Magic Molecules How Drugs Work:

Magic Molecules Susan Aldridge, 1998-09-28 All of us are drug users in the broadest sense of the word Drugs can be medicines they can be used for pleasure and they can also be used to protect our long term health It is important that we are well informed about the drugs we use how they work their benefits and their risks This book is a unique guide for the general science reader to the drugs of everyday life from the main types of medicine through to recreational drugs and food supplements It looks at how drugs interact with their targets in the body where they come from how they are developed and what drugs to expect in the future All the major pharmaceutical medicines are reviewed painkillers antibiotics anti cancer drugs anti depressants heart drugs tranquillizers and hormones However this book is much more than a consumer handbook it also conveys the fascinating science of drug discovery in an easily accessible way Chemistry of Drugs David E.

Newton, 2007 Discusses current research and advances in the field of pharmaceutical chemistry including drug safety designer drugs and the development of new drugs *Chemistry in the Marine Environment* R E Hester, R M

Harrison, 2007-10-31 The oceans cover more than 70% of the earth's surface to an average depth of almost 4000 metres It is therefore not surprising that exchanges that occur between ocean and atmosphere exert major influences on the global climate In addition there is great variety within the expanses of the ocean including large temperature differences and enormous biodiversity brought about by the great chemical diversity within the marine environment Written by international experts in the field *Chemistry in the Marine Environment* offers a multidisciplinary and authoritative review of this important topic Included is a review of the opportunities and challenges in developing new pharmaceuticals from the sea and an examination of contamination and pollution in the marine environment which is a cause of great concern world wide The international perspective of this book will engage the interest and attention of a wide readership from chemical oceanographers to policymakers from students in environmental science to those in oceanography programmes **Stories**

of the Invisible Philip Ball, 2001 What are things made of Everything is composed of small molecules of itself and they are flying around in concentric circles and arcs and segments explains Sergeant Fottrell in Flann O'Brien's *The Dalkey Archive* Philip Ball shows that the world of the molecule is indeed a dynamic place Using the chemistry of life as a springboard he provides a new perspective on modern chemical science as a whole Living cells are full of molecules in motion communication cooperation and competition Molecular scientists are now starting to capture the same dynamism in synthetic molecular systems promising to reinvent chemistry as the central creative science of the new century Illegal

Drugs Paul Gahlinger, 2003-12-30 Does Ecstasy cause brain damage Why is crack more addictive than cocaine What questions regarding drugs are legal to ask in a job interview When does marijuana possession carry a greater prison sentence than murder *Illegal Drugs* is the first comprehensive reference to offer timely pertinent information on every drug currently prohibited by law in the United States It includes their histories chemical properties and effects medical uses and

recreational abuses and associated health problems as well as addiction and treatment information Additional survey chapters discuss general and historical information on illegal drug use the effect of drugs on the brain the war on drugs drugs in the workplace the economy and culture of illegal drugs and information on thirty three psychoactive drugs that are legal in the United States from caffeine alcohol and tobacco to betel nuts and kava kava Retrometabolic Drug Design and Targeting Nicholas Bodor, Peter Buchwald, 2012-08-29 Innovative approach to drug design that is more likely to result in an approvable drug product Retrometabolic drug design incorporates two distinct drug design approaches to obtain soft drugs and chemical delivery systems respectively Combining fundamentals with practical step by step examples Retrometabolic Drug Design and Targeting gives readers the tools they need to take full advantage of retrometabolic approaches in order to develop safe and effective targeted drug therapies The authors both pioneers in the fields of soft drugs and retrometabolic drug design offer valuable ideas approaches and solutions to a broad range of challenges in drug design optimization stability side effects and toxicity Retrometabolic Drug Design and Targeting begins with an introductory chapter that explores new drugs and medical progress as well as the challenges of today's drug discovery Next it discusses Basic concepts of the mechanisms of drug action Drug discovery and development processes Retrometabolic drug design Soft drugs Chemical delivery systems Inside the book readers will find examples from different pharmacological areas detailing the rationale for each drug design These examples set forth the relevant pharmacokinetic and pharmacodynamic properties of the new therapeutic agents comparing these properties to those of other compounds used for the same therapeutic purpose In addition the authors review dedicated computer programs that are available to support and streamline retrometabolic drug design efforts Retrometabolic Drug Design and Targeting is recommended for all drug researchers interested in employing this newly tested and proven approach to developing safe and effective drugs **Troubling Natural Categories** Naomi Adelson, Leslie Butt, Karina Kielmann, 2013-11-01 Where do our conventional understandings of health illness and the body stem from What makes them authoritative How are the boundaries set around these areas of life unsettled in the changing historical and political contexts of science technology and health care delivery These questions are at the heart of Troubling Natural Categories a collection of essays honouring the tradition of Margaret Lock one of the preeminent medical anthropologists of our time Throughout her career Lock has investigated how medicine sets boundaries around what is deemed normal and natural and how in turn these ideas shape our technical and moral understandings of life sickness and death In this book nine established medical anthropologists all former students of Lock critically engage with her work offering ethnographic and historical analyses that problematize taken for granted constructs in health and medicine in a range of global settings The essays elaborate cutting edge themes within medical anthropology including the often disturbing inherently political nature of biomedicine and biotechnology the medicalization of mental health processes and the formation of uniquely local biologies through the convergence of bodily experience scientific discourse and new technologies of care

Troubling Natural Categories not only affirms Margaret Lock's place at the forefront of scholarship but with these essays carves out new intellectual directions in the medical social sciences Contributors include Sean Brotherton Vinh Kim Nguyen Junko Kitanaka Stephanie Lloyd Dominique Behague and Annette Leibing **The Quest for Immortality** Bruce A. Carnes, S. Jay Olshansky, 2014-04-21 This is by far the best book I've read on the science of aging Andrew Weil M.D. Life span Truth Will Set You Free from Age old Worries announced the Chicago Tribune upon the first publication of this book The New England Journal of Medicine confirmed For readers interested in aging and longevity this small book clearly explains the major concepts extremely enjoyable to read From NBC Nightly News with Tom Brokaw to Scientific American to the New York Times S. Jay Olshansky and Bruce A. Carnes have stirred up controversy and brought clarity to an issue often muddled by exaggeration and pseudoscience Medical science has uncovered a host of answers to the problems of aging but many of the most exciting discoveries are buried in scientific journals or overshadowed by popular quick fix treatments The Quest for Immortality explains the real science of aging and shows which treatments offered by today's multi billion dollar anti aging industries offer real hope and which are a waste of money and time **Euphorica! (A Tale of Magical Molecules)** ,

The Pharmaceutical Industry Ethan N. Parvis, 2002 Politicians consistently wage high profile battles over prescription drugs and the companies that make them The dilemma is balancing the pharmaceutical industry's need to make a profit with the public's need for affordable medical care This book presents analyses of the federal government's regulation of the drug industry and the arguments over the prices of prescription drugs
