**Neural Control of the Respiratory Muscles** Alan D. Miller, Armand L. Bianchi, Beverly P. Bishop, 2019-06-04 First published in 1997 The respiratory muscles are multifunctional muscles involved in other behaviors besides breathing from the protection of the upper airway to cognitive functions such as speech or singing Neural Control of

the Respiratory Muscles presents an overall consideration of how these muscles are regulated by the central nervous system in normal as well as in pathological situations A group of 40 internationally recognized scientists and clinicians have collaborated to discuss current findings in the field and to identify areas of future development such as o The anatomical and functional organization of the respiratory muscles and the mechanics of the chest wall o Respiratory muscle control by the central nervous system during normal breathing and during disease states o Respiration during sleep exercise and locomotion o Respiratory muscle contribution to non respiratory behaviors interaction of the central pattern generator for respiration with other central pattern generators o Multifunctional nature of respiratory muscles and respiratory neurons of the central nervous system Although other texts exist that examine the control of breathing and other specialized topics considered in this volume Neural Control of the Respiratory Muscles is the first major single volume publication that takes a broad view of muscle control during non respiratory behaviors and the coordination of respiration with non respiratory behaviors

**Limbic and Autonomic Nervous Systems Research** Leo DiCara,2012-12-06 The present volume has been written primarily for the advanced student and the mature investigator The book will be of value to the student because it includes representative research problems on a variety of topics and significant for the mature investigator because it can help bring him up to date on specific topics in limbic and autonomic nervous system research an area which has undergone spectacular growth particularly during the last ten years The twelve chapters deal with subject matter that falls loosely into four major subtopics basic sensory and regulatory mechanisms emotional processes cardiovascular processes and learning and low arousal states but each chapter represents recent research in one particular area and stands as a self contained unit I am indebted to the many authors and publishers for their aid in granting permission to reproduce quotations tables and figures from their works Specific acknowledgments are made in the text Leo V DiCara Ann Arbor Contents Basic Sensory and Regulatory Mechanisms Chapter 1 The Olfactory System and Behavior Bernice M Wenzel I Introduction 1 2 Background 2 2 1 Rhinencephalon 2 2 2 The Direct Olfactory System and Its Connections 3 2 3 Olfactory Lesions and Nonolfactory Behavior 7 3 Effects of Lesions in the Direct Olfactory System 8 3 1 Orienting and Habituation 9 3 2 Activity 12 3 3 Avoidance Learning 13 3 4 Appetitive Learning 16

**Research Grants Index** National Institutes of Health (U.S.). Division of Research Grants,1974 **Clinical Physiology of Sleep** Ralph Lydic,Julien F. Biebuyck,2013-05-27 ROBERT WILLIAM McCARLEY Laboratory of Neuroscience Department of Psychiatry Harvard Medical School Boston and Brockton V A Medical Center Brockton Massachusetts The alternation of waking and sleeping the daily course of the advancing and receding tides of consciousness has long been a familiar part of our experience But it is a new idea that autonomic and respiratory physiology are equally and dramatically altered in a parallel fashion and it is this concept that is summarized and developed here The editors have drawn together thematically related chapters written by researchers with direct experience and a high level of expertise in the areas they address The main theme is the relationship of general physiological alterations during sleep to cellular physiology and to the pathology of sleep What is distinctive and especially appealing about this book on sleep is its emphasis on the autonomic and respiratory systems This volume is I believe the first to explore these topics systematically and to blend the nomenclological description with possible cellular mechanisms and ties to clinical pathology As such this

book should find an important place in the library of workers in the fields of sleep research autonomic and respiratory physiology and related neuroscience disciplines it also belongs in the li brary of clinicians concerned with the disorders of sleep This overview of topics and chapters gives an indication of their cath olicity      *Perspectives on Motivation* Richard Dienstbier, Richard A. Dienstbier, 1991-01-01 Appearing on the hundredth anniversary of the teaching of psychology at the University of Nebraska this volume represents a return to an earlier preoccupation with motivation and reflects a resurgence of interest in it Eight professionals in psychology discuss the many sides of motivation Mortimer Appley president emeritus of Clark University sees equilibrium or homeostasis as the fundamental motivational process Douglas Derryberry and Don M Tucker of the University of Oregon present a broad and basic model of motivation viewing it as a product of the evolution and neural architecture of the human brain Carole S Dweck of Columbia University approaches personality development through motivational concepts in particular goals related to self image Bernard Weiner of the University of California Los Angeles discusses the importance of one s perception of control over the causes of a situation or problem and over its management or solution Albert Bandura of Stanford University is concerned with short and long term goals as they are affected by emotional states and a sense of self efficacy Similarly Edward L Deci and Richard M Ryan of the University of Rochester consider the bearing of self determination on motivation and achievement      *Current Catalog* National Library of Medicine (U.S.), 1979 First multi year cumulation covers six years 1965 70      **Respiratory Control** Dexter F.
