Conflicting Philosophies and International Trade Law Michael Burkard, 2017-10-17 This book reveals how conflicting worldviews are at the root of public controversies on policy and trade issues It highlights the particularly controversial disputes at the level of the World Trade Organization in the case of regulating beef hormones and GMOs aiming to show how negotiators of international agreements members of dispute settlement bodies and policy makers in general could have recourse to concepts of other disciplines such as epistemology and philosophy in order to address deadlocked legal disputes Ultimately the book is a manifesto for independent and critical research **The Ethics of Technological**

Risk Lotte Asveld, Sabine Roeser, 2012-05-04 A comprehensive and important collection that includes essays by some of the leading figures in the field Essential reading for anyone interested in risk assessment Professor Kristin Shrader Frechette University of Notre Dame The editors are to be congratulated for bringing together a distinguished international group of theorists to reflect on the issues This volume will be sure to raise the level of debate while at the same time showing the importance of philosophical reflection in approaches to the problems of the age Professor Jonathan Wolff University College London This volume brings together top authors from the fields of risk philosophy social sciences and psychology to address the issue of how we should decide how far technological risks are morally acceptable or not The underlying principles are examined along with methodological challenges public involvement and instruments for democratization A strong theoretical basis is complemented by a range of case studies from some of the most contentious areas including medical ethics and GM crops This book is a vital new resource for researchers students and anyone concerned that traditional approaches to risk management don't adequately address ethical considerations Philosophy and the Precautionary Principle Daniel

Steel, 2015 This book presents and defends an interpretation of the precautionary principle from the perspective of philosophy of science *Humanity at Risk* Daniel Innerarity, Javier Solana, 2013-10-24 *Humanity at Risk* compares diverse approaches to the theme of global threats using the tools of philosophy critical theory and political thought alongside more practical socio political observations By defining the idea of global risk more specifically Editors Innerarity and Solana and their contributors believe we can understand how these risks should be evaluated predicted and managed within the framework of democratic societies The goal of this book is to highlight more precisely the necessity in the face of new global risks for new governance at a national European and global level Human and Ecological Risk Assessment Dennis J.

Paustenbach, 2017-05-22 *Human and Ecological Risk Assessment Theory and Practice* assembles the expertise of more than

fifty authorities from fifteen different fields forming a comprehensive reference and textbook on risk assessment. Containing two dozen case studies of environmental or human health risk assessments, the text not only presents the theoretical underpinnings of the discipline but also serves as a complete handbook and how to guide for individuals conducting or interpreting risk assessments. In addition, more than 4 000 published papers and books in the field are cited. Editor Dennis Paustenbach has assembled chapters that present the most current methods for conducting hazard identification, dose response and exposure assessment and risk characterization components for risk assessments of any chemical hazard to humans or wildlife, fish, birds and terrestrials. Topics addressed include hazards posed by Air emissions, Radiological hazards, Contaminated soil and foods, Agricultural hazards, Occupational hazards, Consumer products and water, Hazardous waste sites, Contaminated air and water. The bringing together of so many of the world's authorities on these topics, plus the comprehensive nature of the text, promises to make *Human and Ecological Risk Assessment* the text against which others will be measured in the coming years.

The Power to Protect Catherine Button, 2004-12-06. This book examines the intersection of WTO trade liberalisation rules and domestic health protection, a subject that is of considerable interest to those concerned that the WTO impinges on national regulatory autonomy. In analysing the tension between health protection and trade liberalisation, the book focuses on the way in which this tension is or is not resolved through the dispute resolution process. It offers a detailed analysis of the relevant WTO rules and case law, identifying particular concerns relating to the ability of WTO Members to take protective action in circumstances of scientific uncertainty and the role of social and cultural factors in the making of health-related regulations. The nature of scientific evidence and the extent to which the scientific process internalises uncertainty is further explored, drawing on documentation relating to the theory and conduct of scientific risk assessment. Despite the popularity of the precautionary principle in some quarters, it is suggested that it may not be advisable for the WTO to adopt that principle. Rather, further attention should be paid to the role that the standard of review might play in easing the tensions that arise when a sovereign state's health regulations are reviewed by the WTO. The origins of the WTO's objective assessment standard of review are explained, but the standard itself is criticised. Options for developing the standard of review are considered, with a reasonable regulator standard based on the Asbestos case proposed. The book takes a comparative approach, drawing on ECJ cases reviewing Member State and Community health measures as well as US judicial review and commerce clause cases.

Risks, Rewards and Regulation of Unconventional Gas R. Quentin Grafton, Ian G. Cronshaw, Michal C. Moore, 2017. This book explains the drivers and implications of unconventional gas at regional, national and global scales, with case studies and in-depth analyses.

Regulating Securitized Products R. Saleuddin, 2015-07-14. Securitization regulation remains in the eyes of investors, banks, businesses, bureaucrats and politicians, one of the remaining unsolved puzzles of the post-Global Financial Crisis landscape. This book describes the key features of securitization, including the most common structures and their uses, as well as the motivations of the participants in these

markets Important historical moments and case studies are frequently used to illustrate critical issues in the design and enforcement of regulation for securitized products This work is intended to contextualize and contribute to the highly specialized debates between policymakers regulators and the regulated financial intermediaries setting out an agenda for discussion as well as providing some strongly held views on possible solutions Written by an industry insider with over 20 years experience in the markets this book considers regulatory tools from all sides while avoiding common biases It is a valuable source for not only regulators and policymakers but also educators students and researchers in financial regulation financial engineering and investment management

Of Risks and Normative Responses Christina Anikó

Simmig,2023-09-23 Disaster losses in the context of natural hazards continue to rise despite a growing understanding of disaster risks and measures to reduce them One obstacle to enhancing private and public disaster risk reduction is the influence of the distorted risk perception of laypeople The book argues for the necessity of public regulations and explores means to mitigate the consequences of such distorted risk perception through legal measures and adjustments to political decision making in Council of Europe member states while respecting the value of autonomy and democratic principles In terms of collective decision making the book advocates for the implementation of deliberative fora in the democratic decision making process to mitigate the influence of distorted risk perception associated with natural hazards Additionally the book discusses a range of disaster risk reducing measures that member states may lawfully implement to protect individuals and communities from the consequences of distorted risk perceptions related to common natural hazards To underscore the merits of strengthening disaster risk reduction from the bottom up this book demonstrates how fundamental rights and democratic values impede attempts to increase DRR from the top down even in cases where people s risk perceptions are distorted In doing so the book addresses the issue of disaster risk reduction in a novel way by exposing how legal and political barriers to disaster loss reduction can be overcome by giving higher priority to mitigating distorted risk perceptions

The New Authoritarianism Alan Waring,2019-03-30 This two volume book considers from a risk perspective the current phenomenon of the new Alt Right authoritarianism and whether it represents real democracy or an unacceptable hegemony potentially resulting in elected dictatorships and abuses as well as dysfunctional government Contributing authors represent an eclectic range of disciplines including cognitive organizational and political psychology sociology history political science international relations linguistics and discourse analysis and risk analysis The Alt Right threats and risk exposures whether to democracy human rights law and order social welfare racial harmony the economy national security the environment and international relations are identified and analysed across a number of selected countries While Vol 1 ISBN 978 3 8382 1153 4 focusses on the US Vol 2 illuminates the phenomenon in the UK Austria France Germany

Netherlands Norway Italy Hungary and Russia Potential strategies to limit the Alt Right threat are proposed **Handbook of Risk Theory** Rafaela Hillerbrand,Per Sandin,Martin Peterson,2012-01-12 Risk has become one of the main topics in fields

as diverse as engineering medicine and economics and it is also studied by social scientists psychologists and legal scholars But the topic of risk also leads to more fundamental questions such as What is risk What can decision theory contribute to the analysis of risk What does the human perception of risk mean for society How should we judge whether a risk is morally acceptable or not Over the last couple of decades questions like these have attracted interest from philosophers and other scholars into risk theory This handbook provides for an overview into key topics in a major new field of research It addresses a wide range of topics ranging from decision theory risk perception to ethics and social implications of risk and it also addresses specific case studies It aims to promote communication and information among all those who are interested in theoretical issues concerning risk and uncertainty This handbook brings together internationally leading philosophers and scholars from other disciplines who work on risk theory The contributions are accessibly written and highly relevant to issues that are studied by risk scholars We hope that the Handbook of Risk Theory will be a helpful starting point for all risk scholars who are interested in broadening and deepening their current perspectives

Regions of Risk Kenneth Hewitt, 2014-09-19 An introduction to hazards human vulnerability and disaster paying particular attention to the more severe or novel risks and disaster that affect the general public The book is split into two parts the first of which gives an overview of the field of risk and disaster in terms of three perspectives hazards perspective vulnerability perspective and the active perspective The second part illustrates and develops these ideas in relation to some of the more severe dangers and disasters of the twentieth century for example earthquake risk cities at risk and the civil disasters of war

The Fight Against Doubt Inmaculada de Melo-Martín, Kristen Intemann, 2018-07-02 The lack of public support for climate change policies and refusals to vaccinate children are just two alarming illustrations of the impacts of dissent about scientific claims Dissent can lead to confusion false beliefs and widespread public doubt about highly justified scientific evidence Even more dangerously it has begun to corrode the very authority of scientific consensus and knowledge Deployed aggressively and to political ends some dissent can intimidate scientists stymie research and lead both the public and policymakers to oppose important public policies firmly rooted in science To criticize dissent is however a fraught exercise Skepticism and fearless debate are key to the scientific process making it both vital and incredibly difficult to characterize and identify dissent that is problematic in its approach and consequences Indeed as de Melo Martín and Intemann show the criteria commonly proposed as means of identifying inappropriate dissent are flawed and the strategies generally recommended to tackle such dissent are not only ineffective but could even make the situation worse The Fight Against Doubt proposes that progress on this front can best be achieved by enhancing the trustworthiness of the scientific community and by being more realistic about the limits of science when it comes to policymaking It shows that a richer understanding of the context in which science operates is needed to disarm problematic dissent and those who deploy it This the authors argue is the best way forward rather than diagnosing the many instances of wrong headed dissent

Taming the Corporation Robert Baldwin, Martin Cave, 2020-11-19

Virtually all enterprises are regulated Regulation is crucial not only to economic success but also to protecting consumer worker environmental and other interests Yet it is often considered a tiresome interference with entrepreneurial activity This negative vision is unhelpful in addressing business and other needs for productive forms of regulation Taming the Corporation offers an alternative positive vision of regulation It stresses the role of good regulation in allowing businesses to flourish serve markets effectively and respect broader interests This perspective paves the way for more productive regulatory designs It looks at the characteristics of good regulation and provides businesses consumers and citizens with the arguments that will enable them to push for regulatory controls that serve their needs Understandings of regulation are served by looking at the potentially positive roles of control strategies ranging from command laws to nudges This book not only discusses regulatory theory but also uses numerous case examples to illustrate real life challenges and address three key regulatory challenges in the modern world regulating for sustainability addressing global warming and controlling digital platforms

Environmental Standards Christian Streffer,Josef Bücker,Adrienne Cansier,Dieter Cansier,Carl Friedrich Gethmann,Robert Guderian,Gerd Hanekamp,Dietrich Henschler,Gerald Pöch,Eckard Rehbindler,Ortwin Renn,Marco Slesina,Kerstin Wuttke,2013-06-29 The rapid growth of the world population nearly six fold over the last hundred years combined with the rising number of technical installations especially in the industrialized countries has lead to ever tighter and more strained living spaces on our planet Because of the inevitable processes of life man was at first an exploiter rather than a careful preserver of the environment Environmental awareness with the intention to conserve the environment has grown only in the last few decades Environmental standards have been defined and limit values have been set largely guided however by scientific and medical data on single exposures while public opinion on the other hand now increasingly calls for a stronger consideration of the more complex situations following combined exposures Furthermore it turned out that environmental standards while necessarily based on scientific data must also take into account ethical legal economic and sociological aspects A task of such complexity can only be dealt with appropriately in the framework of an inter disciplinary group *Thinking through Science and Technology* Glen Miller,Helena Mateus Jerónimo,Qin Zhu,2023-03-27

Groundbreaking in its range of disciplines and cultural backgrounds *Thinking through Science and Technology* explores how individual and societal beliefs values and actions are transformed by science technology and engineering Practical and theoretical insights from philosophers policymakers STS scholars and engineers illuminate the promise perils and paradoxes that arise with technoscientific change This collection of original research develops a philosophical understanding of technology and its inscription in a wider web of social and political meanings values and civilizational change It explores foundational beliefs at the core of engineering education and practice with an emphasis on the movement of ideas between Western and Chinese scholars as well as the complex interwoven relationship between ideas from religion science and technology as they have evolved in the West Contributors also critically examine the forces and frameworks that shape the

development and evaluation of scientific practice and the innovation and adoption of technology with an emphasis on national and global policy The volume offers a critical and timely reflection on science and technology that counters trends toward technological optimism on the one hand and disciplinary and cultural regionalization on the other Chapters written by prominent and promising scholars from around the world make this a global resource its breadth and clarity make it a superb introduction for those new to its fields It serves as an essential reference for established scholars as well as anyone seeking a more comprehensive understanding of social and technoscientific entanglements that permeate contemporary life List of contributors Gordon Akon Yamga Jennifer Karns Alexander Andoni Alonso Pamela Andanda Larry Arnhart Li Bocong Albert Borgmann Adam Briggie Jose A L pez Cerezo Mark Coeckelbergh Daniel C r zuelle Neelke Doorn Jean Pierre Dupuy Andrew Feenberg Jose Lu s Garcia Tricia Glazebrook Janna van Grunsven J Britt Holbrook Helena Jer nimo Tong LI Yongmou LIU Lavinia Marin Glen Miller Carl Mitcham Suzanne Moon Byron Newberry Jean Robert Sabine Roeser Taylor Stone Sajay Samuel Daniel Sarewitz Jen Schneider Jos Antonio Ullate Carlos Verdugo Serna Nan WANG
