Regulatory Competition and Economic Integration Daniel C. Esty, Damien Geradin, 2001 Cambridge Yearbook of European Legal Studies Vol 2, 1999 Alan Dashwood, Angela Ward, 2000-10-09 The Cambridge Yearbook of European Legal Studies provides a new forum for the scrutiny of significant issues in European Union Law the Law of the Council of Europe and Comparative Law with a European dimension and particularly those which have come to the fore during the year preceding publication The contributions appearing in the collection are commissioned by the Centre for European Legal Studies CELS Cambridge which is the research Centre of Cambridge University Law Faculty specialising in European legal issues The papers presented are all at the cutting edge of the fields which they address and reflect the views of recognised experts drawn from the University world legal practice and the civil services of both the EU and its Member States Inclusion of the comparative dimension brings a fresh perspective to the study of European law and highlights the effects of globalisation of the law more generally and the resulting cross fertilisation of norms and ideas that has occurred among previously sovereign and separate legal orders The Cambridge Yearbook of European Legal Studies is an invaluable resource for those wishing to keep pace with legal developments in the fast moving world of European integration INDIVIDUAL CHAPTERS Please click on the link below to purchase individual chapters from Volume 2 through Ingenta Connect www.ingentaconnect.com SUBSCRIPTION TO SERIES To place an annual online subscription or a print standing order through Hart Publishing please click on the link below Please note that any customers who have a standing order for the printed volumes will now be entitled to free online access www.hartjournals.co.uk/cyels/subs Editorial Board Philip Allott Tony Arnall Catherine Barnard Alan Dashwood Dan Goyder CBE Rosa Greaves Bob Hepple David O Keefe Lord Lester of Herne Hill QC David Vaughan QC Angela Ward David Williams Q C D A Wyatt Q C Founding Editors Alan Dashwood and Angela Ward

The Oxford Handbook of European Union Law Anthony Arnall, Damian Chalmers, 2015 Since its formation the European Union has expanded beyond all expectations this seems set to continue as more countries seek accession and the scope of EU law expands touching more and more aspects of its citizens lives The EU has never been stronger and yet it now appears to be reaching a crisis point beset on all sides by conflict and challenges to its legitimacy Nationalist sentiment is on the rise and the Eurozone crisis has had a deep and lasting impact The European Union has the complexity and depth of a mature legal system albeit one which is constantly in flux and whose content and foundations are constantly contested Its law has developed beyond the single market and institutional matters into many other fields including environmental fiscal labour immigration and criminal law It is studied at undergraduate and postgraduate level throughout the Member States and beyond an understanding of it is essential to those who study the EU from other disciplinary perspectives as well as to legal practitioners and policy makers The Oxford Handbook of European Union Law comprises eight sections examining how we are to conceptualise EU law the architecture of EU law making and administering EU law the economic constitution and the

citizen regulation of the market place economic monetary and fiscal union the Area of Freedom Security and Justice and what lies beyond the regulatory state Each chapter summarises analyses and reflects on the state of play in a given area and suggests how it is likely to develop in the foreseeable future The resulting collection provides a vivid and provocative tapestry which will be widely used both inside and outside academia by those who are interested in the law underpinning the EU and its policies

A Framework for European Competition Law Christopher Townley, 2018-11-29 This book asks whether the current push to increase uniformity in substantive and procedural competition policy and enforcement in Europe as well as in related institutional structures is desirable It focuses on European Union EU competition policy and enforcement related to Articles 101 and 102 TFEU and the merger rules the equivalent rules in the Member States and the relationships between these different legal orders Uniformity has many benefits yet the advantages of diversity are also legion enabling more policy experimentation and innovation and improving the ability to accommodate national preferences Contrary to the overwhelming view of academics practitioners and regulators in this area the book argues that uniformity is insufficient and examines ways of achieving a better mix of uniformity and diversity the EU's motto is United in Diversity To achieve this better mix the book offers a new framework for European competition law Coordinated Diversity Finally this book discusses whether Coordinated Diversity fits with the current legal order in the EU as well as the EU constitutional settlement more generally and suggests some ways that it might be made compatible with this order with relative ease The book's impact could be significant changing the results in individual cases the way cases are argued and what information is relevant More importantly it builds the theoretical foundations for fundamentally altering the way in which the EU and the Member States competition authorities interact allowing space for disagreement and uncertainty The aim is to improve the efficiency and effectiveness of competition policy making and enforcement in Europe It should also increase the legitimacy in this field rebalancing towards the Member States Coordinated Diversity provides a new way of seeing the EU that better blends difference when this is demanded with uniformity and its benefits as necessary A timely and ambitious work this book will be read with interest by all practitioners and academics interested in EU competition law as well as the related fields of political science and economics

EU Economic Law in a Time of Crisis Harri Kalimo, Max S. Jansson, 2016-02-26 How has the EU's economic crisis affected the development of economic law in the Union This book contributes to the debate by examining EU economic law from a contextual and policy oriented perspective The expert authors explore areas such as the EMU and the internal market and emphasize the important fields of public procurement taxation and intellectual property rights The investigation proceeds along themes such as harmonization institutional interplay non economic values and international actions The authors conclude that during the crisis the attention of the Barroso Commission focused quite narrowly on the most urgent problems failing to consider longer term issues to spark off bold policy endeavours and break inter institutional blockages This book is targeted at scholars policy makers and other practitioners as well as students interested in EU

economic law integration and the economic crisis Green Giants? Norman J. Vig, Michael G. Faure, 2004 An examination of current environmental policy trends in the United States and the European Union and the implications for future transatlantic and global cooperation

National Remedies Before the Court of Justice Michael Dougan, 2004-12-21 The Court of Justice has delivered an extensive body of caselaw concerning the obligation of domestic courts to provide effective judicial protection to claimants relying upon Community law rights including such landmark judgments as *Factortame* and *Francovich*. This book offers a critical analysis of the Court's fast changing approach to national procedural autonomy and explores the difficult conceptual framework underpinning the caselaw. The author demonstrates how Community intervention in the domestic systems of judicial protection cannot remain unaffected by wider debates about the evolving European integration project in particular the tension between uniformity and differentiation as competing values influencing the exercise of Community regulatory competence. Because of its emphasis on an ideal of uniformity which has become increasingly untenable within the contemporary Community legal order much of the existing academic discourse about national remedies and procedural rules now seems ripe for reconsideration. It is argued that the Court's jurisprudence on the decentralised enforcement of Treaty norms needs to be interpreted afresh having regard to the recent growth of regulatory differentiation within the Community system. *National Remedies Before the Court of Justice* provides a challenging account of this crucial field of EU legal studies. It includes detailed discussion of issues such as Member State liability in damages, Community control over national limitation periods and the principles governing state aid and competition law enforcement. This book is of value to academics and practitioners alike.

EU Law and Economics Armin Steinbach, 2024-12-17 The intersection between law and economics is a dynamic field of research. Yet European law has so far not been the subject of comprehensive systematic economic analysis. Instead issues such as the European debt crisis, COVID-19 pandemic and the climate emergency have largely escaped scholarly analysis through the nexus of EU law and economics. *EU Law and Economics* closes this gap providing an overview of the application of economics to the institutional, procedural and substantive aspects of European law. Drawing on various branches of the economic sciences including rational choice and game theory and institutional and behavioural economics, this book goes beyond conventional methods of EU legal scholarship to expand our understanding of EU law and its effects. This book devotes attention to EU Treaties and secondary law as well as their adjudicative interpretation while using economic theory to explain their core legal principles such as conferral, subsidiarity and mutual recognition. Systematic and original, this book offers additional descriptive and normative metrics that expand our understanding of the decision-making behaviour of EU institutions and member states while opening a new dialogue between two distinct disciplines. Economics, Evolution and the State Kurt Dopfer, 2005-01-01 This book focuses on the emerging field of evolutionary economic policy, highlighting the

interface between the state markets and the evolutionary complexity of modern economies The contributors explore the possibilities and limitations of governance and provide a unique platform for the advancement of modern evolutionary economic theory

Mutual Recognition as a New Mode of Governance Susanne Schmidt, 2013-10-18 Mutual recognition is generally forgotten in debates about new modes of governance even though it is a particular powerful example Its invention was crucial for the completion of the European Union's single market and in the late 1990s it was transferred to the field of Justice and Home Affairs Outside of the EU mutual recognition is also gaining in importance This book discusses mutual recognition in the context of the debate on new modes of governance and analyzes its potential to solve governance problems focusing on the preconditions it needs for its functioning e.g. trust of the Member states the positive implications of achieving coordination through it as well as its negative side effects e.g. the danger of a regulatory race to the bottom Particular focus is on the contentious services directive as a prominent example of using mutual recognition In addition contributions look at the application of mutual recognition in the market for goods in the area of Justice and Home Affairs in tax policy and in the World Trade Organization so that the book achieves a comprehensive assessment of mutual recognition as a new mode of governance This book was previously published as special issue of the Journal of European Public Policy

The World Trade Organization and Trade in Services Kern Alexander, Mads Tønnesson Andenæs, 2008 The World Trade Organisation plays the primary role in regulating international trade in goods services and intellectual property Traditionally international trade law and regulation has been analysed primarily from the trade in goods perspective Services are becoming an important competence for the WTO The institutional legal and regulatory influence of the General Agreement on Trade in Services GATS on domestic economic policymaking is attracting increasing attention in the academic and policymaking literature The growing importance of services trade to the global economy makes the application of the GATS to trade in services an important concern of international economic policy The GATS contains important innovations that build on the former GATT and existing WTO GATT trade regime for goods This book fills a void in the academic and policymaking literature by examining how the GATS governs international trade in services and its growing impact on the regulatory practice of WTO member states It offers a unique discussion of the major issues confronting WTO member states by analysing the GATS and related international trade issues from a variety of perspectives that include law political economy regulation and business Moreover the role of the WTO in promoting liberalised trade and economic development has come under serious strain because of the breakdown of the Doha Development Round negotiations The book analyses the issues in the Doha services debate with some suggested policy approaches that might help build a more durable GATS framework The book is a welcomed addition to the WTO literature and will serve as a point of reference for academics policymakers and practitioners

Theory and Practice of Harmonisation Mads Andenas,Camilla Baasch Andersen,2012 Harmonised and uniform international laws are now being spread across different jurisdictions and fields of law bringing with them an increasing body of scholarship on practical problems and theoretical dimensions This comprehensive and insightful book focuses on the contributions to the development and understanding of the critical theory of harmonisation The contributing authors address a variety of different subjects concerned with harmonisation and the application of legal rules resulting from harmonisation efforts This study is written by leading scholars engaged in different aspects of harmonisation and covers both regional harmonisation within the EU and regional human rights treaties as well as harmonisation with international treaty obligations With comparative analysis that contributes to the development of a more general theory on the harmonisation process this timely book will appeal to EU and international law scholars and practitioners as well as those looking to future legal harmonisation in other regions in Asia Latin America and Africa

Rough Consensus and Running Code Gralf-Peter Calliess,Peer Zumbansen,2010-05-31 Private law has long been the focus of efforts to explain wider developments of law in an era of globalisation As consumer transactions and corporate activities continue to develop with scant regard to legal and national boundaries private law theorists have begun to sketch and conceptualise the possible architecture of a transnational legal theory Drawing a detailed map of the mixed regulatory landscape of hard and soft laws official unofficial direct and indirect modes of regulation rules recommendations and principles as well as exploring the concept of governance through disclosure and transparency this book develops a theoretical framework of transnational legal regulation Rough Consensus and Running Code describes and analyses different law making regimes currently observable in the transnational arena Its core aim is to reassess the transnational regulation of consumer contracts and corporate governance in light of a dramatic proliferation of rule creators and compliance mechanisms that can no longer be clearly associated with either the state or the market The chosen examples from two of the most dynamic legal fields in the transnational arena today serve as backdrops for a comprehensive legal theoretical inquiry into the changing institutional and normative landscape of legal norm creation

Refugees and the Law in Challenging Times - A Law and Economics Approach Denard Veshi,2024-07-17 This book focuses on the economic analysis of refugee law and the protection of refugee rights It offers a law and economics model applied to migration and states The book focuses on the most critical push factors that impact lawmakers in enacting and modifying asylum law Furthermore the book

examines the economic advantages and disadvantages of a centralized supranational asylum law *acquis communautaire* that could eventually eliminate competition between legal orders in asylum law and do away with the negative externalities caused by asylum shopping. The book critically analyses international refugee law pursuing an interdisciplinary approach. Its principal goal is to explore refugee law through the lenses of the law and economics approach and against the backdrop of a human rights approach. After explaining the evolution of the human rights approach, the book elaborates on the legal and economic factors that impact refugees on the one hand and public policy on the other. In conclusion, a balance that considers the national preferences of destination countries and the protection of refugee rights is proposed. Sanctions in EU

Competition Law Michael Frese, 2014-12-01. In the early decades of European integration, the enforcement of EU competition law was highly centralised. Virtually all enforcement actions under Articles 101 and 102 TFEU were initiated by the European Commission. More recently, the enforcement of EU competition law has become less centralised; many would say even decentralised. In 2004, essentially in an effort to increase enforcement capacity in the wake of EU enlargement, the involvement of Member State competition authorities was significantly reinforced by national authorities being given power to pursue infringements of EU competition law largely on the basis of their domestic enforcement regimes. This combination of decentralisation and enforcement autonomy raises questions about the relationship between EU law and national law as well as about the costs of enforcement. This new book links these questions by analysing how competences in the area of sanctions are distributed between EU and national law and how this influences the costs of enforcement. The author's conclusions, which highlight the economic implications of the choices made by competition authorities, courts and legislators, will be of use to all the above in further developing EU competition policy. The PhD thesis on which this book is based was declared runner up in the 2013 Concurrences Awards.
