

Emergencies in Neurology

Dr. Ajini Arasalingam

This book focuses on the neurological emergencies (in adults), keeping the facts to the amazingly simple basics. Our goal is to enable medical officers in even the remote areas of our country to use this as a guide to stabilise patients who present with neurological emergencies and prepare them for transfer to tertiary centres. To ease easy reference in an emergency we have tabulated the essential points of neurological emergencies. This book will be of value to medical officers practicing in remote areas with minimal facilities as well as for those who are practicing in well established centres as a quick reference in emergencies.
