Dynamic Reconfigurable Architectures and Transparent Optimization Techniques

Antonio Carlos Schneider Beck Fl., Luigi Carro, 2010-03-10

Dynamic Reconfigurable Architectures and Transparent Optimization Techniques presents a detailed study on new techniques to cope with the aforementioned limitations First characteristics of reconfigurable systems are discussed in details and a large number of case studies is shown Then a detailed analysis of several benchmarks demonstrates that such architectures need to attack a diverse range of applications with very different behaviours besides supporting code compatibility This requires the use of dynamic optimization techniques such as Binary Translation and Trace reuse Finally works that combine both reconfigurable systems and dynamic techniques are discussed and a quantitative analysis of one them the DIM architecture is presented **Adaptable**

Embedded Systems Antonio Carlos Schneider Beck, Carlos Arthur Lang Lisboa, Luigi Carro, 2012-11-27 As embedded systems become more complex designers face a number of challenges at different levels they need to boost performance while keeping energy consumption as low as possible they need to reuse existent software code and at the same time they need to take advantage of the extra logic available in the chip represented by multiple processors working together This book describes several strategies to achieve such different and interrelated goals by the use of adaptability Coverage includes reconfigurable systems dynamic optimization techniques such as binary translation and trace reuse new memory architectures including homogeneous and heterogeneous multiprocessor systems communication issues and NOCs fault tolerance against fabrication defects and soft errors and finally how one can combine several of these techniques together to achieve higher levels of performance and adaptability The discussion also includes how to employ specialized software to improve this new adaptive system and how this new kind of software must be designed and programmed **High**

Performance Visualization E. Wes Bethel, Hank Childs, Charles Hansen, 2012-10-25 Visualization and analysis tools techniques and algorithms have undergone a rapid evolution in recent decades to accommodate explosive growth in data size and complexity and to exploit emerging multi and many core computational platforms High Performance Visualization Enabling Extreme Scale Scientific Insight focuses on the subset of scientific visualization concerned with algorithm design implementation and optimization for use on today s largest computational platforms The book collects some of the most seminal work in the field including algorithms and implementations running at the highest levels of concurrency and used by scientific researchers worldwide After introducing the fundamental concepts of parallel visualization the book explores approaches to accelerate visualization and analysis operations on high performance computing platforms Looking to the future and anticipating changes to computational platforms in the transition from the petascale to exascale regime it presents the main research challenges and describes several contemporary high performance visualization implementations

Reflecting major concepts in high performance visualization this book unifies a large and diverse body of computer science research development and practical applications It describes the state of the art at the intersection of scientific visualization large data and high performance computing trends giving readers the foundation to apply the concepts and carry out future research in this area **Field Programmable Logic and Applications** Patrick Lysaght,James Irvine,Reiner

Hartenstein,2004-06-22 This book contains the papers presented at the 9th International Workshop on Field ProgrammableLogic and Applications FPL 99 hosted by the University of Strathclyde in Glasgow Scotland August 30 September 1 1999 FPL 99 is the ninth in the series of annual FPL workshops The FPL 99 programme committee has been fortunate to have received a large number of high quality papers addressing a wide range of topics From these 33 papers have been selected for presentation at the workshop and a further 32 papers have been accepted for the poster sessions A total of 65 papers from 20 countries are included in this volume FPL is a subject area that attracts researchers from both electronic engine ing and computer science Whether we are engaged in research into soft ha ware or hard software seems to be primarily a question of perspective What is unquestionable is that the interaction of groups of researchers from di erent backgrounds results in stimulating and productive research As we prepare for the new millennium the premier European forum for searchers in eld programmable logic remains the FPL workshop Next year the FPL series of workshopswill celebrate its tenth anniversary The contribution of so many overseas researchers has been a particularly attractive feature of these events giving them a truly international perspective while the informal and convivial atmosphere that pervades the workshops have been their hallmark We look forward to preserving these features in the future while continuing to expand the size and quality of the events Advances in Neural Networks - ISSN 2004 Fuliang Yin,2004-08-11 The two volume set
