Enterprise Networking: Multilayer Switching and Applications
 Serpanos, Dimitrios N.,Theoharakis, Vasilis,2001-07-01 Enterprise Networking Multilayer Switching and Applications offers up to date information relevant for the design of modern corporate networks and for the evaluation of new networking equipment The book describes the architectures standards high availability and network policies that are requirements of modern switched networks

Transactions on Large-Scale Data- and Knowledge-Centered Systems XL Abdelkader Hameurlain,Roland Wagner,Franck Morvan,Lynda Tamine,2019-01-04 This the 40th issue of Transactions on Large Scale Data and Knowledge Centered Systems contains five revised selected regular papers Topics covered include personalized social query expansion approaches continuous query on social media streams elastic processing systems and semantic interoperability for smart grids and NoSQL environments

Handbook of Network and System Administration Jan Bergstra,Mark Burgess,2011-08-11 System administration is about the design running and maintenance of human computer systems Examples of human computer systems include business enterprises service institutions and any extensive machinery that is operated by or interacts with human beings System administration is often thought of as the technological side of a system the architecture construction and optimization of the collaborating parts but it also occasionally touches on softer factors such as user assistance help desks ethical considerations in deploying a system and the larger implications of its design for others who come into contact with it This book summarizes the state of research and practice in this emerging field of network and system administration in an anthology of chapters written by the top academics in the field The authors include members of the IST EMANICS Network of Excellence in Network Management This book will be a valuable reference work for researchers and senior system managers wanting to understand the essentials of system administration whether in practical application of a data center or in the design of new systems and data centers Covers data center planning and design Discusses configuration management Illustrates business modeling and system administration Provides the latest theoretical developments

Security and Privacy ,1999 Proceedings of a May 1999 symposium documenting significant advances in the design analysis and implementation of secure computer and communications systems Papers are organized in sections on systems policy verification recent history of computer security research intrusion detection information flow authentication and key exchange and future projections Topics include local reconfiguration policies secure communications processing for distributed languages and a data mining framework for building intrusion detection models No index Annotation copyrighted by Book News Inc Portland OR

Tools for High Performance Computing 2017 Christoph Niethammer,Michael M. Resch,Wolfgang E. Nagel,Holger Brunst,Hartmut Mix,2019-02-14 This book presents the proceedings of the 11th International Parallel Tools Workshop a forum to discuss the

latest advances in parallel tools held September 11-12 2017 in Dresden Germany High performance computing plays an increasingly important role for numerical simulation and modeling in academic and industrial research At the same time using large scale parallel systems efficiently is becoming more difficult A number of tools addressing parallel program development and analysis has emerged from the high performance computing community over the last decade and what may have started as a collection of a small helper scripts has now matured into production grade frameworks Powerful user interfaces and an extensive body of documentation together create a user friendly environment for parallel tools Aspects of Network and Information Security Evangelos Kranakis, Evgueni Haroutunian, Elisa Shahbazian, 2008 Understanding network vulnerabilities in order to protect networks from external and internal threats is vital to the world's economy and should be given the highest priority This volume discusses topics such as network security information security and coding Pattern-Oriented Software Architecture, Patterns for Concurrent and Networked Objects Douglas C. Schmidt, Michael Stal, Hans Rohnert, Frank Buschmann, 2013-04-22 Designing application and middleware software to run in concurrent and networked environments is a significant challenge to software developers The patterns catalogued in this second volume of Pattern Oriented Software Architectures POSA form the basis of a pattern language that addresses issues associated with concurrency and networking The book presents 17 interrelated patterns ranging from idioms through architectural designs They cover core elements of building concurrent and network systems service access and configuration event handling synchronization and concurrency All patterns present extensive examples and known uses in multiple programming languages including C, C++ and Java The book can be used to tackle specific software development problems or read from cover to cover to provide a fundamental understanding of the best practices for constructing concurrent and networked applications and middleware About the Authors This book has been written by the award winning team responsible for the first POSA volume A System of Patterns joined in this volume by Douglas C Schmidt from University of California Irvine UCI USA Visit our Web Page Performance-oriented Application Development for Distributed Architectures M. Gerndt, 2002 Annotation This publication is devoted to programming models languages and tools for performance oriented program development in commercial and scientific environments The included papers have been written based on presentations given at the workshop PADDA 2001 The goal of the workshop was to identify common interests and techniques for performance oriented program development in commercial and scientific environments Distributed architectures currently dominate the field of highly parallel computing Distributed architectures based on Internet and mobile computing technologies are important target architectures in the domain of commercial computing too The papers in this publication come from the two areas scientific computing and commercial computing Applications, Tools and Techniques on the Road to Exascale Computing K. De Bosschere, E.H. D'Hollander, G.R. Joubert, 2012-05-09 Single processing units have now reached a point where further major improvements in their performance are restricted by their physical limitations This is causing a slowing

down in advances at the same time as new scientific challenges are demanding exascale speed This has meant that parallel processing has become key to High Performance Computing HPC This book contains the proceedings of the 14th biennial ParCo conference ParCo2011 held in Ghent Belgium The ParCo conferences have traditionally concentrated on three main themes Algorithms Architectures and Applications Nowadays though the focus has shifted from traditional multiprocessor topologies to heterogeneous and manycores incorporating standard CPUs GPUs Graphics Processing Units and FPGAs Field Programmable Gate Arrays These platforms are at a higher abstraction level integrated in clusters grids and clouds The papers presented here reflect this change of focus New architectures programming tools and techniques are also explored and the need for exascale hardware and software was also discussed in the industrial session of the conference This book will be of interest to all those interested in parallel computing today and progress towards the exascale computing of tomorrow
