Race Markets And Social Outcomes:

Race, Markets, and Social Outcomes Patrick L. Mason, Rhonda M. Williams, 2012-12-06 THE JANUS FACE OF RACE REFLECTIONS ON ECONOMIC THEORY Patrick L. Mason and Rhonda Williams Many economists are willing to accept that race is a significant factor in US economic and social affairs Yet the professional literature displays a peculiar schizophrenia when faced with the task of actually formulating what race means and how race works in our political economy On the one hand race matters when the discussion is focused on anti social behavior social choices and undesired market outcomes Inexplicably African Americans are more likely to prefer welfare lower labor force participation and unemployment On the other hand race does not matter when the subject of discussion is economically productive or socially acceptable activities and legal market choices for example wages and employment This Janus faced construction of race is maintained by economists stubborn adherence to the market power hypothesis The market power hypothesis asserts that racial discrimination and market competition are inversely correlated Discriminatory behavior will persist only in those sectors of society where the competitive forces of the market are least operative When applied to the labor market the market power hypothesis suggests that pre and post labor market decisions represent disjoint sets On average members of a disadvantaged social group may accumulate a lower amount of or a lower quality of productive attributes because of discrimination in marital residential or school choice or because of substantial animosity in day to day interpersonal relations with members of a privileged group Handbook of the Sociology of Racial and Ethnic Relations Hernan Vera, Joe R Feagin, 2007-08-03 The study of racial and ethnic relations has become one of the most studied aspects in sociology and sociological research In both North America and Europe many traditional cultures are feeling threatened by immigrants from Latin America Africa and Asia Sociology is at the hub of the human sciences concerned with racial and ethnic relations Since this discipline is made of multiple paradigms and methodological orientations it has been able to make relevant contributions to disciplines ranging from individual psychology social psychology and psychiatry to economics anthropology linguistics cultural studies health care delivery and education Handbook on the Economics of Discrimination William M. Rodgers, 2009-01-01 The papers contained in the first part of the book are particularly valuable as a primer for researchers interested in economic discrimination On this basis alone this book is recommended for researchers seeking an overview of current techniques for assessing economic discrimination The final section nicely highlights both the importance in understanding the interaction of policy and economic discrimination and the difficulties in isolating policy effects Education Economics Editor Rodgers has compiled a very useful book that summarizes the current state of the literature on economic discrimination This reviewer learned something new and interesting in every chapter and particularly appreciated the clear survey of the age discrimination literature This book will be of value to academics and to those in the legal arena Highly recommended J P Jacobsen Choice Discrimination's dynamic nature means that no single theory method data or study should be relied upon to

assess its magnitude causes or remedies Despite some gains in our understanding these remain active areas of debate among researchers practitioners and policymakers The specially commissioned papers in this volume all by distinguished contributors present the full range of issues related to this complex and challenging problem Part 1 explores innovations in methods and data collection that help to provide richer descriptions of inequality Part 2 reviews empirical evidence on discrimination that people with disabilities older workers and gay lesbian and bisexual individuals face Although discrimination among these groups is not new this Handbook shows that economists are beginning to more fully document their experiences Part 3 presents a balanced discussion of anti discrimination policies and the impact of affirmative action The methods and data chapters are particularly designed to encourage researchers to utilize the new approaches and develop new data sources Accessible and comprehensive the Handbook is the seminal reference on the economics of discrimination for academic and professional economists graduate students advanced undergraduates practitioners policymakers and funders of social science research

12 **Intergovernmental Fiscal Relations** Ronald C. Fisher, 2012-12-06 The main objective of this book is to restate the important theories and evidence from economic analysis concerning intergovernmental fiscal issues More importantly the second objective of the book is to identify gaps in knowledge empirical uncertainties and missing theoretical structures and then to establish a preliminary agenda for new research on this topic The book is organized in two sections The first covers the core body of intergovernmental fiscal relations including optimal size for jurisdictions and assignment of public sector functions the formulation and execution of tax policy in an intergovernmental setting and the appropriate structure and use of intergovernmental transfers In the second section the core knowledge is applied to four major policy areas education welfare fiscal interaction in urban areas and economic development In thinking about a new research agenda the authors call for more current and authoritative estimates of fiscal incidence including interjurisdictional spillovers for more fundamental research about the federation process and effects of consolidation for new evidence about the long run general equilibrium effects of interjurisdictional competition and for basic research about the choice process and establishment of intergovernmental fiscal institutions and policies by federal and subnational governments **Coasean Economics Law and Economics and the New Institutional Economics** Steven G. Medema, 2012-12-06 Upon hearing that Ronald Coase had been awarded the Nobel Prize a fellow economist's first response was to ask with whom Coase had shared the Prize Whether this response was idiosyncratic or not I do not know I expect not Part of this type of reaction can no doubt be explained by the fact that Coase has often been characterized as an economist who wrote only two significant or influential papers The Nature of the Firm 1937 and The Problem of Social Cost 1960 And by typical professional standards of significant and influential i e widely read and cited this perception embodies a great deal of truth even subsequent to Coase's receipt of the Prize This is not to say that there have not been other important works The Marginal Cost Controversy 1946 and The Lighthouse in Economics 1974 come immediately to mind here only that in a random sample of say one hundred economists one would likely find few who could list a Coase bibliography beyond the two classic pieces noted above in spite of Coase's significant publication record The purpose of this collection is to assess the development of tensions within and prospects for Coasean Economics those aspects of economic analysis that have evolved out of Coase's path breaking work Two major strands of research can be identified here law and economics and the New Institutional Economics *The Political Economy of Globalization* Satya Dev Gupta, 2012-12-06 Globalization is transforming the world at an accelerated pace Integration of the world continues widening and intensifying international linkages in economic political and social relations Liberalization of trade and finance lubricated by revolutionary changes in information technology has resulted in significant economic growth at the global level On the other hand the process of globalization is changing the nature of production relations threatening the traditional roles of the nation state and carrying with it far reaching implications for sustainable growth development and the environment Although both developed and developing countries are actively participating in this saga of

globalization nearly ninety countries as the United Nations Human Development Report 1996 indicates are worse off economically than they were ten years ago leading to global polarization between haves and have nots The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries far from narrowing has more than tripled during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development

Dynamics of Globalization and Development Satya Dev Gupta, 2012-12-06 Dynamics of Globalization and Development debates the role of structural adjustment programs and policies the implication of financial liberalization for growth and stability the effects of foreign direct investment and the associated behavior of multinationals in terms of intellectual property rights the diffusion of technology growth and development Many contributors offer innovative insights into the complexities of the process in terms of its micro foundations and propose efficiency based multinational policy frameworks A general thrust of most of the studies in this volume is that the market driven process of globalization alone will not lead to stable and equitable economic growth Consequently several contributors recommend a set of proactive policies to promote greater stability in the system and a more equitable distribution of the benefits of globalization This anthology will provide valuable insights and important background analysis for scholars working in the field of globalization as well as senior undergraduate and graduate students in a variety of curricula including economics finance development studies and international studies

Globalization, Growth and Sustainability Satya Dev Gupta, 2012-12-06 Globalization Growth and Sustainability focuses on the implications of both regional and global trade liberalization and complementary macroeconomics policy reforms on growth equity and sustainability The volume is organized into three sections Part One addresses the issue of economic growth with a special reference to less developed economies Part Two examines the pros and cons of the regional economic integration movement for the countries either participating in or outside of the regional groups Part Three focuses on the issues of equity and sustainability Globalization Growth and Sustainability will provide valuable insights and important background analysis for scholars working in the field of globalization as well as senior undergraduate and graduate students in a variety of curricula including economics development studies and international studies

Glass Walls and Glass Ceilings Margaret Reid, William Miller, Brinck Kerr, 2003-12-30 Reid Kerr and Miller seek to redress the lack of systematic generalizable research on women's representation in state and municipal bureaucracies by focusing specifically on the representation of female managers in high level policy and decision making positions in their agencies or departments Their primary interest is in examining the distribution of women and men in state and municipal administrative and professional positions by agency and over time from 1987 through 1997 in order to determine if first

agency missions are associated with glass walls and glass ceilings and second whether relative to white women African American women and Latinas have made progress in laying claim to a greater share of managerial positions in public sector agencies Their analysis reveals a richly textured and complicated set of factors and interrelationships that vary widely across different policy areas agency contexts and levels of government They show continued patterns of underrepresentation in agencies with regulatory and distributive policy commitments while showing some improvements in those agencies that tend to be traditionally populated by women health welfare and social services for example

African American Males in School and Society Vernon C. Polite, James Earl Davis, 1999 In this groundbreaking and timely volume Vernon Polite and James Earl Davis have brought together the perspectives and research findings of eminent scholars who study the educational and social lives of African American males The result is a volume that brims with new outlooks and viewpoints a refreshing departure from pervasive and oftentimes stereotypical literature about the African American male experience and gives the reader access to prevalent issues affecting this population today Thoughtful attention is paid to broader outcomes such as educational attainment job procurement and quality of life These topics are discussed against the backdrop of student background and schooling with the overall aim of improving the academic and social outcomes of this population At last a comprehensive look at the most salient issues that affect the future of African American men This book provides much more than a ray of hope it is replete with recommendations and practices that if implemented will positively impact educational and social outcomes Every educator and parent who grapples with the dilemma of educating Black boys and young men should read this book Robert Peterkin Ph D Harvard University's Urban Superintendents Program School administrations serious about addressing the underachievement and underdevelopment of African American boys and youths will find in this book theoretical and methodological approaches e g practical just in time strategies for implementation This book will empower readers who are committed to equity and excellence for African American male students Gwendolyn J Cooke Ph D Director Urban Services National Association of Secondary School Principals

African Americans, Labor, and Society Patrick L. Mason, 2001 Over the past twenty five years union participation has declined among the nation as whole Coupled with increasing racial tensions cutbacks in public programs at the federal state and local levels and a shift in the distribution of wealth these changes have undermined the standard of living for American workers families especially African American families as they created greater wealth for the American elite African Americans Labor and Society examines these changes in particular their effects on the entire African American community and suggests a move toward a more egalitarian future This collection of essays written by legal scholars professional organizers and economists suggests integrating civil rights and labor laws to strengthen both anti discrimination and union organizing efforts The volume demonstrates the negative effects for union workers of arbitration agreements that undermine civil rights legislation in the workplace It also provides a detailed case study of the nature and extent of racial conflict within a major industrial union and

analyzes and suggests policy changes that would increase the political and economic power of American workers as a whole while aggressively attacking racism in social economic and political institutions African Americans Labor and Society presents strategies for creating better opportunities for African Americans through private sector employment that will appeal to legal union and labor students and scholars as well as economists

Transmitting

Inequality Yuval Elmelech, 2008-05-21 While the United States is the world's richest nation the distribution of private property and wealth among Americans is often comprised of alarmingly disparate portions With a rapidly aging and increasingly diverse population the interdependence between generations institutions and social spheres has become essential to social stratification processes in contemporary American society In this authoritative work Yuval Elmelech investigates the role that family transactions of material resources play in the stratification system Drawing on empirical evidence from a broad array of sources *Transmitting Inequality* provides an interdisciplinary framework for examining the social demographic and institutional structures that shape the distribution of property and wealth in the United States

Handbook of Income Inequality Measurement Jacques Silber, 2012-12-06 Amartya Sen Equality I spoke the word As if a wedding vow Ah but I was so much older then I am younger than that now Thus sang Bob Dylan in 1964 Approbation of equality varies not only with our age though it is not absolutely clear in which direction the values may shift over one's life

time but also with the spirit of the times The 1960s were good years for singing in praise of equality The spirit of the present times would probably be better reflected by melodies in admiration of the Federal Reserve System And yet the technical literature on the evaluation and measurement of economic inequality has grown remarkably over the last three decades Even as actual economic policies especially in North America and Europe have tended to move towards focusing on virtues other than the avoidance of economic inequality the professional literature on assessing and gauging economic inequality has taken quite a jump forward A great many different problems have been addressed and effectively sorted out and new problems continue to be posed and analyzed The Contents A Review Jacques Silber has done a great service to the subject by producing this collection of admirably helpful and illuminating papers on different aspects of the measurement of income inequality The reach of this collection is quite remarkable Along with a thorough overview from the editor himself the major areas in this complex field have been carefully examined and accessibly discussed
