On Aristotle's Physics 2 Simplicius (of Cilicia.), Barrie Fleet, 1997 Book 2 of the Physics is arguably the best introduction to Aristotle's ideas It defines nature and distinguishes natural science from mathematics Book 2 introduces the seminal idea of four causes or four modes of explanation It defines chance but rejects a theory of chance and natural selection in favour of purpose in nature To these riches Simplicius writing in the sixth century AD adds his own considerable contribution Seeing Aristotle's God as a creator he discusses how nature relates to soul adds Stoic and Neoplatonist causes to Aristotle's list of four and questions the likeness of cause to effect He discusses missing a great evil or a great good by a hairsbreadth and considers whether animals act from reason or natural instinct He also preserves a Posidonian discussion of mathematical astronomy

Simplicius on Aristotle's Physics 7 Simplicius (of Cilicia.), 1994 [The Philosophy of the Commentators, 200-600 AD: Physics](#) Richard Sorabji, 2005 Physics in Neoplatonist thought the subject which occupies the second volume of this sourcebook was innovative the world of space and time was causally ordered by a nonspatial nontemporal world and this view required original thinking

The Philosophy of the Commentators, 200-600 AD: Psychology (with ethics and religion) Richard Sorabji, 2005 This is the first work to draw on the four hundred years of transition from ancient Greek philosophy to the medieval philosophy of Islam and the West During this period philosophy was often written in the form of commentaries on the works of Plato and Aristotle Many ideas wrongly credited to the Middle Ages derive from these centuries such as that of impetus in dynamics and intentional objects in philosophy of mind The later Neoplatonist commentators fought a losing battle with Christianity but inadvertently made Aristotle acceptable to Christians by ascribing to him belief in a Creator God and human immortality The commentators provide a panorama of up to a thousand years of Greek philosophy much of which would otherwise be lost They also serve as the missing link essential for understanding the subsequent history of Western philosophy Volume 1 deals with psychology which for the Neoplatonist commentators was the gateway to metaphysics and theology It was the subject on which Plato and Aristotle disagreed most and on which the commentators went furthest beyond them in their search for synthesis Ethics and religious practice fall naturally under psychology and are included in this volume All sources appear in English translation and are carefully linked and cross referenced by editorial comment and explanation Bibliographies are provided throughout
