Reproducing Families:

Reproducing Families David Levine, 1987-08-27 A review of the course of English population history from 1066 to the 1980s with a particular focus on English family forms *Reproducing Citizens: family, state and civil society* Sasha Roseneil, Isabel Crowhurst, Ana Cristina Santos, Mariya Stoilova, 2017-10-02 Whilst the politics of reproduction have been at the heart of feminist struggles for over a century and a half their analysis has not yet come to occupy a central place in the interdisciplinary study of citizenship This volume takes up the challenge posed by Bryan Turner when he noted the absence of any systematic thinking about familial relations reproduction and citizenship 2008 and offers the first major global collection of work exploring this nexus of practices and political contestations The book brings together citizenship scholars from across Europe the Americas and Australia to develop feminist and queer analyses of the relationship between citizenship and reproduction and to explore the ways in which citizenship is reproduced Extending the foundational work of feminist political theorists and sociologists who have interrogated the public private dichotomy on which traditional civic republican and liberal understandings of citizenship rest the contributors examine the biological sexual and technological realities of natality and the social realities of the intimate intergenerational material and affective labour that are generative of citizens and that serve to reproduce membership of and belonging to states nations societies and thus of citizenship itself This book was published as a special issue of Citizenship Studies Human Reproductive Decisions R. I. M. Dunbar, 1995-04-12 Reproductive biologists evolutionary biologists demographers and social scientists all have a common interest in the business of human reproduction Their perspectives however are very different and have traditionally prevented them from having much to do with each other The conference on which this book is based brought together contributors from each of these disciplines in an attempt to explore the common ground that they share and so generate a better understanding of the factors that influence human fertility Social Reproduction Antonella Picchio, 1992-10-22 This book focuses on the relationship between the process of producing commodities and the process of social reproduction of the labouring population and seeks to restore that problematic relationship to the central place it had in the analysis of Smith Ricardo and Marx **Oil Palm Breeding** Aik Chin Soh, Sean Mayes, Jeremy A. Roberts, 2017-08-14 The oil palm is a remarkable crop producing around 40% of the world's vegetable oil from around 6% of the land devoted to oil crops Conventional breeding has clearly been the major focus of genetic improvement in this crop A mix of improved agronomy and management coupled with breeding selection have quadrupled the oil yield of the crop since breeding began in earnest in the 1920s However as for all perennial crops with long breeding cycles oil palm faces immense challenges in the coming years with increased pressure from population growth climate change and the need to develop environmentally sustainable oil palm plantations In Oil Palm Breeding Genetics and Genomics world leading organizations and individuals who have been at the forefront of developments in this crop provide their insights and experiences of oil palm research while examining the

different challenges that face the future of the oil palm The editors have all been involved in research and breeding of oil palm for many years and use their knowledge of the crop and their disciplinary expertise to provide context and to introduce the different research topics covered

De Gruyter Handbook of Business Families Michael Carney,Marleen Dieleman,2023-01-30 The management field increasingly recognizes that most firms in the world are family firms and that these entities operate differently from the non family firms on which most of our current management theories are based The *De Gruyter Handbook of Business Families* brings together work from leading academics who explore emerging research themes relevant to business families particularly drawing in new insights from adjacent disciplines that can advance the family business field The handbook challenges the traditional notion of the single firm single family that has characterized most early research on family business Recognizing that families may simultaneously own or control multiple businesses as well as substantial wealth beyond these firms in the form of financial and non financial assets this handbook focuses on business families rather than the narrower construct of family business

The contributions in this handbook explore the relatively neglected dynamics between individuals with family ties that shape the interaction between family and business business families with multiple businesses how business families adopt formal rules and processes around their joint activities and the institutionalization of wealth and business families in society The De Gruyter Handbook of Business Families fills a gap in the family business research literature and is an essential reference work for researchers and graduate level students in the area of business families

Limited Livelihoods Sonya O. Rose, 2003-09-02 Integrating analytical tools from feminist theory cultural studies and sociology to illuminate detailed historical evidence Sonya Rose argues that gender was a central organizing principle of the nineteenth century industrial transformation in England She elaborates a cultural theory of gender that suggests why it is an inherent aspect of all social and economic relations Analysing employer strategies and state policies and the role of work in family life she demonstrates that neither industrial transformation nor class relations can be understood when reduced to gender neutral and abstract forces
