes shape

Burn Herman Pontzer PhD, 2022-04-19 One of the foremost researchers in human metabolism reveals surprising new science behind food and exercise We burn 2 000 calories a day And if we exercise and cut carbs we ll lose more weight Right Wrong In this paradigm shifting book Herman Pontzer reveals for the first time how human metabolism really works so that we can finally manage our weight and improve our health Pontzer s groundbreaking studies with hunter gatherer tribes show how exercise doesn t increase our metabolism Instead we burn calories within a very narrow range nearly 3 000 calories per day no matter our activity level This was a brilliant evolutionary strategy to survive in times of famine Now it seems to doom us to obesity The good news is we can lose weight but we need to cut calories Refuting such weight loss hype as paleo keto anti gluten anti grain and even vegan Pontzer discusses how all diets succeed or fail For shedding pounds a calorie is a calorie At the same time we must exercise to keep our body systems and signals functioning optimally even if it won t make us thinner Hunter gatherers like the Hadza move about five hours a day and remain remarkably healthy into old age But elite athletes can push the body too far burning calories faster than their bodies can take them in It may be that the most spectacular athletic feats are the result not just of great training but of an astonishingly efficient digestive system Revealing irreverent and always entertaining Pontzer has written a book that will change how you eat move and live

Home John S Allen, 2015-12-29 A leading anthropologist studies the science behind feeling at home to show us how home made us human Home is where the heart is Security comfort even love are all feelings that are centered on the humble abode But what if there is more to the feeling of being at home Neuroanthropologist John S Allen believes that the human habitat is one of the most important products of human cognitive technological and cultural evolution over the past two million years In *Home* Allen argues that to feel at home is more than just an expression but reflects a deep seated cognitive basis for the human desire to have use and enjoy a place of one s own Allen addresses the

very basic question How did a place to sleep become a home Within human evolution he ranks house and home as a signature development of our species as it emerged alongside cooperative hunting language and other critical aspects of humanity Many animals burrow making permanent home bases but primates generally speaking do not most wander making nests at night wherever they might find themselves This is often in home territory but it isn't quite home Our hominid ancestors were wanderers too so how did we over the past several million years find our way home To tell that story Allen will take us through evolutionary anthropology neuroscience the study of emotion and modern sociology He examines the home from the inside of our heads out homes are built with our brains as much as with our hands and tools Allen argues that the thing that may have been most critical in our evolution is not the physical aspect of a home but developing a feeling of defining creating and being in a home whatever its physical form The result was an environment relatively secure against whatever horrors lurked outside that enabled the expensive but creative human mind to reach its full flowering Today with the threat of homelessness child foster care and foreclosure this idea of having a home is more powerful than ever In a clear and accessible writing style Allen sheds light on the deep cognitive sources of the pleasures of having a home the evolution of those behaviors and why they matter Home is the story about how humans evolved to create a space not only for shelter but also for nurturing creativity innovation and culture and why feeling at home is a fundamental aspect of the human condition

Human Origins, 2011 Describes how mapping the human genome has aided paleoanthropologists in their study of ancient bones used to explore human origins from the earliest humans bipedal apes up to Martin Pickford's Millennium Man

The Social Origins of Language Danny Dor, Chris Knight, Jerome Lewis, 2014 This book presents a new perspective on the origins of language and highlights the key role of social and cultural dynamics in driving language evolution It considers among other questions the role of gesture in communication mimesis play dance and song in extant hunter gatherer communities and the time frame for language evolution

Africa from MIS 6-2 Sacha C. Jones, Brian A. Stewart, 2016-03-04 Bringing together archaeological paleoenvironmental paleontological and genetic data this book makes a first attempt to reconstruct African population histories from our species evolution to the Holocene Africa during Marine Isotope Stages MIS 6 to 2 190 12 000 years ago witnessed the biological development and behavioral florescence of our species Modern human population dynamics which involved multiple population expansions dispersals contractions and extinctions played a central role in our species evolutionary trajectory So far the demographic processes modern human population sizes distributions and movements that occurred within Africa during this critical period have been consistently under addressed The authors of this volume aim at 1 examining the impact of this glacial interglacial glacial cycle on human group sizes movements and distributions throughout Africa 2 investigating the macro and micro evolutionary processes underpinning our species anatomical and behavioral evolution and 3 setting an agenda whereby Africa can benefit from and eventually contribute to the increasingly sophisticated theoretical and methodological palaeodemographic frameworks

developed on other continents **Marriage, a History** Stephanie Coontz, 2006-02-28 Just when the clamor over traditional marriage couldn't get any louder along comes this groundbreaking book to ask What tradition In Marriage a History historian and marriage expert Stephanie Coontz takes readers from the marital intrigues of ancient Babylon to the torments of Victorian lovers to demonstrate how recent the idea of marrying for love is and how absurd it would have seemed to most of our ancestors It was when marriage moved into the emotional sphere in the nineteenth century she argues that it suffered as an institution just as it began to thrive as a personal relationship This enlightening and hugely entertaining book brings intelligence perspective and wit to today's marital debate *The Rough Guide to Evolution* Mark Pallen, Rough Guides, 2011-09-01 Have you ever wondered what Charles Darwin would have had on his iPod Or exactly how Cartman from South Park fits into the Theory of Evolution The Rough Guide to Evolution delves into all of this and more from the life and works of the eminent scientist to the impact of evolutionary thinking on modern times Read about the evolutionary history of life on Earth the stark evidence for evolution including feathered dinosaurs and how Darwin's breakthrough is still denied by creationists who have repeatedly tried to ban evolution from the classroom Providing a complete and authoritative overview of one of the most controversial topics of our age the guide is an accessible one stop shop for all things Darwinian while listing resources for those keen to dig deeper into our murky beginnings Find out exactly how Charles Darwin and The Origin of Species have affected human life in the 150 years since its publication everything from Darwinian tourism to the evolution of The Simpsons as well as some new angles that make The Rough Guide to Evolution a must have for die hard Darwin fans Rediscover Darwin's earth shattering explanation for the diversity of life with The Rough Guide to Evolution

resin transfer molding process an overview sciencedirect - Jan 08 2023

web resin transfer molding process the resin transfer molding rtm process is a closed technique where the dry reinforcement is preshaped and oriented in the backbone of the real part known as the preform and which is inserted into a matched die mold

revisiting the fundamentals of light resin transfer molding lrtm - Jun 13 2023

web aug 19 2020 like other closed molding composites processes light resin transfer molding lrtm offers reduced waste and emissions efficient materials use and a consistent and repeatable process but lrtm requires less costly tooling and can still provide excellent cosmetics on both sides of a part in an efficient manufacturing process

resin transfer molding rtm for fpr composites mfg - Jan 28 2022

web resin transfer molding rtm rtm is a vacuum assisted resin transfer process with a flexible solid counter tool for the b side surface compression this process yields increased laminate compression a high glass to resin ratio and outstanding strength to

resin transfer molding rtm 370 resin for high temperature - Apr 30 2022

web overview innovators at nasa s glenn research center have developed a resin transfer molding rtm imide resin known as rtm370 that is generated using a revolutionary solvent free process its many desirable properties earned it a

resin transfer molding an overview sciencedirect topics - May 12 2023

web resin transfer molding rtm is a liquid injection molding process that utilizes liquid resin injection under pressure through

either a stack of dry fiber layers or a dry fiber preform placed in a closed mold cavity from materials design and manufacturing for lightweight vehicles 2010 view all topics add to mendeley about this page

resin transfer molding process fundamentals numerical computation - Oct 05 2022

web jan 1 2012 resin transfer molding rtm is one of the most widely known composite manufacturing technique of the liquid molding family being extensively studied and used to obtain advanced composite materials comprised

resin transfer molding rtm compositesworld - Feb 09 2023

web camx 2023 the composites one and closed mold alliance demo zone returns with short but engaging exhibitions featuring vacuum infusion reusable bag molding light rtm and other technologies through the show

resin transfer molding process rtm rtm composites - Jul 14 2023

web resin transfer molding rtm is a closed molding process capable of high quality two sided finishes molded at moderate to high production volumes

resin transfer molding closed molding compositeslab - Mar 30 2022

web resin transfer molding rtm is an intermediate volume molding process for producing composites in rtm resin is injected under pressure into a mold cavity this process produces parts with two finished surfaces

resin transfer molding rtm in polymer matrix composites - Jun 01 2022

web jan 1 2012 the resin transfer molding rtm process was adopted for composite manufacturing for high volume production net shape structural parts using low viscosity thermoset resins and continuous fibers this chapter discusses how to overcome the challenges of rtm which has led to many variations that have sprung over the last two

resin transfer molding rtm structures rtm tool design co - Feb 26 2022

web resin transfer molding is a process whereby a composite preform is inserted into a matched metal mold and liquid resin is injected into the tool hydrostatic pressure is used to consolidate the preform this process can provide excellent dimensional control of composite structures another feature of rtm is the ability to co cure foam metallic

resin transfer moulding wikipedia - Apr 11 2023

web resin transfer moulding rtm is a process for producing high performance composite components procedure it is a process using a rigid two sided mould set that forms both surfaces of the panel usually the mould is formed from aluminum or steel but sometimes composite molds are used the two sides fit together to make a mould cavity

resin transfer molding springerlink - Jul 02 2022

web abstract resin transfer molding rtm is a closed mold process in which matched male and female molds preplaced with fiber preform are clamped to form composite components resin mix is transferred into the cavity through injection ports at

transfer molding wikipedia - Mar 10 2023

web resin transfer molding rtm uses a liquid thermoset resin to saturate a fiber preform placed in a closed mold the process is versatile and can fabricate products with embedded objects such as foam cores or other components in addition to the fiber preform 3 vacuum assisted resin transfer molding

rtm resins resin transfer molding toray advanced composites - Nov 06 2022

web the resin transfer molding process rtm involves injecting a low viscosity resin into a dry fiber pre form in a closed molding process once optimized this rtm process can provide very repeatable high quality part fabrication

compression resin transfer molding an overview sciencedirect - Dec 27 2021

web various resin transfer molding rtm methods a low pressure rtm b high pressure rtm c compression rtm high pressure rtm is a modification of standard rtm to reduce impregnation time by using high pressure up to 150 bar which reduces the rtm cycle time for most automotive components to 10 min

light resin transfer molding compositesworld - Aug 03 2022

web light resin transfer molding or light rtm is a process by which composite products are manufactured using a closed mold system the closed mold consists of an a side mold base mold and a semi rigid b side mold counter mold that is sealed to the a side mold using vacuum pressure resin is drawn into the resulting cavity

a review of thermoplastic resin transfer molding process - Sep 04 2022

web sep 24 2019 one of the fastest techniques to process pa 6 into advanced composites is thermoplastic resin transfer molding t rtm although nowadays t rtm is close to commercial application its optimization and control need further research and development mainly assisted by modeling this review summarizes recent progress in the modeling of

resin transfer molding an overview sciencedirect topics - Aug 15 2023

web resin transfer molding rtm is an intermediate molding process where the resin is injected under pressure into a mold cavity creating parts of two finished surfaces this method comprises numerous varieties and modifications which differ in the method of how the resin is introduced to the reinforcement in the mold cavity

a review of thermoplastic resin transfer molding process modeling - Dec 07 2022

web sep 24 2019 a solution could be reactive thermoplastics such as pa 6 which is synthesized from the ϵ caprolactam ϵ cl monomer via anionic ring opening polymerization arop one of the fastest techniques to process pa 6 into advanced composites is thermoplastic resin transfer molding t rtm
