*Reconstruction in Psychoanalysis* Harold P. Blum, 1994      On Freud's Constructions in Analysis Sergio

Lewkowicz, Thierry Bokanowski, Georges Pragier, 2020-06-16 In *Constructions in Analysis* Freud introduces the notion of constructions different from interpretation and considers it necessary under certain conditions to reconstruct a part of the infantile history of the subject The difference between construction and reconstruction as well as which should be the limit of the intervention of the analyst in order to avoid a proposal far removed from the patient discourse are a part of present debates on this subject The editors together with the contributors to this volume accepted the challenge to consider Freudian ideas and its implications nowadays

**The Processes of Defense** Joseph Fernando, 2009-12-28 Joseph Fernando provides the first in depth exploration and up to date revision of the psychoanalytic theory of defenses since Anna Freud's 1936 classic *The Ego and the Mechanisms of Defense* The workings of three basic forms of defense repression denial and post traumatic defenses are clearly described and illustrated with examples from Dr Fernando's clinical practice and new concepts including the zero process contrast defenses and compound defenses are introduced Book Jacket

**Plurality and Perspective in Psychoanalysis** Adam Rosen-Carole, 2013-02-28 Psychoanalysis is a historical discourse of suffering and healing under conditions of modernity rather than a metaphysical discourse of universal truth and must be so due to the ontological indeterminacy of psychic life Demonstrating this proceeds through the substantiation of two primary theses First pluralism in psychoanalysis thus the perspectival character of psychoanalytic knowing is irreducible Second psychic life is partially pliable to interpretive constitution rather than a self subsistent object domain fully available to third personal objective description Together these theses provide the framework for a radical rethinking of the authority of psychoanalytic knowledge and practice and of the nature of psychoanalytic claims to objectivity Psychoanalytic interpretations are best understood as existentially interrogative they test who and how one might be and if successful to some extent identity formative The validity conditions of psychoanalytic knowledge thus concern the creation discovery of satisfactory forms of practice orienting self narration rather than those regularly operative in the natural sciences However an adequate assessment of psychoanalytic claims requires that the claims of science are given due consideration and the impediments to practice orienting self narration under conditions of late modernity are acknowledged

**Group Analysis for Refugees Experiencing Trauma** Aida Alayarian, 2023-08-09 In this prescient and sensitive volume Aida Alayarian looks at how psychoanalysis in group settings can benefit refugees who have experienced trauma with an express focus on transference and countertransference *Group Analysis for Refugees Experiencing Trauma* offers a comprehensive overview of trauma from a psychoanalytic perspective before delving into the nuance of trauma experienced by asylum seekers refugees and those who have gone through forced migration Through clinical vignettes Alayarian highlights the importance of the resilience that can be brought about from group sessions and shared experience in helping to heal the wounds of trauma She looks at the

vital role of social injustice in this trauma and shows how this can be directly applied to work with other groups experiencing human rights violations destitution and loss She shows how looking at relational patterns as a means of understanding conscious unconscious and subconscious thought processes can provide essential breakthroughs with patients as well as the importance of paying close attention to countertransference to avoid a breakdown of the clinical relationship Using psychoanalytic theories from intercultural perspectives to show the multidimensional nature of work with trauma patients this book is essential reading for psychoanalysts psychologists psychiatrists and other mental health experts working with refugees and patients experiencing trauma      *The Psychoanalytic Theory of Neurosis* Otto Fenichel, 2014-04-23 Seminal text for psychoanalysts A special edition to coincide with the 50th anniversary of the first publication of this classic text with a new introduction and epilogue Excellent sales for previous edition life sales 3 740 Introduction by Leo Rangell former president of the International Psycho analytic Association      **Psychoanalysis, collective traumas and memory places** Robert D Hinshelwood, et al., 2015-12-05 Psychoanalysis has always had to reckon with the epistemology of the witnessing of the analysand but perhaps it has only recently been reckoning with the discourse of the ethics of testimony Here I am is the answer addressed to those who call on us to testify And who are the people who have answered with a Here I am in this book dedicated to the places of the memory of Mediterranean civilisations and their discontents The reference to the work of the same name by Freud 1929 is clear here but what many of the authors and of the essays in it seem to have in common is the attention to the traumatic nature of certain places of the memory theatres of wars such as the wars in the Balkans at the centre of the contribution by N Janigro lines in the diary of a father who miraculously survived genocide that a daughter essayist J Altounian wrenches from oblivion or even non places of a memory in which the witnesses survivors are the many refugees who have fled their homelands As Bohleber writes psychoanalysis began as a theory of trauma In this book the places of the memory are often the rooms of analysis places of re evocation of collective traumas which have not always taken place historically along the shores of the Mediterranean Sea In some cases the victims of collective traumas undergone in the home Mediterranean countries take their dramas of migrants and refugees to analysts in the North of Europe as in the case of Varvin and Papadopoulos In other pieces neither the geographical origin of the analysand nor that of the analyst have apparently any connection with the Mediterranean We are referring to the essay by M Ritter and that of Halberstadt Freud however in them the consulting rooms are places of the memory in which the analyst reflects on the subject of trans generational transmission of collective guilt connected with Nazism and with the Shoah which also affected the history of Mediterranean countries In other contributions in this book the places of the memory are those of the Middle East caught up in the Israeli Palestinian conflict From different points of view three authors Y Gampel J Deutsch and H J Wirth speak to us of places of the memory where the collective traumas have not been assigned once and for all to the work of historians as in the case of the Shoah and of the other genocides of the 20th century as unfortunately they are still on going      Attachment
