Regions State And Identity In Central And Eastern Europe:

Region, State and Identity in Central and Eastern Europe Judy Batt, Katarzyna Wolczuk, 2013-01-11 The papers that comprise this collection examine the role of competing European national ethnic and regional identities over the introduction of new regional levels of government in the former Soviet and now Central and Eastern European states *Law, Culture and Identity in Central and Eastern Europe* Cosmin Cercel, Alexandra Mercescu, Mirosław Michał Sadowski, 2023-12-01 Combining insights from comparative legal theory jurisprudence and legal history this collection examines the legal and constitutional identity of Central and Eastern Europe Although the various countries of Central and Eastern Europe have often compared themselves to the West the failure of these countries to engage with one another has resulted in a whole spectrum of legal identities remaining hidden This book takes up a comparison of such identities within the region of Central and Eastern Europe and following from the prima facie similarity between the region's countries given the experience of communism and legal transfers The book thereby illuminates through comparisons the distinct legal identities of the 16 Central and Eastern European states whilst at the same time arguing for a shared Central and Eastern European legal identity This book will appeal to scholars and students in the area of comparative law as well as lawyers political scientists sociologists and historians with particular interests in Central and Eastern Europe **Economic Convergence and Divergence in Europe** Gertrude Tumpel-Gugerell, Peter Mooslechner, 2003-01-01 Recoge 1 Introductory session 2 Past convergence within the European Union 3 Accession countries achievements in real convergence 4 Accession countries how to balance real and nominal convergence challenges for monetary and exchange rate policy 5 Does the financial sector contribute to real growth 6 Is there somebody left out in the cold prospects of CEE countries other than current accession countries 7 Policy challenges within the enlarged EU how to foster economic convergence **Social and Economic Development in Central and Eastern Europe** Grzegorz Gorzelak, 2019-08-13 The integration of post socialist Central and Eastern Europe into the EU is one of the success stories of European development The region has seen significant economic convergence dramatic changes in socio economic indicators and improvements in the natural environment However some challenges remain such as political divergence public governance issues and population demographics This book identifies and analyses the key post 1990 developments across the New Member States at the sub national and national levels with frequent country level and regional comparisons Careful attention is paid to drawing out commonalities in development trajectories while appreciating each country's unique context Drawing on the academic literature and illuminating empirical material the broad range of topics discussed in the book paints a detailed picture of both change and stability in Central and Eastern Europe It will be valuable reading for advanced students researchers and policymakers in regional studies European studies human geography political economy and transition economics The New World Architecture Jose Magone, 2017-07-28 The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a

power vacuum in the 1990s that the European Union has only reluctantly begun to fill. It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations. After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s. With respect to its international role, reorganization of the EU's external relations department was high on the list. *The New World Architecture* explores the contribution that the European Union is making to the emerging global governance system. It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems. It explores three regimes of governance that are contributing to holding together the new emerging EU multilevel governance system. None of these is complete; all are partial. They include the political regime of governance, the socioeconomic regime of governance, and the territorial regime of governance. The author assesses the impact of the European Union on global politics. The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation. Magone argues that within the next twenty-five years global governance may and should emerge as the new and reconfigured stable system of international relations. In this system the European Union is and will remain the most advanced regional system. This volume will be of interest to specialists, scholars, and students of European Politics and the European Union.

Central and Eastern European Economies Marcus Goncalves, Erika Cornelius Smith, 2016-07-25. Nearly seven decades ago six countries in Western Europe: Belgium, France, West Germany, Italy, Luxembourg, and the Netherlands decided to take economic cooperation to the next level. The vision of the EU founding states epitomized by the Schuman Declaration in 1950 was to tie their economies so closely together that war would become impossible. Robert Schuman, author of the plan, believed Europe could not be made all at once or according to a single plan. It would have to be built through concrete achievements which first create a de facto solidarity. The countries within the European Community benefited enormously from free trade and common economic policies, in particular structural funds designed to foster convergence by funding infrastructure and investments in poorer regions. This book examines how similar transitions and integration into the European Union are experienced in individual central and eastern European states through the use of country scans in the regional blocks of CEE, SEE, and CIS.

Borders in Post-Socialist Europe Tassilo Herrschel, 2016-04-08. Borders have attracted considerable attention in public and academic debates in light of the impact of globalisation and in Europe the end of the divisions of the Cold War era. Instead of being inside or outside of the EU has become a major paradigmatic divide between claimed spheres of influence by Brussels and Moscow respectively. In the aftermath of the end of communism established certainties no longer seemed to apply. And this included many of the borders within the former eastern Bloc, with some losing their relevance while others reassert themselves. As its particular contribution, this book adopts a symbiotic approach to the analysis of borders, drawing on a political economy perspective while also recognising the importance of the

socio cultural dimension as found in border studies This seeks to do greater justice to the complex composite nature of borders as geo political state legal and cultural historic constructs in both theory and practice In addition the book s approach stretches across spatial scales to capture the multi level nature of borders The first part of the book presents the conceptual framework as it sets out to embrace this multi faceted multi layered nature of borders In the second part case studies from north central Europe including the Baltic Sea Region exemplify the complexity of borders in the context of post socialist transformation and continuing EU isation

Resilient States From A Comparative Regional Perspective: Central And Eastern Europe And Southeast Asia Francois Bafoil,2013-01-28 Organizations such as ASEAN and EU were formed to promote economic growth social progress and cultural development among their members This book provides a comprehensive overview of the transformation which the newest members of ASEAN Cambodia Laos Myanmar and Laos and the newest members of EU ten new Members from Baltic Central and Eastern Balkan regions have experienced during the last two decades 1990 2010 It throws light on the different social economic and political causes which support these historical changes Emerging markets such as the Mekong region and Central Europe where new forms of capitalism are flourishing have been captured in this book Their policies in privatization regionalization industrial growth that support a new and deregulated form of capitalism have been mentioned in detail The author stresses upon the capacity and strengths of these two hitherto weak states to face worldwide and regional challenges

Identities, Nations and Politics after Communism Roger E. Kanet,2013-10-18 This book focuses on questions of identity that have confronted the countries of Central and Eastern Europe after the collapse of the communist system that had previously provided them with an identity This development both facilitated and necessitated a reassessment of the now independent nations history orientation symbols and identity In some cases new states were created without a clear national identity while in others the nation was regaining statehood but not always within borders that had an historical association with the nation concerned The multiethnic character of the space of the former Soviet Union and its erstwhile satellites and the long historical legacy of complex relations boundary changes population migration and economic and social changes presented different challenges to the various nations and states concerned The essays in this volume attempt to elucidate and understand the issues of ethnic and national identity and their relationship to the emerging statehood in various regions of the post communist world This study makes clear that some nation states were far better prepared to handle these issues than others and that the longer term impact of the communist experience has varied This book was previously published as a special issue of Nationalities Papers

Dynamics of National Identity and Transnational Identities in the Process of European Integration Elena Marushiakova,2021-02-03 This collection was inspired by the international conference Dynamics of National Identity and Transnational Identities in the Process of European Integration organized by the Balkan Ethnology Department of the Ethnographic Institute and Museum at the Bulgarian Academy of Sciences and realized as project of the European

Commission Jean Monnet Action Program for the support of Study and Research Centers The book opens a debate on the changing notions of identity in the region of Central and Eastern Europe on the base of analysis of social developments influenced by EU accession and EU integration process The most important aspect is the analysis of processes of breaking up the borders of national identity and transition towards new forms of transnational identities and emerging of consciousness of All European unity The book has a dual focus on general topics related to the study of national and transnational identities and on the process of European integration It brings together the work of researchers not only from different parts of Europe from France to Russia but from USA and Asia too This book is a starting point for East West discussion and brings new knowledge that will be an invaluable contribution to the common European research area *National Identity in Serbia* Vassilis Petsinis, 2019-12-12 The autonomous province of Vojvodina in Serbia is little known in the English speaking world even though it is a territory of high significance for the development of Serbian national identity Vojvodina s multi ethnic composition and historical experience has also encouraged the formation of a distinct regional identity This book analyses the evolution of Vojvodina s identity over time and the unique pattern of ethnic relations in the province Although approximately 25 ethnic communities live in Vojvodina it is by no means a divided society Intercultural cohabitation has been a living reality in the province for centuries and this largely accounts for the lack of ethnic conflict Vassilis Petsinis explores Vojvodina s intercultural society and shows how this has facilitated the introduction of flexible and regionalized legal models for the management of ethnic relations in Serbia since the 2000s He also discusses recent developments in the region most notably the arrival of refugees from Syria and Iraq and measures the impact that these changes have had on social stability and inter group relations in the province **World Directory of Minorities** Bridget Anderson, James Chin, John Connell, Patrick Costello, Lindsey Crickmay, Chris Dammers, James Ferguson, David Hawk, David McDowall, Anna Matveeva, Julia Maxted, Neil Melvin, Peter O'Neill, Suzanne Pattle, Martyn Rady, Javaid Rehman, Alex Roslin, Nikhil Roy, David Sogge, Bogdan Szajkowski, Carl Wilson, Abebe Zegeye, 1997-01-01 This publication is the first version of the World Directory of Minorities and Indigenous Peoples published in 1997 The full Directory is now available and continually updated on our website The large majority of violent conflicts in the world today are conflicts within states with groups polarized across ethnic and religious divides and not across borders Ethnic religious and linguistic minorities are often among the poorest of the poor suffer discrimination and are frequently the victims of human rights abuses Time and time again in the past the United Nations system governments and even non governmental organizations NGOs working in the field of conflict prevention have failed to promote the human rights of minorities or to take early action to promote cooperation between communities Early action may have prevented the loss of millions of lives in many countries ranging from Rwanda to the former Yugoslavia and from Sri Lanka to Guatemala It is also significant that the Nobel Peace Prize was awarded to the Dalai Lama in 1989 and to Jose Ramos Horta and Bishop Carlos Belo in 1996 as a result of their peaceful campaigns to promote the rights of their people

The situation of minorities is then a matter of major concern and it is essential that accurate objective and up to date information is made available This Directory contributes to that process It is difficult to assess accurately what proportion of the world s population identify themselves as belonging to minority communities Conservative estimates place this above 10 per cent and some suggest that more than 20 per cent of the world s population belongs to several thousand different minority groups and subgroups National statistics are often skewed for political reasons and there is no universally accepted definition of minorities The word has different interpretations in different societies throughout the world while the United Nations General Assembly has not sought to reach a definition beyond that implied in the title of the UN Declaration on the Rights of Persons belonging to National or Ethnic Religious and Linguistic Minorities adopted in December 1992 Minority Rights Group focuses its work on non dominant ethnic religious and linguistic communities whether or not they are numerical minorities The concept thus relates to any self identified community that is marginalized without power unable to take decisions over its destiny and often experiencing high levels of illiteracy under education and overt or covert discrimination The basic rights of such communities need protection and promotion There is however a danger of generalizing about minorities and forgetting the complexity of their social composition including the rural poor urban migrants older people women and children These groups may be considered as doubly vulnerable What makes their situation particularly problematic is that there is often a deliberate political policy on the part of majorities and states not to give due regard to the legitimate interests of minorities while members of minorities see their identity as central to their social and economic situation They are often excluded from political power and decision making in the development process without equal opportunities to secure a better quality of life One further danger may lie in regarding ethnicities as fixed rather than as the potentially fluid phenomena that they often are Situational ethnicity does occur and individuals and groups do modify their self identifications depending on circumstances Please note that the terminology in the fields of minority rights and indigenous peoples rights has changed over time MRG strives to reflect these changes as well as respect the right to self identification on the part of minorities and indigenous peoples At the same time after over 50 years work we know that our archive is of considerable interest to activists and researchers Therefore we make available as much of our back catalogue as possible while being aware that the language used may not reflect current thinking on these issues

Politics and Security of Central and Eastern Europe Ryszard Zięba, 2023-02-14 This book analyzes major contemporary political and security problems in Central and Eastern Europe CEE Presenting case studies on various CEE countries it highlights the persistence of non democratic political trends in the region with particular emphasis on authoritarianism in Belarus and the illiberal shift in the politics of Hungary and Poland Also the book examines the growing geopolitical and military rivalry between the West and Russia in the CEE region which led to Russia s invasion of Ukraine After addressing the increasing involvement of external entities such as NATO the EU the USA Germany France and China it highlights serious internal and external

challenges to the democratic institutions and international security of CEE that call for new formats of multilateral cooperation to be established by the region's countries. This book is intended for scholars and students of European politics, international relations and security studies and for anyone interested in the political and security challenges facing the CEE region.

The Politics of Diversity in Europe Gavan Titley, Alana Lentin, 2008-01-01. Diversity has become a key term in contemporary social politics and is often used as both a description of complex social realities and a normative prescription for how those realities should be valued, influenced by the politics of multiculturalism and by social movements asserting the right to be different. Diversity has emerged as an open, fluid discourse that challenges reductive visions of legitimate identities and human possibilities. It is this apparent acceptance of diversity as a fact and value that this book looks at in several ways: it offers a countervailing assessment of diversity, seeing it less as a unifying social imaginary and more as a cost-free form of politics attuned to the needs of late capitalist consumer societies. The essays collected here are developed from a research seminar entitled Diversity, Human Rights and Participation organised by the Partnership on Youth between the Council of Europe and the European Commission. The studies gathered here are embedded in 10 different national contexts. They track dimensions of diversity in education, social services, jurisprudence, parliamentary proceedings and employment initiatives and assess their significances for the social actors who must negotiate these frameworks in their daily experience.

Extra-Territorial Ethnic Politics, Discourses and Identities in Hungary Szabolcs Pogonyi, 2017-07-19. This book explores the causes and consequences of the discursive and legal construction of the Hungarian transborder nation through the institutionalization of non-resident citizenship and voting. Through the in-depth analysis of Hungarian transborder and diaspora politics, this book investigates how the political engagement of non-resident Hungarians impacts inter and intra-state ethnic relations. In addition, the research also explores how institutional changes and shifting discursive strategies reify and redefine ethnic belonging narratives and the self-perception of Hungarians living outside the country. The research uses a multidisciplinary qualitative methodology which includes institutional, historical, rational choice and sociological analysis, discourse analysis as well as interpretive methods. Through the inventive application of multiple methodologies, the book goes beyond the mostly institutional, legal analysis dominant in the study of citizenship.

Religion as Securitization in Central and Eastern Europe András Máté-Tóth, Kinga Povedák, 2024-09-18. Religion as Securitization in Central and Eastern Europe examines the significance of securitization theory as a reference point in understanding current religious, socio-cultural and political processes in Central and Eastern Europe, CEE. It explores contemporary social processes and discourses on security linked to religion and religious institutions. CEE has experienced many confluences of security issues with religious interpretations and world views. For instance, the international refugee and migration crisis could not be separated from the counterpoint between Christianity and Islam in political discussions. Similarly, the debates on LGBT family recognition and the traditional family model are inseparable from the Christian family as a reference point. The security

needs of the region are particularly acute trigger points which can be instrumentalized by political power In other words the threat sensitivities of collective identity make the region particularly well suited to being a focus of securitization both from the host side and from the discourses that are enforced from above In this volume the authors approach the validity of securitization in relation to religion and religion itself as securitization from a broader perspective They show not only what religious facts and aspects have become threatening in the process of securitization but also that the function of religion in the CEE region can be described and understood primarily as securitization This unique collection of studies offers a comprehensive theoretical and methodological approach while the case studies are drawn from more than seven countries in the region by leading scholars The book will be of interest to scholars from a wide range of disciplines including political science history anthropology and religious studies It will also function as an important introductory work for students to this specific area of research

Challenging Identities Peter Madsen, 2016-08-12 Identity is a keyword in a number of academic fields as well as in public debate and in politics During the last decades references to identity have proliferated yet there is no simple definition available that corresponds to the use of the notion in all contexts The significance of the notion depends on the conceptual or ideological constellation in which it takes part This volume on one hand demonstrates the role of notions of identity in a variety of European contexts and on the other hand highlights how there may be reasons to challenge the use of the term and corresponding social cultural and political practices Notions of national identity and national politics are challenged by European integration as well as by the increasing demographic heterogeneity due to migration and migrants experience conflicts of identification stemming from clashes between cultural heritage and the cultures of the new habitat European horizons frames of mind historical memories and expectations at the level of groups or communities at the national level and at the general European level are at odds Analyzing a series of issues in European countries from Turkey to Spain and from Scandinavia to the Balkans the contributions demonstrate uses and abuses of the notion of identity

Forging Architectural Tradition Dragan Damjanović, Aleksander Łupienko, 2022-03-11 During the nineteenth century a change developed in the way architectural objects from the distant past were viewed by contemporaries Such edifices be they churches castles chapels or various other buildings were not only admired for their aesthetic values but also for the role they played in ancient times and their role as reminders of important events from the national past Architectural heritage often was and still is an important element of nation building Authors address the process of building national myths around certain architectural objects National narratives are questioned as is the position architectural heritage played in the nineteenth and the early twentieth centuries

The Routledge Handbook to Regional Development in Central and Eastern Europe Gábor Lux, Gyula Horváth, 2017-07-06

Twenty five years into transformation Central and Eastern European regions have undergone substantial socio economic restructuring integrating into European and global networks and producing new patterns of regional differentiation and development Yet post socialist modernisation has not been without its contradictions manifesting in increasing social and territorial inequalities Recent studies also suggest there are apparent limits to post socialist growth models accompanying a new set of challenges within an increasingly uncertain world Aiming to deliver a new synthesis of regional development issues at the crossroads between post socialism and post transition this book identifies the main driving forces of spatial restructuring in Central and Eastern Europe and charts the different regional development paths which take shape against the backdrop of post crisis Europe A comparative approach is used to highlight common development challenges and the underlying patterns of socio economic differentiation alike The issues investigated within the Handbook extend to a discussion of the varied economic consequences of transition the social structures and institutional systems which underpin development processes and the broadly understood sustainability of Central and Eastern Europe s current development model This book will be of interest to academics and policymakers working in the fields of regional studies economic geography development studies and policy
