Law Benjamin J Richardson,2023-10-05 This landmark open access book unveils the history of defending Australia s natural
 environment and examines the subject s legal and political contexts from the birth of the nation in 1901 until the advent of
 the so called modern era of environmental regulation in the late 1960s It rejects the mythology that Australia lacked
 environmental law before the late 1960s in revealing how many of today s environmental laws from pollution control to
 nature conservation emerged from precedents or events much earlier in the 20th century This history however reveals a
 discrepancy between lawmakers greater efficacy to exploit rather than protect the environment a discrepancy that grew as
 nature s backlash intensified in a rapidly degrading continent colonised to build the Australian nation In exploring these
 dynamics the book offers a rich tapestry of case studies illustrated with historic photographs that show the origins of
 Australia s environmental laws and how they borrowed from international precedents or furnished lessons for other nations
 Through its multi disciplinary enquiry the book offers scholars and students of environmental law legal history and the
 environmental humanities a unique story about the failures and successes in the making of environmental law The ebook

Leaves Samuel Jackson Gardner,1865 **Of Marsupials and Men** Alistair Paton,2022-07-05 A rollicking history of
 Australia s amateur naturalists from settlement to the present A fascinating history of Australia s wildlife and the wilder men
 and women who shot studied and saved it Compelling and entertaining David Hunt *Of Marsupials and Men* recounts the
 fascinating and often hilarious history of the men and women who dedicated their lives to understanding Australia s native
 animals To the first European colonists Australian wildlife was bewildering Marsupials and gum trees seemed strange and
 hostile rabbits sheep and oak trees were familiar and safe A bustling animal trade soon developed in both directions foxes
 starlings and other reminders of home were unleashed on the Australian landscape while countless Australian animals found
 themselves in Europe as stuffed specimens or living curiosities in zoos and private collections Into this picture stepped a
 remarkable band of enthusiastic amateurs who were determined to get to know the fauna of the new colony Equal parts
 inspiring and outlandish over the next 150 years they would advance scientific understanding and transform public attitudes
 to Australian wildlife From the snake men who fearlessly thrust their arms into hollow logs just to see what might happen to
 the top secret plan to smuggle a platypus to Winston Churchill at the height of World War II these are their stories
