Frank Lloyd Wright and Ralph Waldo Emerson Ayad B. Rahmani, Ayad Rahmani, 2023-09-27 Frank Lloyd Wright and Ralph Waldo Emerson Transforming the American Mind is an interdisciplinary volume of literary and cultural scholarship that examines the link between two pivotal intellectual and artistic figures It probes the degree to which the transcendentalist author influenced the architect s campaign against dominant strains of American thought Inspired by Emerson s writings on the need to align exterior expression with interior self Wright believed that architecture was not first and foremost a matter of accommodating spatial needs but a tool to restore intellectual and artistic freedom too often lost in the process of modernization Ayad Rahmani shows that Emerson s writings provide an avenue for interpreting Wright s complex approach to country and architecture The two thinkers cohered

around a common concern for a nation derailed by nefarious forces that jeopardized the country's original promise. In Emerson's condemnations of slavery and inequality, Wright found inspiration for seeking redress against the humiliations suffered by the modern worker, be it at the hands of an industrial manager or an office boss. His designs sought to challenge dehumanizing labor practices and open minds to the beauty and science of agriculture and the natural world. Emerson's example helped Wright develop architecture that aimed less at accommodating a culture of clients and more at raising national historical awareness while also arguing for humane and equitable policies. Frank Lloyd Wright and Ralph Waldo Emerson presents a new approach to two vital thinkers whose impact on American society remains relevant to this day.

The Complete Smoke Trilogy Tanya Huff, 2019-07-09 Now in an omnibus edition, the Lambda Award-nominated supernatural Smoke series presents contemporary fantasy with a gothic twist. When Tony Foster relocated to Vancouver with his vampire, Henry Fitzroy, he knew it was his chance to get his act together. In an example of art echoing life, Tony landed a job as production assistant for the syndicated TV show *Darkest Night*, a series about a vampire detective. And except for his unrequited crush on the show's handsome co-star Lee Nicholas, Tony was pretty content. Until everything started to fall apart on the set. It began with shadows, shadows where they didn't belong, that almost had an existence of their own. Tony tried to ignore it until he found Nikki Waugh's body and felt the shadow's touch, and a stunt crash went wrong for no discernible reason, and Tony knew that he had to find out what was threatening everyone on the set.

The Testimonies of Slaves Work Projects Administration, 2020-12-17 Musaicum Books presents to you this meticulously collected collection of hundreds of life stories, recorded interviews, and incredible, vivid testimonies of former slaves from the American southern states, including photos of the people being interviewed and their extraordinary narratives. After the end of Civil War in 1865, more than four million slaves were set free. There were several efforts to record the remembrances of the former slaves. The Federal Writers Project was one such project by the United States federal government to support writers during the Great Depression by asking them to interview and record the myriad stories and experiences of slavery of former slaves. The resulting collection preserved hundreds of life stories from 17 U.S. states that would otherwise have been lost in the din of modernity and America's eagerness to deliberately forget the blot on its recent past. Contents: Alabama, Arkansas, Florida, Georgia, Indiana, Kansas, Kentucky, Maryland, Mississippi, Missouri, North Carolina, Ohio, Oklahoma, South Carolina, Tennessee, Texas, Virginia.

Caterpillars of Eastern North America David Wagner, 2010-04-25 This lavishly illustrated guide will enable you to identify the caterpillars of nearly 700 butterflies and moths found east of the Mississippi. The more than 1 200 color photographs and two dozen line drawings include numerous exceptionally striking images. The giant silk moths, tiger moths, and many other species covered include forest pests, common garden guests, economically important species, and of course the Mescal Worm and Mexican Jumping Bean caterpillars. Full page species accounts cover almost 400 species with up to six images per species including an image of the adult plus succinct text with information on distribution, seasonal activity, foodplants, and life history. These accounts are generously complemented with additional images of earlier instars, closely related species, noteworthy behaviors, and other intriguing aspects of caterpillar biology. Many caterpillars are illustrated here for the first time. Dozens of new foodplant records are presented and erroneous records are corrected. The book provides considerable information on the distribution, biology, and taxonomy of caterpillars beyond that available in other popular works on Eastern butterflies and moths. The introductory chapter covers caterpillar structure, life cycles, rearing, natural enemies, photography, and conservation. The section titled Caterpillar Projects will be of special interest to educators. Given the dearth of accessible guides on the identification and natural history of caterpillars, *Caterpillars of Eastern North America* is a must for entomologists and museum curators, forest managers, conservation biologists, and others who seek a compact, easy to use guide to the caterpillars of this vast region. A compact guide to nearly 700 caterpillars east of the Mississippi, from forest pests to garden guests and economically important species. 1 200 color photos and 24 line drawings enable easy identification.
