Main Currents In Modern Economics Volume 1:

Handbook of Alternative Theories of Economic Development Erik S. Reinert, Jayati Ghosh, Rainer Kattel, 2016-09-28

The Handbook of Alternative Theories of Economic Development explores the theories and approaches which over a prolonged period of time have existed as viable alternatives to today's mainstream and neo-classical tenets. With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields, this volume represents a landmark in the field of economic development. It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition. The subject matter is approached from several complementary perspectives. From a historical angle, the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment. From a geographical angle, it includes chapters on African, Chinese, Indian, and Muslim approaches to economic development. Different schools are also explored and discussed, including nineteenth-century US development theory, Marxist, Schumpeterian, Latin American structuralism, regulation theory, and world systems theories of development. In addition, the Handbook has chapters on important events and institutions, including The League of Nations, The Havana Charter, and UNCTAD, as well as on particularly influential development economists. Contemporary topics such as the role of finance, feminism, the agrarian issue, and ecology and the environment are also covered in depth. This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development. It should be read by all serious scholars, teachers, and students of development studies, and indeed anyone interested in alternatives to development orthodoxy.

The Other Canon of Economics, Volume 2 Erik Reinert, 2024-02-13. Other Canon Economics Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today. Erik S. Reinert argues through essays ranging from 1994 to 2020 that neo-classical economics damages developing countries; the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth. Based on a long intellectual tradition started by the Italian economists Giovanni Botero (1589) and Antonio Serra (1613) and later used in virtually all presently industrialised countries, Reinert shows that the country which exports increasing returns goods (e.g. high-end manufacture) has advantages over the country which exports diminishing returns goods (e.g. commodities). This has important implications for today's development strategies that Reinert argues should be seen as industrial strategies.

Evolution of Austrian Economics Sandye Gloria-Palermo, 2002-01-04. This book argues against the dominant orthodoxy in the history of economic thought for the originality of Carl Menger's contribution to the development of the Austrian school of economics. Situating the evolution of Menger's thought in the tradition of classical political economy, the author documents the emergence of a Mengerian logic and its contribution to the formation of a distinctly Austrian

tradition of economics In its bold elucidation of the shaping of a tradition in economic thought Tradition and Innovation in Austrian Economics provides a fresh and challenging perspective on the Austrian school which will be of interest to researchers in Austrian economics and the history of economic thought

The Institutional Economics of Russia's Transformation Anton N. Oleinik, 2017-11-30 This book applies institutional theory to the analysis of the post Soviet Russian economy to bring to light the reasons why reforms have gone awry Emphasis is put on the elements missed in the early blueprints of reforms constraints embodied in formal and especially informal institutions Other aspects considered include the dominant model of power relationships and the networks of localized and personalized relationships among economic actors The first part provides a general description of the core concepts of institutional theory including both the old institutionalism of T Veblen and J Commons and the new institutional economics of R Coase O Williamson and D North and in the second part an institutional model of the post Soviet Russian economy is developed In the course of the analysis the authors discuss such unresolved issues as post privatization development in Russia and validity of the Coase theorem in the post Soviet institutional context Rich empirical data grounds the discussion throughout

Toward a Science of Man in Society K.W. Kapp, 2012-12-06 THIS study is concerned with the search for a new unity of social knowledge and social inquiry As such it is addressed to all those who see in the present compartmentalization and specialization of the social sciences the reason for the bewildering proliferation of subject matters the preoccupation with trivia and the failure to make the maximum use of our knowledge for human welfare More specifically I am addressing this book to those who are dealing with interdisciplinary problems such as the study of foreign areas the analysis of sociocultural change economic development

of backward economies and the planning and teaching of integrated courses in the social sciences The book suggests an answer to the question How can our specialized knowledge about man and society be unified As such the study reflects the conviction that all scientific knowledge in order to make the greatest possible contribution to human welfare must become comprehensive in character In fact such knowledge differs from popular and common sense understanding precisely by the fact that it is systematically formulated and held together in terms of a few unifying conceptual frameworks Indeed all scientific understanding is above all an effort to simplify by unifying what has long appeared as unrelated and disparate Those who believe that compartmentalization and specialization are the royal road to success in the social sciences may find this an irritating book

A History of Economic Thought in Sweden Lars Magnusson,2025-09-10

Situating key texts and writers in their proper historical context this book presents a history of Swedish economic thinking from early modern times to the present day Highlighting key elements of Swedish political economic and social history allows the book to shed new light on important parts of the story including the development of neo classical economics from the late 19th century associated with leading names such as Knut Wicksell Gustav Cassel and Eli Heckscher and the rise of the so called Stockholm school in the 1920 s and 30 s But the book also goes back further to explore the Swedish economic literature of the 18th century particularly its more liberal version of mercantilism and cameralism as well as early modern and medieval developments Throughout the book emphasizes the unique nature of much of the economic thinking emanating from Sweden Emulation and adaption of political economic thinking imported from abroad primarily the UK France and German speaking countries is an important part of this story but this is shown to be an active process which has resulted in great originality in Swedish economic thought This book will be of interest to readers in the history of economic thought economic history the history of ideas and Swedish history

Community Indicators Measuring Systems Rhonda Phillips,2017-09-08

Community indicators measuring systems represent a mechanism to improve monitoring and evaluation in planning incorporating citizen involvement and participation They reflect the interplay between social environmental and economic factors affecting a region s or community s well being and as such can be extremely valuable to planners and developers Yet little research has been conducted on their efficacy This book provides a comprehensive review of how community development indicators evolved and examines their interplay with planning and development It questions how we adequately measure concepts associated with indicators systems and whether these systems are sustainable and can best evolve In doing so the book allows a better understanding of the theoretical underpinnings of community indicators measuring systems as well as how best to design and implement them

The Top Books of the Year Main Currents In Modern Economics Volume 1 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have captivated audiences this year. Main Currents In Modern Economics Volume 1 : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Main Currents In Modern Economics Volume 1 : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
