Revolution In Military Affairs Implications For Canada And Nato:

Revolution in Military Affairs Elinor C. Sloan, 2002-04-18 Although the RMA has been the subject of much discussion in the United States for over a decade it has not received the same level of analytic attention in Canada and other NATO and allied countries Sloan examines the RMA in the context of Canada Australia France Germany and the United Kingdom in addition to assessing the transformation efforts of the United States Military She concludes that small and medium military powers such as Canada must at a minimum take selected concrete measures to maximize their military capabilities through the RMA if they are to avoid operational and political marginalisation in the promotion of international peace and security

The Revolution in Military Affairs Elinor Camille Sloan, 2002

Reassessing the Revolution in Military Affairs

Andrew Futter, Jeffrey Collins, 2015-10-12 A generation after the First Gulf War and in the wake of a decade of counterinsurgency operations and irregular warfare this book explores how the concept of the Revolution in Military Affairs continues to shape the way modern militaries across the globe think about plan and fight wars

Revolution in Military Affairs Elinor Camille Sloan, Raoul-Dandurand Chair of Strategic and Diplomatic Studies, 2002 The campaign in Afghanistan the Gulf war and Kosovo show how advances in information technology are driving a high tech revolution in military affairs RMA This text outlines elements of the RMA and examines efforts of the US and NATO

Information and Revolutions in Military Affairs Emily O. Goldman, 2013-09-13 Like the industrial revolution before it the information technology revolution appears to be creating a new ruling class a new economy and a new society Information technology is also transforming military operations and warfare A vast literature on the revolution in military affairs or RMA cites the important indeed dominant role of information technology in enabling a new military revolution This volume challenges conventional wisdom not by claiming that information s impact on military operations is not positive or transformative but by claiming its impact is not new Previous periods of military revolution can also be characterized as information revolutions Through the close examination of six case studies of military transformation during the industrial age the contributors to this volume demonstrate how the employment of emerging information systems was critical to realizing a major boost in military effectiveness The most successful adaptations to the new environment were made by the most skillful users of information This volume draws upon the expertise of leading military historians political scientists and defense practitioners to craft a set of original essays that provide the first retrospective examination of how information affects the process of military revolution This book was previously published as a special issue of the Journal of Strategic Studies

NATO Review, 1999

Where Have All the Soldiers Gone? James J. Sheehan, 2009 An eminent historian offers a sweeping look at Europes tumultuous 20th century showing how the rejection of violence after World War II transformed a continent

Security and Defence in the Terrorist Era Elinor Camille Sloan, Université du Québec à Montréal. Centre d'études des politiques étrangères et de sécurité, Raoul-Dandurand Chair of Strategic and Diplomatic Studies, 2005 This book assesses Canadian

security and defence requirements post September 11 *Gender and Drone Warfare* Lindsay Clark,2019-06-20 This book investigates how drone warfare is deeply gendered and how this can be explored through the methodological framework of Haunting Utilising original interview data from British Reaper drone crews the book analyses the way killing by drones complicates traditional understandings of masculinity and femininity in warfare As their role does not include physical risk drone crews have been critiqued for failing to meet the masculine requirements necessary to be considered warriors and have been derided for feminising war However this book argues that drone warfare and the experiences of the crews exceeds the traditional masculine feminine binary and suggests a new approach to explore this issue The framework of Haunting presented here draws on the insights of Jacques Derrida Avery Gordon and others to highlight four key themes complex personhood in hyper visibility disturbed temporality and power as frames through which the intersection of gender and drone warfare can be examined This book argues that Haunting provides a framework for both revealing and destabilising gendered binaries of use for feminist security studies and International Relations scholars as well as shedding light on British drone warfare This book will be of interest to students of gender studies sociology war studies and critical security studies

Carnage and Connectivity David Betz,2015-11-15 Charts the evolution of military power in the digital age from conventional warfare to cyberwar and examines its implications **Towards a Francophone Community** Robin S. Gendron,2006-04-18 Using extensive archival research Gendron rebuts the argument of Quebec nationalists and scholars that the Canadian government's neglect of French Africa forced Quebec to develop its own international identity Towards a Francophone Community shows that there had been active federal interest in French African affairs since the late 1940s within the context of developments in NATO and the Cold War the vagaries of Canada's relations with France and the Quiet Revolution in Quebec The Rise of Neoliberalism in Advanced Capitalist Economies M. Howard,J.E. King,2008-06-24 In

this unique and dramatic account of the rise of neoliberalism Howard and King consider the major features of historical materialism the factors which resulted in 19th and 20th century thinkers incorrectly predicting the long term decline of the market and the prospects for a reversal of neoliberalism in the 21st century **US Foreign Policy in a Challenging World** Marco Clementi,Matteo Dian,Barbara Pisciotto,2017-07-18 This book examines how the US is dealing with the challenge of reconciling its global interests with regional dynamics and how it is able to produce and sustain order at the system level and within regional subsystems The book comprises four parts the first of which addresses global issues such as nonproliferation trade and freedom of the seas US policies in these areas are carefully analyzed considering whether and how they have been differently implemented at the regional level The remaining parts of the book focus on the US posture toward specific regions Europe the Middle East and East Asia The policies adopted by the US to confront the most relevant challenges in each region are identified and the ways in which policies in a specific region influence or are influenced by challenges in another region are explored The book is a rich source of knowledge on the nature of the balance that the US

has pursued between global and regional interests It will be of much interest to scholars to practitioners to postgraduate PhD students of international relations theory and American foreign policy and to all with an interest in the ability of the US to produce international order Rethinking the Nature of War Isabelle Duyvesteyn, Jan Angstrom, 2005 Have globalization virulent ethnic differences and globally operating insurgents fundamentally changed the nature of war in the last decade Interpretations of war as driven by politics and state rationale formulated most importantly by the 19th century practitioner Carl von Clausewitz have received strong criticism Political explanations have been said to fall short in explaining conflicts in the Balkans Africa Asia and the attacks of 11 September 2001 in the United States This book re evaluates these criticisms not only by scrutinising Clausewitz s arguments and their applicability but also by a careful reading of the criticism itself In doing so it presents empirical evidence on the basis of several case studies addressing various aspects of modern war such as the actors conduct and purposes of war *Militarizing Artificial Intelligence* Nik Hynek, Anzhelika Solovyeva, 2022-07-01 This book examines the military characteristics and potential of Artificial Intelligence AI in the new global revolution in military affairs Offering an original perspective on the utilization imagination and politics of AI in the context of military development and weapons regulation the work provides a comprehensive response to the question of how we might reflect on the AI revolution in warfare and what can be said about the ways in which this has been handled In the first part of the book AI is accommodated both theoretically and empirically in the strategic context of the Revolution in Military Affairs RMA The book offers a novel understanding of autonomous weapons as multi layered composite systems pointing to a complex non linear interplay between evolutionary and revolutionary dynamics In the second section the book provides an impartial analysis of the related politics and operations of power whereby increases in military budgets and R D of the great powers are met and countered by advocacy networks and scientists campaigning for a ban on lethal autonomous weapons As such it moves beyond popular caricatures of killer robots and points out some of the problems which result from over reliance on such imagery This book will be of much interest to students of strategic studies critical security studies arms control and disarmament science and technology studies and general International Relations **Naval War College Review** , 2003

The Palgrave Handbook of Canada in International Affairs Robert W. Murray, Paul Gecelovsky, 2021-04-29 This book argues that Canada and its international policies are at a crossroads as US hegemony is increasingly challenged and a new international order is emerging The contributors look at how Canada has been adjusting to this new environment and resetting priorities to meet its international policy objectives in a number of different fields from the alignment of domestic politics along new foreign policies to reshaping its international identity in a post Anglo order its relationship with international organizations such as the UN and NATO place among middle powers management of peace operations and defense role in G7 and G20 climate change and Arctic policy development and relations with the Global South Embracing multilateralism has been and will continue to be key to Canada s repositioning and its ability to maintain its position in this

new world order This book takes a comprehensive look at Canada's role in the world and the various political and policy variables that will impact Canada's foreign policy decisions into the future Chapter 22 is available open access under a Creative Commons Attribution 4.0 International License via link springer.com [Transformation of the Indian Armed Forces](#)

2025 A K Lal, 2012-03-01 Transformation should lie at the heart of our new approach to defense The development of transformational capabilities processes and force structures should be given strategic focus to meet the principal challenges under our defense strategy India is already faced with the necessity of transformation albeit without any documented national security guidelines or operating instructions which are legislated or have the validation of at least the Cabinet Committee on Security CCS In other words the first step would be to create a draft security strategy based on many assumptions like the foreign policy or the cumulative emerging threat scenario as appreciated by the Defence Intelligence Agency DIA This well researched book is a result of the project allotted by the USI under the Field Marshal K M Cariappa chair The book is therefore more as an idea or a theoretical construct basically to bring in more clarity to the various options available for this great transformation of the Indian military The author has deliberated upon various landmarks of transformation milestones achieved so far by the three services and given recommendations to further build upon ongoing modernization plan and shift to a higher plane of transformational activities **NATO Review**, 2000 *Gouvernance Au 21e Siècle* David M. Hayne, 2000-01-01 Eight papers call for an examination of the governance of organizations whether one probes the crises in the experience of large corporations in education in health care in science and technology systems or in military affairs
