Mapping Memory

Kaitlin M. Murphy, 2018-10-02 In *Mapping Memory* Kaitlin M Murphy investigates the use of memory as a means of contemporary sociopolitical intervention. *Mapping Memory* focuses specifically on visual case studies including documentary film, photography, performance, new media, and physical places of memory from sites ranging from the Southern Cone to Central America and the U.S. Mexican borderlands. Murphy develops new frameworks for analyzing how visual culture performs as an embodied agent of memory and witnessing, arguing that visibility is inherently performative. By analyzing the performative elements or strategies of visual texts such as embodiment, reenactment, haunting, and the performance of material objects and places, Murphy elucidates how memory is both anchored in and extracted from specific bodies, objects, and places. Drawing together diverse theoretical strands, Murphy originates the theory of memory mapping, which tends to the ways in which memory is strategically deployed in order to challenge official narratives that often neglect or designate as transgressive certain memories or experiences. Ultimately, Murphy argues memory mapping is a visual strategy to ask and to challenge why certain lives are rendered visible and thus grievable and others not. *Photovoice Research in Education and Beyond* Amanda O. Latz, 2017-04-07 Photovoice is a form of participatory action research which has been gaining use and momentum since its inception in the mid 1990s. Within the enactment of this methodology, research participants are invited to document aspects of their lives through photography and then provide written or oral accounts of the images they create. Designed to situate participants as experts on their lives and their experiences, photovoice is a powerful and visceral approach to policy change efforts. In this book, the photovoice methodology is conceptualized as being comprised of eight steps: identification, invitation, education, documentation, narration, ideation, presentation, and confirmation. Each of the steps is explained and expanded upon, and insights are drawn from the extant photovoice literature and the author's personal experience. In addition, attention is given to the history of photography and inquiry, theoretical underpinnings, and aims of the methodology, ethical considerations, methods and procedures, approaches to data analysis, and photovoice exhibitions. Finally, the author has attended to some aspects of photovoice that have historically been left unattended, such as building a conceptual framework for a photovoice study, viewing the photovoice exhibition as a site of inquiry, and thinking through the ways in which ever-evolving photography technologies can and should impact decision making throughout the photovoice process. While many texts exist that touch on and/or address photovoice, this is the first book solely dedicated to the entirety of the photovoice methodology, from theory to exhibition. Built as a practical guide, readers will find a wealth of information, resources, and advice within this book. Educators, students, and academic researchers will find this an accessible and compassionate text, one that will be a trusted companion while on the photovoice project journey. *Handbook of Emotion Regulation, Second Edition* James J.
