Private Schools And State Schools:

Private Schools and State Schools Daphne Johnson, 1987 *The Regulation of Private Schools in America*, 1995

Today a parent's right to choose a private education for his or her children is reflected in the statutes of all 50 states. State regulation of private schools, however, is not without limitations. The challenge to state legislators in regulating private schools is to draft legislation that 1 respects the fundamental right of parents to direct the education of their children, 2 protects the state's interest in an informed citizenry but avoids interference with religious beliefs unless compelling interests are at issue, and 3 avoids comprehensive regulation of private education that would deprive parents of any choice in education. This handbook presents findings of a study initiated by the Office of Nonpublic Education, U.S. Department of Education, that conducted a state-by-state analysis of state laws regulating private education. The study, which includes all 50 states, Puerto Rico, the Virgin Islands, and the District of Columbia, identified the following general areas of regulation advanced by state legislators: recordkeeping and reports, licensing, registration, accreditation, health and safety, curriculum, and public funding. The data show that none of the states regulates private schools in the same way. The report contains comparison charts depicting state oversight of private schools, state-mandated educational requirements, and public assistance to private schools and private school children.

LMI Private Schools and State Laws, 1924 *Comparing Public and Private Schools: Institutions and organizations* Edward Haertel, Thomas James, Henry M. Levin, 1987 **The Public School Advantage** Christopher A. Lubienski, Sarah Theule Lubienski, 2013-11-07

Nearly the whole of America's partisan politics centers on a single question: Can markets solve our social problems? And for years this question has played out ferociously in the debates about how we should educate our children. From the growth of vouchers and charter schools to the implementation of No Child Left Behind, policy makers have increasingly turned to market-based models to help improve our schools, believing that private institutions, because they are competitively driven, are better than public ones. With *The Public School Advantage*, Christopher A. and Sarah Theule Lubienski offer powerful evidence to undercut this belief, showing that public schools, in fact, outperform private ones. For decades, research showing that students at private schools perform better than students at public ones has been used to promote the benefits of the private sector in education, including vouchers and charter schools. But much of this data is now nearly half a century old. Drawing on two recent large-scale and nationally representative databases, the Lubienskis show that any benefit seen in private school performance now is more than explained by demographics. Private schools have higher scores not because they are better institutions but because their students largely come from more privileged backgrounds that offer greater educational support. After correcting for demographics, the Lubienskis go on to show that gains in student achievement at public schools are at least as great and often greater than those at private ones. Even more surprising, they show that the very mechanism that market-based reformers champion—autonomy—may be the crucial factor that prevents private schools from performing better. Alternatively,

those practices that these reformers castigate such as teacher certification and professional reforms of curriculum and instruction turn out to have a significant effect on school improvement Despite our politics we all agree on the fundamental fact education deserves our utmost care The Public School Advantage offers exactly that By examining schools within the diversity of populations in which they actually operate it provides not ideologies but facts And the facts say it clearly education is better off when provided for the public by the public **Private schools and state schools** Daphne Olive Johnson,1988 **Private Schools and Public Policy** William Lowe Boyd,James G. Gross,2017-12-01 Americans today choose from a dizzying array of schools loosely lumped into categories of public and private How did these distinctions emerge in the first place and

what do they tell us about the more general relationship in the United States between public authority and private enterprise In Public vs Private Robert N Gross describes how more than a century ago public policies fostered the rise of modern school choice In the late nineteenth century American Catholics began constructing rival urban parochial school systems an enormous and dramatic undertaking that challenged public school systems near monopoly of education In a nation deeply committed to public education mass attendance in Catholic schools produced immense conflict States quickly sought ways to regulate this burgeoning private sector and the competition it produced even attempting to abolish private education altogether in the 1920s Ultimately however Gross shows how the public policies that resulted produced a stable educational marketplace where choice flourished The creation of the educational marketplace that we have inherited today with systematic alternatives to public schools was as much a product of public power as of private initiative Gross also demonstrates that schools have been key sites in the development of the American legal conceptions of public and private Landmark Supreme Court cases about the state s role in regulating private schools such as the 1819 Dartmouth v Woodward decision helped define and redefine the scope of government power over private enterprise Judges and public officials gradually blurred the meaning of public and private contributing to the broader shift in how American governments have used private entities to accomplish public aims As ever more policies today seek to unleash market forces in education Americans would do well to learn from the historical relationship between government markets and schools
