New Approach To Cancer:

The Holistic Approach To Cancer Ian Pearce, 2012-04-24 When people are told they have cancer they are apt to feel shocked angry and frightened They usually still have the idea that they have caught a fatal disease and unless it has been found early on that they will inevitably slip towards death within a measurable period of a few years or even a few months Furthermore most patients still think that only the doctors can help them and tend to assume that even this help is regrettably limited For most patients have not yet heard of a very different idea about the nature of cancer and its cure which is now gaining ground You have been told that you have cancer There is a great deal you can do to help yourself You have a good chance of reversing your cancer Take courage No one can promise a cure What can be said is that a growing number of people have pulled themselves round by the methods described in this book taking responsibility for their health upon themselves This is not an alternative to orthodox therapy it is complementary to it and greatly enhances its effects It is extending orthodox therapy into areas which it does not usually reach at present You can improve the quality of your life and give the restorative healing forces a better chance to accomplish their task So get started on it right away *National Cancer Institute* ,1987-05 **NIH Almanac** National Institutes of Health (U.S.). Williams,2012-07-24 Vital Signs for Cancer Prevention suggests that cancer is a two phase process In Phase One you do not yet have and may never have cancer but predisposing factors poor diet and digestion toxins adrenal exhaustion and blood sugar imbalances among others can progressively and cumulatively increase your likelihood of developing it Phase Two begins when the first permanent transformed or cancerous cells form and are not destroyed by your defenses Understanding that the predisposing factors of the first phase lead toward the second can help you prevent the onset of cancer by correcting or minimizing those that apply to you Author Xandria Williams takes a natural therapies approach to healing cancer one based on an understanding of nutrition herbal medicine homoeopathy osteopathy and energy medicine rather than one based strictly on medicine drugs and surgery She sees cancer as a problem that affects the whole body not just the organ or system that is faulty and thus her recommendations are systemic rather than aimed specifically at the tumor Her main emphasis is on a series of scientifically validated tests many of which can be self administered she proposes that provide vital information as to the state of your health She also describes the CA profile a test that can indicate the presence of permanent cancer cells within the first six weeks and possibly years before a tumor can be detected allowing a crucial warning and the time to start an effective recovery program Williams suggests a number of supplements specific foods and other remedies detox procedures stress reduction to correct any of the predisposing factors that could with a final trigger move you from Phase One to Phase Two of the cancer process You will learn how to avoid cancer if you have not yet developed it avoid recurrences if you are in remission and overcome cancer if you have been diagnosed with it *Cancer Research and Prevention* United States.
