Regionalism Multilateralism And Economic Integration The Recent Experience:

Global Politics of Regionalism Mary Farrell, Björn Hettne, Luk Van Langenhove, 2005-08-20 This book explores the phenomenon of regionalism

In a seeming contradiction to globalization there is a growing tendency for countries to enter into regional arrangements as a response to the pressures of operating in a global marketplace. But regionalism is also emerging as a phenomenon in its own right serving distinct purposes and taking different forms in different areas. The contributors explore how these patterns impact on wider issues such as global governance, democracy and trade. The book reviews the major theoretical approaches to regional cooperation including perspectives from international relations, political economy, economics and sociology. It is divided into three main sections: theoretical approaches to regionalism; issues of regional cooperation such as security, monetary issues, identity and integration; and an exploration of specific case studies including the Middle East, Africa, the Americas, China, Europe, Asia and the Pacific. With an international range of contributors including Bjorn Hettne, Louise Fawcett and Andrew Hurrell, this in-depth and multi-disciplinary guide will be of interest to students across the social sciences and to the wider policy community.

Regionalism in International Investment Law Leon Trakman, Nicola Ranieri, 2013-03-07. Regionalism in International Investment Law provides a multinational perspective on international investment law. In it, distinguished academics and practitioners provide a critical and comprehensive understanding of issues in a field which has grown exponentially in its importance, particularly over the last decade, focusing on the European Union, Australia, North America, Asia and China. The book approaches the field of foreign direct investment from both academic and practical viewpoints and analyzes different bilateral, regional and multinational agreements, often yielding competing perspectives. The academic perspective yields a strong conceptual foundation to often misunderstood elements of international investment law, while the practical perspective aids those actively pursuing foreign direct investment in better understanding the landscape, identifying potential conflicts which may arise in more accurately assessing the risk underlying the issues in conflict and in resolving those issues. Thorny issues relating to global commerce, sovereignty, regulation, expropriation, dispute resolution and investor protections are covered, depicting how they have developed and are applied in different regions of the world. These different treatments ensure that readers are able to grasp the subject matter at multiple levels and provide a comprehensive overview of developments in the field of foreign direct investment.

The European Union in the Security of Europe Steve Marsh, Wyn Rees, 2012-03-12. This book examines the European Union's contribution to providing security in Europe amidst an increasingly complex and challenging environment. In this new and comprehensive guide to the EU's role in security since the end of the Cold War, the authors offer an explanation of EU internal and external security regimes and argue that the Union has become an important exporter of security within its region. However, the Union's rhetorical ambitions and commitments continue to outstrip its capabilities and it lacks both a common conceptualisation of security and a meaningful shared strategic culture. Drawing extensively on primary sources, the book examines the Union's relations with the US and Russia in a time of shifting geostrategic calculations and priorities. With the EU capacity for enlargement slowing, this text presents a detailed assessment of EU security policies towards Central Europe, the

Mediterranean the Western Balkans Eastern Europe and South Caucasus European Union Security will be of interest to students and scholars of the EU security studies and international relations

"L'être situé", Effectiveness and Purposes of International Law Shotaro Hamamoto, Hironobu Sakai, Akiho Shibata, 2015-05-26 The traditional and mainstream conception of international law presupposes a certain ideal type of State. However, each State is situated in a particular context, an *Etat situ*, and the universal, impartial and non-discriminatory application of international law to each State often produces unjustifiable results in the real world. International law thus needs to cope with this existential question in order to ensure and maintain the effectiveness of the international legal order without, however, being trapped by a nihilistic relativism. This approach requires a flexible understanding and reconstruction of the international law making theory. The present collection of essays gathers contributions written in honour of Professor Ryuichi Ida by his colleagues and former students inspired by the *dicataire* who places particular emphasis upon the context, effectiveness and purposes of international law. The *dicataire's* perspective finds wide-ranging applications and the present collection deals with international economic law, international criminal law, international environmental law, international law making, the law of State responsibility and the law of international organizations. Contributors are Tatsuya Abe, Pierre Marie Dupuy, Shotaro Hamamoto, Machiko Kanetake, Tomohiko Kobayashi, Tomonori Mizushima, Hironobu Sakai, Akiho Shibata, Mari Takeuchi, Dai Tamada, Sakda Thanitcul, Zhi'an Wang and Takuhei Yamada.

Theory and Practice of Harmonisation Mads Andenas, Camilla Baasch Andersen, 2012 Harmonised and uniform international laws are now being spread across different jurisdictions and fields of law, bringing with them an increasing body of scholarship on practical problems and theoretical dimensions. This comprehensive and insightful book focuses on the contributions to the development and understanding of the critical theory of harmonisation. The contributing authors address a variety of different subjects concerned with harmonisation and the application of legal rules resulting from harmonisation efforts. This study is written by leading scholars engaged in different aspects of harmonisation and covers both regional harmonisation within the EU and regional human rights treaties as well as harmonisation with international treaty obligations. With comparative analysis that contributes to the development of a more general theory on the harmonisation process, this timely book will appeal to EU and international law scholars and practitioners as well as those looking to future legal harmonisation in other regions in Asia, Latin America and Africa.

Climate and Trade Policy Carlo Carraro, Christian Egenhofer, 2007-01-01 The difficulty of achieving and implementing a global climate change agreement has stimulated a wide range of policy proposals designed to favour the participation of a large number of countries in a global cooperative effort to control greenhouse gas emissions This significant book analyses the viability of controlling climate change through a set of regional or sub global climate agreements rather than via a global treaty The authors argue that the principal challenge in devising a truly global architecture is in providing sufficient incentives for all party participation whilst also ensuring compliance which raises global governance issues The main purpose of this study is not to trace in detail the process of negotiation and implementation of international regimes but rather to evaluate whether a series of regional or sub global agreements is more likely to achieve climate change control than a global agreement attempted from the outset From a political science perspective the focus centres on institution building and governance From an economic perspective it concentrates on incentives used to encourage participation in a global and non fragmented agreement Lessons from EU integration and actual global and regional trade agreements are employed in order to analyse the future prospects of climate change

negotiations The focus on climate change and more generally the management of environmental and resource problems will make this book essential reading for participants observers and analysts of the public policy process as it concerns climate change and more generally the management of environmental and resource problems In addition the rich combination of international relations theory and economic literature with findings from the policy process will appeal to both general readers and the academic community
