New Internationalism:

Pacific development and the new internationalism Richard H. Solomon, 1988 Canada, Latin America, and the New Internationalism Brian J.R. Stevenson, 2000-12-06 In *Canada Latin America and the New Internationalism* Brian Stevenson argues that Canada's foreign policy toward Latin America has been profoundly affected by these three factors and has evolved in response to both changing domestic demands and shifting international circumstances. By analysing a pivotal period in Canada Latin American relations he shows us how successive Canadian governments made important initiatives toward closer relationships with Latin America and were also pressured by non governmental organizations to play a bigger role in the region. Canada's increased role can be seen in official foreign policy commitments such as the decision to join the Organization of American States and in policy decisions on political refugees. He explains that while the United States has played a key role in sometimes constraining Canadian foreign policy in the region it is important to realize that Canadian foreign policy has been steadied by a long standing tradition of internationalism. *Canada Latin America and the New Internationalism* demonstrates that the tradition of internationalism in Canadian foreign policy as viewed from the perspective of foreign policy analysis provides the framework within which to understand and accommodate changes in its policy toward Latin America. The period which the book explores is critical in order to understand the contemporary nature and future direction of Canada Latin America relations **Globalization, Social Movements, and the New**

Internationalism Peter Waterman, 2010-06-15 In a political climate where loose talk of a third way passes for political idealism Waterman's passionate book examines the possibilities for a new style global solidarity suited to complex capitalist modernity. The author examines the past internationalism of Labour and socialists and the present one of radical democratic social movements discussing how the Left might build on this experience to recover a humanist and emancipatory tradition of internationalism which would address our multiple global social problems **Internationalism and the Ideology of**

Soviet Influence in Eastern Europe Jonathan C. Valdez, 1993-04-29 Valdez argues that the use of the fundamental principles of Marxism Leninism to perform various functions ultimately brought about a change in the basic assumptions of the theory itself. This resulted in the abandonment of the previous insistence on a universal model of socialism and of the idea that the international interests of the socialist bloc must take precedence over individual national interest. Soviet influence in Eastern Europe rested on little else than these ideological principles and consequently stood little chance of surviving their re interpretation. Finally Valdez assesses the re interpretation of the fundamental principles of Soviet East European relations by reformist scholars in the Soviet Union and the response by conservative members of the party apparatus.

Internationalism in the Age of Nationalism Glenda Sluga, 2013-04-11 The international turn. Imagine Geneva between the wars. The apogee of internationalism. What is the international. Afterword the national in the age of internationalism.

Labour Internationalism in the Global South Robert O'Brien, 2019-01-03 Labour internationalism is often viewed as

impossible or inevitable depending upon political perspective O'Brien argues for a more nuanced diverse understanding of labour internationalism identifying six different faces shaped by the national or global orientation of particular groups in the fields of production regulation and ideas Providing a general view of labour's global activity and a case study of the Southern Initiative on Globalisation and Trade Union Rights SIGTUR the book illustrates how the productive and regulatory structures of the global economy are pushing labour internationalism in particular directions It details how leftist unions in Argentina Australia Brazil India the Philippines South Africa and South Korea have tried to bridge their differences and launch collective actions Drawing upon twenty years of participant observation O'Brien reveals a specific Global South approach based upon anti imperialism anti capitalism and empathetic internationalism [An Introduction to International Relations](#) Richard Devetak, Anthony Burke, Jim George, 2007-11-13 Leading Australian scholars introduce a range of theories actors issues institutions and processes that animate international relations today **The International Minimum** Jessamyn R. Abel, 2015-05-31 The International Minimum tells the history of internationalism in Japan from the 1930s to 1960s shedding light on the deep connections between modes of diplomacy during times of aggressive imperial expansion and of peaceful cooperation For most of the twentieth century a rhetoric of international cooperation for peace and stability persisted as the lingua franca of foreign relations in Japan and around the world even during the years of rampant nationalisms and global war The advocacy and practice of multilateral cooperation though attenuated and often distorted and abused did not disappear during the years of aggression and war but instead were channeled into new and unexpected directions With a broad view of international relations that takes into account but also looks beyond the official sites of multilateral cooperation this book uncovers a continuous evolution of internationalist thought and activity in Japan that extends across the dark valley of war and the historiographical schism of defeat Acknowledging this continuity does not mitigate the violence and atrocities of the wartime regime But recognizing that institutions activities and rhetoric that were derived from the Wilsonian internationalism of the 1920s contributed to imperialism and war as well as to the postwar construction of a peaceful and democratic new Japan does help us understand the enthusiastic participation in war and empire in the years before 1945 by many of the same people in all sectors of Japanese society who eagerly embraced postwar structures of cooperation for peace and shared prosperity This study rethinks the standard narrative of Japan's international cooperation in three ways by taking seriously those international activities conducted outside of formal state level relations by examining cultural forms of international engagement and by asserting the importance of rhetoric in cultivating what was then referred to as an international mind Rather than signaling the demise of multilateral participation Japan's infamous withdrawal from the League of Nations became in fact the occasion for the diversification of internationalist activities For instance proponents of a people's diplomacy campaigned to bring the 1940 Olympic Games to Tokyo and established the Society for International Cultural Relations a national organization for international cultural exchange But as Japanese society was increasingly

mobilized for war even such popular and cultural efforts at international cooperation were made to contribute to the imperialist project In the decade after the war ended familiar internationalist rhetoric became a keystone in the construction of a so called new Japan This book traces the evolution of the internationalist worldview in Japan by examining both official policy and general discourse surrounding epochal moments such as Japan s withdrawal from the League and admission into the United Nations the failed and successful attempts to host a Tokyo Olympiad and wartime and postwar regional conferences in Tokyo and Bandung Indonesia Bringing these varied elements together produces a synthetic history of internationalism imperialism and the performance of diplomacy in the twentieth century when new global norms required a minimum level of international engagement This story is told through the materials of both high diplomacy and mass culture Unpublished documents in government and private archives reveal one layer of the formation of Japanese internationalism The public discourse found in popular journals books newspapers advertisements poems and songs articulates what would become the common sense views of international relations that helped delineate the realm of the possible in imperial and postwar Japanese foreign policy Contender States and Modern Chinese International Thought Ferran Perez

Mena,2024-05-17 This book contends that the development of modern Chinese international thought has been profoundly shaped by the distinctive nature of the Chinese state as a contender state and its global positioning since 1912 The argument posited demonstrates that notwithstanding the varied perspectives on the international held by Chinese intellectuals throughout the 20th century there exist commonalities across the periods analyzed in this book In essence the book emphasizes that the shared elements influencing the production of modern Chinese international thought do not derive from a unified cultural Chinese identity but rather stem from China s evolving geopolitical position in the modern world **The**

Emergence of International Society in the 1920s Daniel Gorman,2012-08-20 Chronicling the emergence of an international society in the 1920s Daniel Gorman describes how the shock of the First World War gave rise to a broad array of overlapping initiatives in international cooperation Though national rivalries continued to plague world politics ordinary citizens and state officials found common causes in politics religion culture and sport with peers beyond their borders The League of Nations the turn to a less centralized British Empire the beginning of an international ecumenical movement international sporting events and audacious plans for the abolition of war all signaled internationalism s growth State actors played an important role in these developments and were aided by international voluntary organizations church groups and international networks of academics athletes women pacifists and humanitarian activists These international networks became the forerunners of international NGOs and global governance *Politics, Paradigms, and Intelligence Failures* Ofira Seliktar,2015-05-20 Washington s failure to foresee the collapse of its superpower rival ranks high in the pantheon of predictive failures The question of who got what right or wrong has been intertwined with the deeper issue of who won the Cold War Like the disputes over who lost China and Iran this debate has been fought out along ideological and partisan lines

with conservatives claiming credit for the Evil Empire's demise and liberals arguing that the causes were internal to the Soviet Union. The intelligence community has come in for harsh criticism for overestimating Soviet strength and overlooking the symptoms of crisis. The discipline of Sovietology has dissolved into acrimonious irrelevance. Drawing on declassified documents, interviews, and careful analysis of contemporaneous literature, this book offers the first systematic analysis of this predictive failure at the paradigmatic foreign policy and intelligence levels. Although it is focused on the Soviet case, it offers lessons that are both timely and necessary.

China Turns to Multilateralism Guoguang Wu, 2007-09-12 China's recent rapid economic growth has drawn global attention to its foreign policy, which increasingly has had an impact on world politics. In contrast with China's long-standing preference for bilateralism or unilateralism in foreign policy, recent decades have seen changes in the PRC's attitude and in its declaratory and operational policies, with a trend toward the accepting and advocating of multilateralism in international affairs. Whilst China's involvement has been primarily in the economic arena, for example, participation in the World Trade Organization and ASEAN Plus Three, it has more recently expanded into international security institutions such as the Shanghai Cooperation Organization. This book records, analyzes, and attempts to conceptualize this phenomenal development in Chinese foreign policy and its impact on international relations, with the emphasis on China's active participation in multilaterally oriented regional security regimes. Written by an impressive team of international scholars, this book is the first collective effort in the field of China studies and international relations to look at China's recent turn to multilateralism in foreign affairs. It will appeal to students and scholars of Chinese politics and foreign policy, security studies, and international relations.

China's Emergent Political Economy Christopher A. McNally, 2007-09-12 This edited volume represents the first collaborative effort to explicitly view China's rapid international ascent as associated with the same process that catapulted Great Britain, the United States, Germany, and Japan to international prominence: the emergence of a capitalist political economy. Each chapter therefore applies the capitalist lens to analyze aspects of China's monumental social, economic, and political transition. Topics addressed range from examinations of China's industrial capitalism and its new multinational corporations to studies of China's changing polity, state-media relations, and foreign policy. With contributors writing from highly varied backgrounds, each chapter approaches the subject from a slightly different perspective, but the underlying findings show considerable common ground: China is developing a unique form of capitalism by combining elements rooted in Chinese history, such as the prevalence of networked forms of capital and the continued dominance of the state, with the growing influence of global capital, including the rapid adaptation of recent organizational and technological innovations. Concluding chapters draw out what capitalism in the dragon's lair implies for our 21st-century world, cautioning that China's rise is likely to challenge the present world order along both political and economic dimensions.

Cuba's Foreign Policy In The Middle East Damian J. Fernandez, 2021-11-18 In spite of the growing academic interest in Cuba's international relations in the revolutionary period, Cuba's policy toward the Middle

East has been a neglected field of study Although the Middle East has not been a high priority item on Fidel Castro's agenda various factors have combined to propel the regime into taking a more active stance in the region not least of which is the importance of the Middle East to the Soviet Union Some of these factors have been ideological such as the nature of Castroism itself Other factors have been more pragmatic the need to increase Cuba's leverage with the Soviet Union the desire to establish spheres of interest of its own in the Third World the attempt to use external politics to soothe internal problems and the wish to maximize the prestige of the Cuban revolution and by extension that of its *líder máximo* Since 1959 Havana's Middle Eastern policy has experienced four stages 1 1959 1973 Autonomous foreign policy marked by a dual relationship with both Israel and the Arab states 2 1973 1977 Accommodation to the Soviet line anti Israeli policy combined with an expansion of relations with progressive states signalled by the establishment of Cuban military missions 3 1977 1980 Activist policy in the region expanded role and development of diplomatic relationships 4 1981 to the present 1985 Cautious involvement restrained activism emphasizing socio economic cooperation Cuba's incursion into the Arab world illuminates how Cuban foreign policy works especially in relation to autonomy convergence and subordination dependence pragmatism and ideology The island's entrance into Middle East politics has introduced new risks into the island's foreign policy in return for the benefits which have been derived A theory to explain Cuba's foreign policy in its interaction with the Soviet Union in the Third World must include heretofore neglected variables time regime type and factionalism bureaucratic politics in addition to external events The study of Cuba's initiatives in the Middle East will serve to test this theory

Fictional International Relations Sungju Park-Kang, 2014-06-05 This book proposes the idea of fictional International Relations IR and engages with feminist IR by contextualising the case of a woman spy in Korea in the Cold War Fictional imagination and feminist IR encourage one to go beyond conventional or standard ways of thinking it reshapes taken for granted interpretations and assumptions This takes the view that a dominant narrative of events might be reconstructed as a different kind of story once events are placed within a wider temporal approach The case of the woman Korean secret agent who reportedly bombed a South Korean plane Korean Airlines KAL Flight 858 under the instruction from the North Korean leadership to disrupt the Seoul Olympic Games is chosen to serve as an effective example of fictional IR and feminist IR scholarship which can be investigated through the research puzzles concerning gender pain and truth Fictional International Relations has three main objectives First it investigates the way in which fiction writing can become a method for dealing with data problems and contingency in IR Second the book examines how gender pain and truth operate or interact in the case of the Korean spy and how this observation can strengthen feminist IR in terms of intersectionality Finally the author goes on to explore why this case has been so difficult to study openly and thoroughly The aim of the book is not to refute the official findings the point is to unpack complex dynamics surrounding truth more specifically how the official account has been executed as the truth based on a

The Codes of the Global in the Twenty-first Century Anna Maria Guasch, 2017-12-22 At the start of the twenty first century the contemporary implies a clear desire to affirm a type of art that is expanding across the globe challenging old geographical borders and reclaiming narratives of place and displacement in other words new cultural practices that transfigure the relationship between the global and the local and articulate the discourse of difference Being in the place of here and now working with others in simultaneous and specific practice and contemplating the production of work in the experience of connection means raising the value of the performative aspect of practice and displacing the reflective role of cultural production In the new cartography of this multifarious global art the author who combines theoretical and curatorial discourse with creative practice defines how global concepts circulate from the critical analysis of transnational contemporary art to the global
