**The Evolution of Modern Humans in Africa** Pamela R. Willoughby, 2006-12-28 Pamela Willoughby provides a wide ranging synthesis of current knowledge about the evolution of fully modern humans in Africa during the Middle Palaeolithic Middle Stone Age According to most scholars our modern ancestors first emerged in Africa and then spread throughout the habitable world Willoughby brings evidence from mitochondrial DNA ancient fossils and archaeological remains including her own research in Tanzania to bear on questions regarding the place of human species in nature the specific origins of Homo Sapiens and the dispersal of these modern humans throughout Africa and around the globe She confronts straightforwardly the problems of dating the earliest modern humans and she discusses the various alternative models of modern human origins which will be debated for years to come The Evolution of Modern Humans in Africa is a compelling thought provoking book for both students and scholars

Ecosystem Crises Interactions Merrill Singer, 2021-03-11 Explores the human impacts on environment that lead to serious ecological crises an innovative resource for students professionals and researchers alike Ecosystem Crises Interaction Human Health and the Changing Environment provides a timely and innovative framework for understanding how negative human activity impacts the environment and how seemingly disparate factors connect to and magnify hazardous consequences under a changing climate Presenting a coherent holistic perspective to the subject this compelling textbook and reference examines the diverse often unexpected links that connect our complex world in context of global climate change The text illustrates how eco crisis interaction the synergistic interface of two or more environmental events or pollutants can multiply to produce harmful health effects that are greater than their additive impact This concept is highlighted through numerous real and relatable examples from the use of sediment rock in hydraulic and drinking water filtration systems to the connections between human development and crises such as deforestation emergent infectious diseases and global food insecurity Throughout the text specific examples present opportunities to consider broader questions about the extinction of species populations and ways of life Presenting a balanced investigation of the interaction of

contemporary ecological dangers human behavior and health this unique resource Explores how complex interactions between global warming and anthropogenic impairments magnify the diverse ecological perils and threats facing humans and other species Discusses roadblocks to addressing environmental risk such as global elite polluters the organized denial of climate change and deliberate environmental disruption for financial gain Describes how the production and use of fossil fuels are driving a significant rise in carbon dioxide and other pollutants in the atmosphere and in the oceans Illustrates how industrial production is contributing to an array of environmental crises including fuel spills waste leakages and loss of biodiversity Examines the critical ecosystems that are at risk from interacting stressors of human origin Ecosystem Crises Interaction Human Health and the Changing Environment is an ideal textbook for advanced undergraduate and graduate students in courses including public and allied health environmental studies medical ecology medical anthropology and geo health and a valuable reference for researchers practitioners and policy makers in fields such as environmental health global and planetary health public health climate change and medical social science The Oxford Handbook of Evolution, Biology, and Society Rosemary Lynn Hopcroft, 2018 This book contains an overview of research on the interaction of biological and sociological processes Issues explored include the origins of social solidarity religious beliefs sex differences gender inequality human happiness social stratification and inequality identity status and other group processes race ethnicity and discrimination fertility and family processes crime and deviance cultural and social change **Maximize Your Metabolism** Noel Maclaren, Sunita Singh Maclaren, 2021-04-13 From an award winning endocrinology pioneer and metabolism expert comes a revolutionary sustainable and scientific approach to help you lose weight regain energy clear your mind and prevent disease Each of us fits into one of five different body types based on our bodies level of insulin resistance the book includes an easy self assessment quiz for readers to identify their type Maximize Your Metabolism offers unique diet and exercises plans tailored for each of the five different body types as well as core recommendations that every type should follow including A low carb diet rich in vegetables with modest portions of meat eggs cheese plain Greek yogurt and low sugar fruits such as Granny Smith apples berries and green crunchy pears Avoiding healthy foods that are actually hurting you quinoa is a simple carbohydrate you should substitute with cauliflower rice agave is actually worse for your metabolism than sugar and probiotics are overrated instead choose prebiotics such as artichokes leaks and onions Sleep 6 8 hours per night and recommended testing for sleep apnea Exercise 3 times per week as vigorous as you can for as long as you can This book is based on the extraordinary successful program that Dr Maclaren has prescribed to thousands of patients with great success Filled with specific guidance and over 30 delicious recipes Maximize Your Metabolism is the perfect diet for readers who want to lose weight and love their lives every step of the way **Ancestral Diets and Nutrition** Christopher Cumo, 2020-11-19 Ancestral Diets and Nutrition supplies dietary advice based on the study of prehuman and human populations worldwide over the last two million years This thorough accessible book uses prehistory and history as a

**12,000 BC** Jerry Kroth, 2024-10-01 Professor Jerry Kroth s book 12 000 BC Two Extinction Level Events We Know Nothing About explores the often popularized ancient apocalypse narratives so frequently depicted on Netflix and YouTube Kroth s approach however is systematic in that it examines the science behind these controversies without tiptoeing into fringe or conspiracy literature to establish its credentials For example mainstream archeology alleges the ice age came to its conclusion in a gradual manner while the spread of Homo sapiens throughout the world resulted in the extinction of 35 species of megafauna mainly as a result of humans hunting down large animals Woolly Mammoths Mastodons Giant Sloths and others went extinct because of this hunter overkill hypothesis so says the mainstream A counter argument to this view is that two major cosmic cataclysms occurred first a Miyake solar storm that caused radiocarbon levels to rise across the planet This occurred 14 300 years ago It was one of the largest solar storms ever to hit the planet far greater than the Carrington Event of 1859 and it caused massive melting of the ice caps and flooding incineration of vegetation fused rocks etc Dr Kroth presents a great deal of experimental data to support this theory backed up by interviews with scientists from around the world and not from anthropology or archeology at all but from solar physicists and other physical scientists A rapid increase in global temperatures resulted but as a result of the soot rising from the cataclysm global temperatures again fell precipitously eventually ushering in the Younger Dryas a period of unstable rising and falling global temperatures Then 12 300 years ago a second cataclysmic event happened A giant comet fragmented over the Northern Hemisphere destroying Lake Agassiz and causing massive flooding across America It similarly exacerbated the extinctions that were taking place The physical evidence nanodiamonds fused rocks radiocarbon levels in fossilized tree rings all point to the reality of these planetary shocks In Part II of 12 000 BC Dr Kroth examines the impact these events had on humanity Besides wiping out the Clovis people of North America recent DNA studies show that the human race also experienced a precipitous decline at this time Kroth then takes up issues of antediluvian human societies and looks at the evidence supporting the presence of advanced human societies before these cataclysms happened Gobelki Tepe Atlantis the

Yonaguni Monuments Gulating Padang His conclusion from a review of this literature in contradiction to Graham Hancock's position is that advanced human societies did not in fact exist Stone Age peoples yes but some advanced mathematically sophisticated antediluvian culture does not succeed in passing through Kroth's filter The evidence is just not there Perhaps if Atlantis one day is discovered this theory will be revised but as it stands the earliest sophisticated and advanced human culture still remains that of Sumeria of only 6 000 years ago Part III of the text presents a uniquely controversial hypothesis to explain the rapid and exponential rise of human society In a mere 6 000 years human culture and technology developed so rapidly that conventional evolutionary biology and mainstream anthropology have enormous difficulty trying to explain how that all happened Why did it take Homo sapiens 196 500 years to invent a wheel Why was it 194 600 years before he got the idea of cultivating potatoes Kroth provides a provocative explanation for these anomalies and vicissitudes of human cultural advance

*Aliens and Man* Jerome A. Kroth, 2010 When it comes to extraterrestrials UFOs crop circles and ancient astronaut literature most intelligent readers are repulsed by New Age hype turned off by Erik Van Daniken flustered by blatant pseudo science and deeply chagrined at how even the History Channel got dragged into the tabloid and sensational Yet many intelligent open minded readers harbor secret interests in the Great Pyramid and how it was built in mythic tales of sky gods coming and going from Ezekiel to the Rig Veda They are awed by the intricate fractals in crop circles and they more than take notice when a NASA astronaut says he was trailed in space by UFOs That questioning readership however swims in a vast sea of agnosticism curious but not convinced And there just aren't any books for them None they can trust None that reaches them None that transcends tabloid fantasies to authentically treat issues with enough dispassion and scholarly erudition not to insult their intelligence Here Dr Kroth gives the run down on a wide range of evidence and ponders how reliable any of it may be Readers are left with all the elements to form their own equation

**The Riddled Chain** Jeffrey Kevin McKee, 2000 Had any link in the evolutionary chain of events been slightly different then our species would not be as it is today or our ancestors may not have survived at all BOOK JACKET

**Reflections of Our Past** John H. Relethford, Deborah A. Bolnick, 2018-03-26 The rise of the multi billion dollar ancestry testing industry points to one immutable truth about us as human beings we want to know where we come from and who our ancestors were John H Relethford and Deborah A Bolnick explore this topic and many more in this second edition of Reflections of Our Past Where did modern humans come from and how important are the biological differences among us Are we descended from Neandertals How should we understand the connections between genetic ancestry race and identity Were Native Americans the first to inhabit the Americas Can we see evidence of the Viking invasions of Ireland a millennium ago even in the Irish of today Through engaging examination of issues such as these and using non technical language Reflections of Our Past shows how anthropologists use genetic information to suggest answers to fundamental questions about human history By looking at genetic variation in the world today and in the past we can reconstruct the recent and remote events and processes that have created the variation we see providing a fascinating reflection of our genetic past

**Émile Durkheim and the Birth of the Gods** Alexandra Maryanski, 2018-06-18 The Birth of the Gods is dedicated to Durkheim s effort to understand the basis of social integration Unlike most social scientists then and now Durkheim concluded that humans are naturally more individualistic than collectivistic that the primal social unit for humans is the macro level unit the horde rather than the family and that social cohesion is easily disrupted by human self interest Hence for Durkheim one of the gravest problems facing sociology is how to mold these human proclivities to serve the collective good The analysis of elementary religions Durkheim believed would allow social scientists to see the fundamental basis of solidarity in human societies built around collective representations totems marking sacred forces and emotion arousing rituals directed at these totems The first half of the book traces the key influences and events that led Durkheim to embrace such novel generalizations The second part makes a significant contribution to sociological theory with an analysis that essentially tests Durkheim s core assumptions using cladistic analysis social network tools and theory and data on humans closest living relatives the great apes Maryanski marshals hard data from primatology paleontology archaeology genetics and neuroscience that enlightens and surprisingly confirms many of Durkheim s speculations These data show that integration among both humans and great apes is not so much group or kin oriented per se but orientation to a community standing outside each individual that includes a sense of self but also encompassing a cognitive awareness of a sense of community or a connectedness that transcends sensory reality and concrete social relations This community complex as Maryanski terms it is what Durkheim was beginning to see although he did not have the data to buttress his arguments as Maryanski is able to do
