New Approach To Continuing Education For Business And The Professions:

A New Approach to Continuing Education for Business and the Professions Philip M. Nowlen, 1988 Continuing Professional Education in Australia Barrie Brennan, 2016-09-01 This book offers a history of Continuing Professional Development CPD in the Australian context. It presents an approach that links the development of CPD to a series of missed opportunities and the identification of three key themes: mandatory CPD competencies and regulation, registration as well as with national regulation for select health professions. It not only relates the evolution of CPD in Australia but also serves as a guide to examining the situation in other countries and the emergence of CPD in individual professions. CPD has been provided for many decades but it has not been rated as a high priority or a key area of provision and has not been the focus of discussions or disputes in the higher education sector or in vocational education circles. Nevertheless, in describing CPD's development, evidence is presented that CPD has made a significant contribution to the broad field of vocational education.

Handbook of Distance Education Michael Grahame Moore, William G. Anderson, 2003-04-02 The second edition of this award-winning book continues the mission of its predecessor to provide a comprehensive compendium of research in all aspects of distance education, arguably the most significant development in education over the past quarter century. While the book deals with education that uses technology, the focus is on teaching and learning and how its management can be facilitated through technology. This volume will be of interest to anyone engaged in distance education at either the K-12 or college level. It is also appropriate for corporate and government trainers and for administrators and policy makers in all these environments.

Handbook of Distance Education Michael G. Moore, 2013 This work provides overviews and summaries of the research and practice of distance education in the USA. It addresses such questions as how distance education is best practised at the level of the teacher as well as the administrator. *Professional Practices* Tony Becher, 2018-04-17 There is recurrent public concern with enhancing the quality of professional performance. What is the contemporary understanding of professionalism? Are the needs of professionals in various fields being met in today's world as what is commonly called continuing professional development has become of a sizable industry? Many books treat the professions as a homogeneous group and view them from an external standpoint. In *Professional Practices* Tony Becher investigates the differences as well as the similarities between and within professional groupings and presents the perspectives of insiders. One particular theme concerns the main patterns of change in professional careers and the specific problems faced by women professionals in a largely male-dominated environment. Brilliantly written, the book focuses on six professions: medicine, pharmacy, law, accountancy, architecture, and structural engineering. The material is based on 190 interviews with a variety of members of the six professions. Becher's book offers original and sensitive insight into the working lives of practitioners and an understanding of the ideas and values they embrace. He argues that their high sense of commitment stems from a concern to enhance their individual reputations and to maintain their collective professional status.

Becher highlights the variety of activities in which these professionals are engaged and the reasons for their responses to social and political pressures from outside their fields. Above all, he seeks to demystify professionalism and to show that professional people share with others a wide range of universal human feelings and concerns. A postscript raises the issue of why diversities are little involved with continuing education in the professions. Practicing professionals will benefit from this insight into how people in their own and other professions cope with similar problems. Becher's volume will be particularly appealing to educationists, policymakers, and social scientists interested in the subject of professionalism, those involved in the provision of initial and mid-career change for the professions, and those with a lay interest in the topic.

Training Initiatives and Strategies for the Modern Workforce Frasad, Scott, Prasuhn, Frederick Carl, 2016-12-28 Organizations in modern business settings invest significant time and resources into training employees. By implementing new techniques and methods, business training programs can be optimized and contribute to overall competitive advantage. *Training Initiatives and Strategies for the Modern Workforce* is a comprehensive reference source for emerging perspectives on bringing evaluation training theory into practice, modifying practices based on the experiences of others, and applying new tools to improve trainings and evaluations. Changing Roles and Contexts for Health Library and Information Professionals Alison Brett, Christine Urquhart, 2011-11-23 This timely edited collection examines the evolving role of health professionals and explores the role they play in the context of where they work. It aims to encourage and inspire health information professionals worldwide to take on new opportunities and ensure their continued development and recognition as valuable assets in the changing health care environment. Library and information professionals working in the health sector face many challenges. Rapid developments in information technology and the provision of information, coupled with organizational developments and the widespread adoption of evidence-based practice, have ensured constant change for a number of years. How have library and information professionals met this challenge, and how has this affected the roles they play? Will developments in services render the hospital librarian obsolete? Is there a need for academic health librarians amongst the Google generation of students? The key topics covered in the book are providing information, facilitating access to information, and managing knowledge, building capacity, undertaking research and evaluation, supporting research and practice, exploiting technology, evidence-based practice, Readership: Information workers and other health professionals as well as students on librarianship and information studies courses.
