The Third International Conference on the Development of Biomedical Engineering in Vietnam Vo Van Toi, Truong Quang Dang Khoa, 2010-04-03 Vietnam is a rapidly developing socially dynamic country where interest in biomedical engineering activities has grown considerably in recent years The leadership of the Vietnamese government and of research and educational institutions are well aware of the importance of this field for the development of the country and have instituted policies to promote its development The political economic and social environment within the country offers unique opportunities for the international community and this conference was intended to provide a vehicle for the sharing of experiences development of support and collaboration networks for research and exchange of ideas on how to improve the educational and entrepreneurial environment to better address the urgent needs of Vietnam In January 2004 under the sponsorship of the U S National Science Foundation a U S delegation that consisted of Biomedical Engineering professors from different universities in the United States visited several universities and research institutions in Vietnam to assess the state of development of this field This delegation proposed a five year plan that was enthusiastically embraced by the international scientific communities to actively develop collaborations with Vietnam Within this framework in July 2005 the First International Conference on the Development of Biomedical Engineering in Vietnam was held in Ho Chi Minh City From that conference a Consortium of Vietnam International Universities was created to advise and assist the development of Biomedical Engineering in Vietnamese universities

Medical Image Computing and Computer-Assisted Intervention - MICCAI 2002 Takeyoshi Dohi, Ron Kikinis, 2003-06-30 The fifth international Conference in Medical Image Computing and Computer Assisted Intervention MICCAI 2002 was held in Tokyo from September 25th to 28th 2002 This was the first time that the conference was held in Asia since its foundation in 1998 The objective of the conference is to offer clinicians and scientists the opportunity to collaboratively create and explore the new medical field Specifically MICCAI offers a forum for the discussion of the state of art in computer assisted interventions medical robotics and image processing among experts from multi disciplinary professions including but not limited to clinical doctors computer scientists and mechanical and biomedical engineers The expectations of society are very high the advancement of medicine will depend on computer and device technology in coming decades as they did in the last decades We received 321 manuscripts of which 41 were chosen for oral presentation and 143 for poster presentation Each paper has been included in these proceedings in eight page full paper format without any differentiation between oral and poster papers Adherence to this full paper format along with the increased number of

manuscripts surpassing all our expectations has led us to issue two proceedings volumes for the first time in MICCAI's history. Keeping to a single volume by assigning fewer pages to each paper was certainly an option for us considering our budget constraints. However, we decided to increase the volume to offer authors maximum opportunity to argue the state of art in their work and to initiate constructive discussions among the MICCAI audience.
