Gottschalk, H.P. Müller, 2012-12-06 Investigations on seed proteins have been intensively carried out during the past two decades This is valid with regard to both their chemical composition as well as their nutritive value The development of new biochemical and physical methods has resulted in obtaining deep insights into the structures of seed proteins and their mutual interactions Intensive exchange of information between the scientists participating in national and international research programmes has given strong impulses for intensifying the research in this field For the quantitative and qualitative investigations of seed proteins not only some model plants were used on the contrary they were carried out on a large number of different crops important for different regions of the earth In this way a level of knowledge has been reached which could not be expected in this diversity within such a short period This holds not only true for biochemical but also for physiological characters of the species of the limiting amino acids studied With regard to nutritional aspects the problem was of special interest but also seed proteins acting as antinutritional factors were analysed in detail Based on the knowledge of seed protein structures it was possible to perform investigations on the genetic basis of their synthesis This was done under two different aspects The basic knowledge on the genes involved should be widened moreover it should be tried to improve the seed proteins quantitatively and qualitatively under the influence of mutant genes *The Biological Efficiency of Protein Production* J. G. W. Jones, 1973 This 1973 volume reports the proceedings of a 1971 symposium considering the relative biological efficiency of alternative methods of protein production by plants and animals **Alternative sources of protein for animal production** Committee on Animal Nutrition, *Evaluation of Novel Protein Products* A. E. Bender, B. Löfqvist, R. Kihlberg, 2016-07-08 Evaluation of Novel Protein Products is a collection of several scientific essays that resulted from a symposium held in Stockholm The order in which the essays are arranged follows a session type format Session 1 focuses on the world food problem and the treatment of the nutrition problems in the field of economics and then ends with the strategy in the examination of unique protein foods Session 2 of the book is about the unique sources of protein Possible sources include oilseed fish animal husbandry cereal varieties and leaf proteins Sessions 3 to 6 analyze the nutritional value and quality of the said protein sources Session 7 contains the closing statement about the challenge of protein calorie malnutrition Doctors economists as well as academic and research students whose focus of study is on food shortage and impact of protein in the human food consumption will find this book invaluable [Biography of Edgar E.
