RIMS Symposium on Software Science and Engineering II Eiichi Goto, Keijiro Araki, Taiichi Yuasa, 1986 **RIMS Symposia on Software Science and Engineering II** Eiichi Gotō, Keijirō Araki, Taiichi Yuasa, 1986 Graph-Theoretic Concepts in Computer Science Herbert Göttinger, 1988-06-08 This book reflects the scientific program of the annual workshop on Graph theoretic Concepts in Computer Science in 1987 The purpose of this conference is to be the missing link between theory and application of graphs in as many branches of computer science as a conference scheduled for three days without parallel sessions can permit So the organizers of WG 87 addressed a selected group of people with a strong interest in theory and practice The proceedings include latest results on classical graph theoretic problems including formal language theory applied to graphs and how to apply those results to practical problems e g data bases layout of graph operating systems software engineering chemistry and modelling with graphs On the Ambiguity of Erasing Morphisms Johannes C. Schneider, 2012 This book discusses a very basic and fundamental phenomenon in combinatorics on words namely the ambiguity of morphisms A morphism h is called ambiguous for a word w provided that there is another morphism g which satisfies $g(w) = h(w)$ If such another morphism does not exist h is called unambiguous for w Furthermore there are different types of restricted ambiguity which make additional demands on the other morphism g The examination of the ambiguity of morphisms is not only of intrinsic interest but due to the simplicity of the concept also shows various connections to other topics in theoretical computer science and discrete mathematics pattern languages and various other concepts as fixed points of morphisms avoidable patterns and word equations This book is the first comprehensive study of the ambiguity of erasing morphisms i e morphisms that are allowed to map symbols in the word to the empty word **PROCEEDINGS OF THE 23RD CONFERENCE ON FORMAL METHODS IN COMPUTER-AIDED DESIGN - FMCAD 2023** Alexander Nadel, Kristin Yvonne Rozier, 2023-10-13 The Conference on Formal Methods in Computer Aided Design FMCAD is an annual conference on the theory and applications of formal methods in hardware and system in academia and industry for presenting and discussing groundbreaking methods technologies theoretical results and tools for reasoning formally about computing systems FMCAD covers formal aspects of computer aided system testing *Machine Intelligence 15* Koichi Furukawa, Kōichi Furukawa, Donald Michie, Stephen Muggleton, 1999 Following on from previous volumes in the series Machine Intelligence 15 provides an overview of current areas of interest in artificial intelligence **Partial Evaluation and Automatic Program Generation** Neil D. Jones, Carsten K. Gomard, Peter Sestoft, 1993 Partial evaluation reconciles generality with efficiency by providing automatic specialization and optimization of programs This book covers the entire field of partial evaluation provides simple and complete algorithms and demonstrates that specialization can increase efficiency **RIMS Symposium on Software Science and Engineering** E. Goto, Eiichi Goto, K. Furukawa, R. Nakajima, I. Nakata, A. Yonezawa, 1983-02-14 **Algorithmic Learning Theory** Sanjay Jain, Hans Ulrich Simon, Etsuji

Tomita,2005-09-26 This book constitutes the refereed proceedings of the 16th International Conference on Algorithmic Learning Theory ALT 2005 held in Singapore in October 2005 The 30 revised full papers presented together with 5 invited papers and an introduction by the editors were carefully reviewed and selected from 98 submissions The papers are organized in topical sections on kernel based learning bayesian and statistical models PAC learning query learning inductive inference language learning learning and logic learning from expert advice online learning defensive forecasting and teaching *Topics in Grammatical Inference* Jeffrey Heinz,José M. Sempere,2016-05-04 This book explains advanced theoretical and application related issues in grammatical inference a research area inside the inductive inference paradigm for machine learning The first three chapters of the book deal with issues regarding theoretical learning frameworks the next four chapters focus on the main classes of formal languages according to Chomsky s hierarchy in particular regular and context free languages and the final chapter addresses the processing of biosequences The topics chosen are of foundational interest with relatively mature and established results algorithms and conclusions The book will be of value to researchers and graduate students in areas such as theoretical computer science machine learning computational linguistics bioinformatics and cognitive psychology who are engaged with the study of learning especially of the structure underlying the concept to be learned Some knowledge of mathematics and theoretical computer science including formal language theory automata theory formal grammars and algorithmics is a prerequisite for reading this book *Generic Programming* Mehdi Jazayeri,Rüdiger G.K. Loos,David R. Musser,2003-06-29 This book constitutes the thoroughly refereed post proceedings of the International Seminar on Generic Programming held in Dagstuhl Castle Germany in April May 1998 The 20 revised full papers were carefully reviewed for inclusion in the book As the first book entirely devoted to the new paradigm of generic programming this collection offers topical sections on foundations and methodology comparisons programming methodology language design and applications *ECOOP '87. European Conference on Object-Oriented Programming* Jean Bezivin,Jean-Marie Hullot,Pierre Cointe,Henry Lieberman,1987 This volume contains the proceedings of the first European Conference on Object Oriented Programming held in Paris June 15 17 1987 The idea of this annual conference series is to provide a forum for theorists and practitioners interested in the object oriented programming paradigm The contributions cover the following aspects of object oriented programming methodology implementation theory interfaces languages simulation inheritance **The Analysis of Concurrent Systems** B.T. Denvir,1985-12

Nori, 1987-11-25 This volume gives the proceedings of the Tenth Conference on Foundations of Software Technology and Theoretical Computer Science These conferences are organized and run by the computer science research community in India and their purpose is to provide a forum for professional interaction between members of this research community and their counterparts in different parts of the world The volume includes four invited papers on reasoning about linear constraints using parametric queries the parallel evaluation of classes of circuits a theory of commonsense visual reasoning natural language processing complexity theory and logic The 26 submitted papers are organized into sections on logic automata and formal languages theory of programming parallel algorithms geometric algorithms concurrency distributed computing and semantics **Applicable Algebra, Error-Correcting Codes, Combinatorics and Computer Algebra** Thomas Beth, Michael Clausen, 1988-05-04 This volume contains the proceedings of the 4th International Conference on Applicable Algebra Error Correcting Codes Combinatorics and Computer Algebra AAECC 4 held in Karlsruhe 23 26 September 1986 Selected papers which were given at the conference have been reviewed a second time and are presented here *Control Flow and Data Flow: Concepts of Distributed Programming* Manfred Broy, 2012-12-06 In a time of multiprocessor machines message switching networks and process control programming tasks the foundations of programming distributed systems are among the central challenges for computing scientists The foundations of distributed programming comprise all the fascinating questions of computing science the development of adequate computational conceptual and semantic models for distributed systems specification methods verification techniques transformation rules the development of suitable representations by programming languages evaluation and execution of programs describing distributed systems Being the 7th in a series of ASI Summer Schools at Marktoberdorf these lectures concentrated on distributed systems Already during the previous Summer Schools at Marktoberdorf aspects of distributed systems were

important periodical topics The rising interest in distributed systems their design and implementation led to a considerable amount of research in this area This is impressively demonstrated by the broad spectrum of the topics of the papers in this volume although they are far from being comprehensive for the work done in the area of distributed systems Distributed systems are extraordinarily complex and allow many distinct viewpoints Therefore the literature on distributed systems sometimes may look rather confusing to people not working in the field Nevertheless there is no reason for resignation the Summer School was able to show considerable convergence in ideas approaches and concepts for distributed systems

Parallel Computing on Distributed Memory Multiprocessors Füsün Özgüner, Fikret Ercal, 2012-12-06 Advances in microelectronic technology have made massively parallel computing a reality and triggered an outburst of research activity in parallel processing architectures and algorithms Distributed memory multiprocessors parallel computers that consist of microprocessors connected in a regular topology are increasingly being used to solve large problems in many application areas In order to use these computers for a specific application existing algorithms need to be restructured for the architecture and new algorithms developed The performance of a computation on a distributed memory multiprocessor is affected by the node and communication architecture the interconnection network topology the I/O subsystem and the parallel algorithm and communication protocols Each of these parameters is a complex problem and solutions require an understanding of the interactions among them This book is based on the papers presented at the NATO Advanced Study Institute held at Bilkent University Turkey in July 1991 The book is organized in five parts Parallel computing structures and communication Parallel numerical algorithms Parallel programming Fault tolerance and Applications and algorithms
