How to Win Customers in the Digital World Peter

Vervest, Al Dunn, 2012-12-06 Every organisation must strive for Total Action Winning the customer in today's highly competitive and demanding world is the key to ensuring success All managers and employees profess to understand this yet they find it incredibly difficult to perform together to achieve this The digital world is changing the traditional logic of business we must now act fast and effectively to capture and retain increasingly demanding and sophisticated customers be they individuals or organisations Most customers demand much more than many organisations are able to deliver It is said that the inventor of the telephone believed its main use would be to let someone know that a telegram was arriving Today we know there is a lot more you can do with a telephone and all the surrounding digital business technologies But you must be prepared to re think why you are doing things the way you are And why you are doing them at all This is the starting point

for How to win customers in the digital world Total Action or Fatal Inaction The authors confront traditional ways of organising with the capabilities of the new digital business technologies They are critical of the frozen behaviour of today s large organisations They go back to the fundamental goal that business is about making money by satisfying customers

Intellectual Privacy Neil Richards,2015-01-02 Most people believe that the right to privacy is inherently at odds with the right to free speech Courts all over the world have struggled with how to reconcile the problems of media gossip with our commitment to free and open public debate for over a century The rise of the Internet has made this problem more urgent We live in an age of corporate and government surveillance of our lives And our free speech culture has created an anything goes environment on the web where offensive and hurtful speech about others is rife How should we think about the problems of privacy and free speech In *Intellectual Privacy* Neil Richards offers a different solution one that ensures that our ideas and values keep pace with our technologies Because of the importance of free speech to free and open societies he argues that when privacy and free speech truly conflict free speech should almost always win Only when disclosures of truly horrible information are made such as sex tapes should privacy be able to trump our commitment to free expression But in sharp contrast to conventional wisdom Richards argues that speech and privacy are only rarely in conflict America s obsession with celebrity culture has blinded us to more important aspects of how privacy and speech fit together Celebrity gossip might be a price we pay for a free press but the privacy of ordinary people need not be True invasions of privacy like peeping toms or electronic surveillance will rarely merit protection as free speech And critically Richards shows how most of the law we enact to protect online privacy pose no serious burden to public debate and how protecting the privacy of our data is not censorship More fundamentally Richards shows how privacy and free speech are often essential to each other He explains the importance of intellectual privacy protection from surveillance or interference when we are engaged in the processes of generating ideas thinking reading and speaking with confidantes before our ideas are ready for public consumption In our digital age in which we increasingly communicate read and think with the help of technologies that track us increased protection for intellectual privacy has become an imperative What we must do then is to worry less about barring tabloid gossip and worry much more about corporate and government surveillance into the minds conversations reading habits and political beliefs of ordinary people A timely and provocative book on a subject that affects

us all Intellectual Privacy will radically reshape the debate about privacy and free speech in our digital age
