Questioning Geopolitics Political Projects In A Changing World System:

Questioning Geopolitics Georgi M. Derluguian, Scott L. Greer, 2000-08-30 This volume takes an enlightened step back from the ongoing discussion of globalization. The authors reject the notion that globalization is an analytically useful term. Rather, this volume shows globalization as merely the framework of the current political debate on the future of world power. Some of the many other novel ideas advanced by the authors include the explicit prediction that East Asia is not going to become the center of the world, the contention that the USSR collapsed for the same reasons that nearly brought down the United States in 1973, and the notion that the regional economic networks that are emerging from under the modern states are in fact rather old formations. The articles in the volume are organized around three main themes. Part One explores both the changing patterns of global power from the viewpoint of geopolitics and the Gramscian approach to the study of international relations. Part Two further develops the debate among a number of eminent historians and sociologists, challenging both the apologists for and the opponents of globalization in new and unexpected ways. Part Three traces the emergence of regional economic networks and explores the ambiguous problems of security and identity posed by the old new transborder formations.

Bourdieu's Secret Admirer in the Caucasus Georgi M. Derluguian, 2005-07-15 Bourdieu's Secret Admirer in the Caucasus is a gripping account of the developmental dynamics involved in the collapse of Soviet socialism. Fusing a narrative of human agency to his critical discussion of structural forces, Georgi M. Derluguian reconstructs from firsthand accounts the life story of Musa Shanib, who from a small town in the Caucasus grew to be a prominent leader in the Chechen revolution. In his examination of Shanib and his keen interest in the sociology of Pierre Bourdieu, Derluguian discerns how and why this dissident intellectual became a nationalist warlord. Exploring globalization, democratization, ethnic identity, and international terrorism, Derluguian contextualizes Shanib's personal trajectory from de-Stalinization through the nationalist rebellions of the 1990s to the recent rise in Islamic militancy. He masterfully reveals not only how external economic and political forces affect the former Soviet republics but how those forces are in turn shaped by the individuals, institutions, ethnicities, and social networks that make up those societies. Drawing on the work of Charles Tilly, Immanuel Wallerstein, and of course Bourdieu, Derluguian's explanation of the recent ethnic wars and terrorist acts in Russia succeeds in illuminating the role of human agency in shaping history.

The Modern/Colonial/Capitalist World-System in the Twentieth Century Ramón Grosfoguel, Ana Margarita Cervantes-Rodríguez, 2002-07-30 An important building block for further advancing world system theory, this book considers the theory from the perspectives of global processes and antisystemic movements, feminist theory, and the aftermath of the colonial system. The volume addresses three myths tied to Eurocentric forms of thinking: objectivist and universalist knowledges, the decolonization of the modern world, and developmentalism. All three myths, the authors argue, conceal the continued hierarchical and unequal relations of domination and exploitation between European and Euro-American centers and non-European peripheral regions. In this volume, world

system scholars address these and related aspects of the modern colonial capitalist world system Addressing the myth of universalist knowledge the volume reminds us that our knowledge is situated in the gender class racial and sexual hierarchies of a specific region in the world system while the colonality of power additionally situates our knowledge The volume further argues that the postcolonial era retains the hierarchy of colonialism and the possibility of national development without global structural changes is one of the greatest 20th century myths Taking these perspectives into consideration the contributors examine and help to refine classic world system theory

Images of Gramsci Andreas Bieler, Adam Morton, 2014-06-03 A comprehensive reassessment of the relevance of Gramsci's theory and practice at the beginning of the twenty first century Whilst commentaries on Antonio Gramsci and arguments surrounding his political and intellectual legacy have proliferated little attention has been hitherto directed to linking the connections and contentions between Political Theory and International Political Economy This volume brings together leading authorities engaged in common debates to produce for the first time a major collection that clarifies addresses and lays bare the manifest connections and contentions within political and international theory surrounding the legacy of Antonio Gramsci In Part I scholars examine various approaches to Gramsci's thought including his methodological principles the specific conception of civil society he offers his writings on war and cultural struggle the spatial dimension of his thinking and his philosophy of history Part II focuses on very new developments in Gramsci scholarship concerning the questioning of contemporary world order This includes reflections on his relevancy to issues of globalising capitalism transformations in the state revolutionary praxis orientalism and empire as well as European regionalism This book was previously published as a special issue of the leading Critical Review of International Social and Political Philosophy CRISPP

Mentoring, Methods, and Movements: Colloquium in Honor of Terence K. Hopkins by His Former Students and the Fernand Braudel Center for the Study of Economies, Historical Systems, and Civilizations Immanuel M. Wallerstein, Mohammad H. Tamdgidi, 2017-01-01 Terence Kilbourne Hopkins 1929 1997 was a hidden gem of the field of world systems studies who contributed indispensably to its foundation amid a lifelong collaboration and friendship with Immanuel Wallerstein His pedagogical humanism methodological rigor and scientific commitment to social change merged with his creatively flexible administrative skills to found the Graduate Program in Sociology at Binghamton University SUNY The student centered autonomous program fostered the formation of critically minded scholars who pursue transdisciplinary sociology while fusing deeply personal commitments to long term large scale social change In this significantly updated twentieth anniversary second edition of *Mentoring Methods and Movements*

Terence K Hopkins's former students organizing and contributing to a colloquium in his honor a few months before his untimely passing in January 1997 share key insights about what made him so unique and impactful in shaping their practices of engaged sociology informed by an always open dynamic and self-reinventing World Systems Analysis. The new edition includes a comprehensive chronological works citations bibliography of Terence K Hopkins, a new postscript essay reflecting and building on other contributions in the volume, updates on the contributors' background and works, a reorganized photo gallery and cover design, and a detailed subject index that can be a helpful guide to the many aspects of Hopkins's thought and pedagogy from the points of view of his students and colleagues.

From the Inside For several years now we sociologists have heard much talk about structure and agency. This distinction can make little sense to students of Hopkins who always insisted that social structures are formed, reproduced, and reformed by the agency of actors.

Walter Goldfrank, U C Santa Cruz: How did Terry do it?

William G. Martin, Binghamton University: Hopkins's insistent questioning opened the door to the creation of an alternate apparatus of discourse, the very flexibility of which allows the emerging debates of world-scale historical social sciences to be joined.

Ravi A. Palat, Binghamton University: Hopkins was attacking the idiographic/nomothetic distinction through the pedagogy. The pedagogy assumed that the student had to work hard as a student inventing and then had to continue inventing forever after.

Immanuel Wallerstein, Yale University: But then again I cannot think of a better way to reflect on Hopkins's work than approaching it from a personal perspective. That is how he always approached his own work after all, and he encouraged us to do so as well.

Resat Kasaba, University of Washington: The vision of methods Terence Hopkins has offered includes this invitation to a special sort of imaginative social action: think the past to make a past with the purpose of making the future by thinking a future.

Richard Lee, Binghamton University: This is not going to be a personal speech, but the invisible hand of Terence K Hopkins lies about me, and in most of what I've written since I left Binghamton.

Philip McMichael, Cornell University: The study of regionalism vis-à-vis globalism parallels the two poles of Terence Hopkins's own intellectual development, which began with the study of small group interaction and culminated with a focus on the dynamics of the world system.

Elizabeth McLean-Petras, Scholar and Author: even the Hopkins phrases were not immune to skeptical support. Exhibiting his characteristic penchant for sustained auto-critique, Hopkins wrote in the margins of the paper:

Beverly Silver, Johns Hopkins University: He was a tireless and merciless critic. Yet I never felt demeaned or belittled. He pounded home time and again that it was not helpful to view race and class as binary opposites.

Rod Bush, 1945-2013, St John's University: key points in the work of Hopkins elucidate productive ways of meeting the criteria set by feminists for the study of gender.

World systems analysis has thus far not dealt with subjective and objective self and society as dimensions of the modern world system. Critique of these as discrete units of analysis is implicit in world systems analysis, but focused attention on these is the contribution of feminist theory to the discussion of unit of analysis.

Nancy Forsythe, Feminist Scholar and Activist: The time I was fortunate to spend with him allowed me to have a sense of his profound concern about the welfare of humanity and

commitment to the cause of the unprivileged Lu Aiguo Inst of World Economies and Politics Chinese Academy of Social Science Beijing It was not what Hopkins actually said to me that mattered not his educational program nor even his parenthetical letters but what he is and now what he was a style of being alive a magical dance he does with his body or with you or with parts of who he was a dance in which he laughs turning away just enough to help you see it is not you he is laughing at but us Evan Stark Rutgers University Gathered in this volume are sociologically imaginative world systems analyses of Terence K Hopkins amid the world historical public issues that deeply troubled him personally and are even more prevalent today Mohammad H Tamdgidi UMass Boston OKCIR

The Hadrami Diaspora Leif O. Manger,2010 The Hadramis of South Yemen and the emergence of their diasporic communities throughout the Indian Ocean region are an intriguing facet of the history of this region s migratory patterns In the early centuries of migration the Yemeni or Hadrami traveler was both a trader and a religious missionary making the migrant community both a trade diaspora and a religious diaspora This tradition has

continued as Hadramis around the world have been linked to networks of extremist Islamic inspired movements Osama bin Laden leader of Al Qaeda and descendant of a prominent Hadrami family as the most infamous example However communities of Hadramis living outside Yemen are not homogenous The author expertly elucidates the complexity of the diasporic process showing how it contrasts with the conventional understanding of the Hadrami diaspora as an unchanging society with predefined cultural characteristics originating in the homeland Exploring ethnic social and religious aspects the author offers a deepened understanding of links between Yemen and Indian Ocean regions including India Southeast Asia and the Horn of Africa and the emerging international community of Muslims
