- 1 Show that the sense of touch is closely connected with our ideas of force
- 2 What connection exists in general between force and the muscular effort necessary to produce or to resist it
- 3 Name certain cases in which the maintenance of a force like continued muscular effort requires the continuous expenditure of energy of some sort and where if the source of energy be cut off exhaustion ensues and the force ceases
- 4 What is meant by the fatigue of metals etc under continued strain Would a perfect solid exhibit such effects
- 5 Are we justified in supposing that the maintenance of inanimate forces in general like the maintenance of muscular tension in the absence of a fresh supply of energy necessarily involves fatigue or exhaustion to any considerable extent Illustrate by the force of gravity upon the moon
- 6 What misconception is likely to arise from the use of muscular tension as the type of a force
- 7 Does the modern idea of force contain any reference to the supply of energy by which it may happen to be maintained
- 8 What restriction not observed by earlier writers exists in the modern use of the word force
- 9 Criticise the expressions force of a waterfall force of the wind force of gravity
- 10 Consider a push a pull or a shove as instances of a force What does each imply as to the direction of the force with respect to the agent as to the point of application of the force and as to the state of tension or compression produced
- 11 Criticise the definition of a force as a push or a pull
- 12 Elementary Ideas To what extent is it supposed that molecular forces can be so classified Is it thought that electromagnetic forces fall into either category
