Community-Based Organizations Through Consultation and Technical Assistance Patricia Motes, Peg

Hess, 2007-01-09 Community groups and human service organizations are under a tremendous amount of pressure to strengthen their programs and measure the effectiveness of their work. These challenges have prompted many to seek consultation and technical assistance in order to better plan, develop, and evaluate their services and resources and be more responsive to the needs of funders and the community. In this volume, practitioners and researchers present methods and strategies for assisting and collaborating with groups and agencies serving families. Helping a community or organization involves many tasks: reaching out to the community, building leadership, developing and planning for action, and requires specialized knowledge and skills. Contributors combine a research-based theoretical framework with practical guidance to explain this process and offer cross-cultural case studies in a wide range of settings. The book begins with a discussion of the role of the coach or capacity building consultant and the related but distinct activities of consultation, technical assistance, and service. The value of empowerment theory, adult learning theory, and change theory among other theories are outlined. Special emphasis is placed on the importance of cultural competence, the need to balance diverse needs, ethical mandates, and dilemmas is crucial. The book concludes with a detailed step-by-step guide for helping an agency or program perform a self-evaluation. Skilled consultation and assistance enable organizations to better support and strengthen families. While this book is grounded in research, it also reflects the lived experiences of each contributor and illuminates the complex yet vital role of the consultant.

Evaluating Family Support Ilan Katz, John Pinkerton, 2003-08-01 The delivery of effective family support is a key global child welfare issue, yet there is little consensus on what constitutes family support or what the best ways are to evaluate it. *Evaluating Family Support: Thinking Internationally, Thinking Critically* offers a full review of the conceptual and operational problems involved in this complex and topical field. Ilan Katz and John Pinkerton have brought together a team of experienced child care policy analysts and evaluators to present the current state of critical thinking alongside detailed international case studies. The chapters offer revealing glimpses into the nature of family support across the world as well as an overview of the challenges facing both practitioners and researchers.

Developmental Assets and Asset-Building Communities Richard M. Lerner, Peter L. Benson, 2012-12-06 *Developmental Assets and Asset-Building Communities*

examines the relationships of developmental assets to other approaches and bodies of work. It raises challenges about the asset building approach and offers recommendations for how this approach can be strengthened and broadened in impact and research. In doing so, this book extends the scholarly base for the understanding of the character and scope of the systemic relation between young people's healthy development and the nature of developmentally attentive communities. The chapters in this volume present evidence that asset building communities both promote and are promoted by positive youth development, a bi-directional systemic linkage that is consistent with developmental systems theory, further civil society by building relationship and intergenerational places within a community that are united in attending to the developmental

needs of children and adolescents
