Betts,2010-12-01 Long before Germany s blitzkrieg swept the West European leaders had received many signals of its imminence Stalin too had abundant warning of German designs on Russia but believed that by avoiding provocative defensive measures he could avert the attack that finally came in June 1941 And the stories of the Japanese attack on Pearl Harbor the Korean War and three Arab Israeli conflicts are replete with missed opportunities to react to unmistakable warnings Richad K Betts analyzes surprise attacks during the mid twentieth century to illustrate his thesis surprise attacks occur not because intelligence services fail to warn but because of the disbelief of political leaders Although the probability is low that the United States will fail to deter direct attack by the Soviet Union Betts says the intensity of the threat warrants painstaking analysis of how to cope with it His own investigation of the historical psychological political diplomatic and military aspects of his subject heightens understanding of why surprise attacks succeed and why victim nations fail to respond to warnings In discussing current policy he focuses on the defense of Western Europe and applies the lessons of history to U S defense planning offering detailed recommendations

for changes in strategy Obviously some of the potential dangers of military surprise cannot be prevented The important thing he emphasizes is that without forces that exceed requirements the solution Moscow appears to have chosen it is vital to ensure that what forces exist can be brought to bear when needed The Revolution Will Not Be Microwaved Sandor Ellix Katz, 2006-11-15 From James Beard Award winner and New York Times bestselling author of *The Art of Fermentation* An instant classic for a new generation of monkey wrenching food activists Food in America is cheap and abundant yet the vast majority of it is diminished in terms of flavor and nutrition anonymous and mysterious after being shipped thousands of miles and passing through inscrutable supply chains and controlled by multinational corporations In our system of globalized food commodities convenience replaces quality and a connection to the source of our food Most of us know almost nothing about how our food is grown or produced where it comes from and what health value it really has It is food as pure corporate commodity We all deserve much better than that In *The Revolution Will Not Be Microwaved* author Sandor Ellix Katz Sandor Katz's *Fermentation Journeys* *The Art of Fermentation* and *Wild Fermentation* profiles grassroots activists who are taking on Big Food creating meaningful alternatives and challenging the way many Americans think about food From community supported local farmers community gardeners and seed saving activists to underground distribution networks of contraband foods and food resources rescued from the waste stream this book shows how ordinary people can resist the dominant system revive community based food production and take direct responsibility for their own health and nutrition
