Congress. House. Committee on Commerce. Subcommittee on Energy and Power,1998 Questions H. Hiz,2012-12-06 To the philosopher the logician and the linguist questions have a special fascination The two main views of language that it describes the world and that it expresses thought are not directly applicable to questions Questions are not assertions A question may be apt sharp to the point important or it may be inappropriate ambiguous awkward irrelevant or irreverent But it cannot be true or false It does not have a truth value not just because an utterance like Was the letter long does not indicate which letter is being talked about The indicative The letter was not long has the same indeterminacy In actual context the anaphoric definite article will be resolved both for a question and for an indicative sentence Contextual resolutions are easily found for most cross references A question cannot be either true or it does not describe a state of affairs Neither does it express false because thought because it is an expression of suspended thought of lack of judgment To dress it in other philosophical styles a question is not a judgment it is not a proposition it is not an assertion A philosopher may try to paraphrase a question as an indicative sentence for instance as a statement of ignorance or as a statement of the desire to know Hintikka Wachowicz and Lang explore this territory Or he may interpret it as a meta statement intimating the direction in which the flow of the discourse is going CRACK99: The Takedown of a \$100 Million Chinese Software Pirate David Locke Hall,2015-10-19 The utterly gripping story of the most outrageous case of cyber piracy prosecuted by the U S Department of Justice A former U S Navy intelligence officer David Locke Hall was a federal prosecutor when a bizarre sounding website CRACK99 came to his attention It looked like Craigslist on acid but what it sold was anything but amateurish thousands of high tech software products used largely by the military and for mere pennies on the dollar Want to purchase satellite tracking software No problem Aerospace and aviation simulations No problem Communications systems designs No problem Software for Marine One the presidential helicopter No problem With delivery times and customer service to rival the world's most successful e tailers anybody anywhere including rogue regimes terrorists and countries forbidden from doing business with the United States had access to these goods for any purpose whatsoever But who was behind CRACK99 and where were they The Justice Department discouraged potentially costly risky cases like this preferring the low hanging fruit that scored points from politicians and the public But Hall and his colleagues were determined to find

the culprit They bought CRACK99 s products for delivery in the United States buying more and more to appeal to the budding entrepreneur in the man they identified as Xiang Li After winning his confidence they lured him to Saipan a U S commonwealth territory where Hall s own father had stormed the beaches with the marines during World War II There they set up an audacious sting that culminated in Xiang Li s capture and imprisonment The value of the goods offered by CRACK99 A cool 100 million An eye opening look at cybercrime and its chilling consequences for national security CRACK99 reads like a caper that resonates with every amazing detail
