Pachpatte, 2001-12-13 A treatise on finite difference inequalities that have important applications to theories of various classes of finite difference and sum difference equations including several linear and nonlinear finite difference inequalities appearing for the first time in book form Mathematical Theory of Hemivariational Inequalities and Applications Zdzistaw Naniewicz, P. D. Panagiotopoulos, 2021-07-28 Gives a complete and rigorous presentation of the mathematical study of the expressions hemivariational inequalities arising in problems that involve nonconvex nonsmooth energy functions A theory of the existence of solutions for inequality problems involving nonconvexity and nonsmoothness is established **Monomial Algebras** Rafael Villarreal, 2000-12-05 An introduction to the methods used to study monomial algebras and their presentation ideals including Stanley Reisner rings subrings and toric varieties It emphasizes square free quadratics and effective computational methods and applies a combinatorial description of the integral closure of the corresponding monomial subring to graph theory **Differential Subordinations** Sanford S.
