Privileging Industry The Comparative Politics Of Trade And Industrial Policy:

Privileging Industry Fiona McGillivray, 2004-03-14 The goal of this study is to explain when governments use trade and industrial policy for political goals and to show why aiding an industry can be a politically efficient way for government to redistribute resources from one industrial sector to another

Privileging Industry Fiona McGillivray, 2018-06-26 Why do some industries win substantial protection from the whims of international trade while others do not Privileging Industry challenges standard approaches to this question in its examination of when governments use trade and industrial policy for political goals Fiona McGillivray shows why aiding an industry can be a politically efficient way for a government to redistribute resources from one industrial sector to another Taking a comparative perspective that stands in contrast with the usual focus on U S trade politics she explores for example how electoral rules party strength and industrial geography affect redistribution politics across countries How do political institutions and the geographical dispersion of industries interact to determine which industries governments privilege What tests can assess how governments distribute assistance across industries Research has focused on the industries that legislators want to protect but just as important is identifying those legislators able to deliver trade assistance Assisting an industry requires both a will and a means Whether an industry is a good vehicle through which to redistribute income depends on its geographic make up and the country s electoral system In turn the electoral system and party strength affect how legislators preferences contribute to policy McGillivray tests these arguments using a tariff based empirical test and nonstandard dependent variables such as the dispersion of stock prices within fourteen different capital markets and government influence in the targeting of plant closures within declining industries

In Pursuit of Prosperity Charles R Hankla, 2025-07-09 With so many states committed to economic transformation and so many experts ready to provide technical advice on how to achieve it why does progress so often remain elusive In Pursuit of Prosperity examines the process of economic upgrading moving to more valuable activities in production improving technology knowledge and skills and participating in global value chains and develops a new theory to explain the form and success of national policies designed to promote it Using a mixed methods approach Charles R Hankla draws upon archival research and interviews from France and India as well as quantitative models of sixteen countries across six decades He finds that when state and private actors are aligned in their institutional structures which can happen in both corporatist and pluralist systems industrial

policy tends to be more effective It is when the state or the private sector independently dominates industrial policy that poor outcomes are most likely As *In Pursuit of Prosperity* shows rather than being fixed characteristics of countries policymaking styles vary across time and across sectors of the economy reflecting the changing power dynamics and organizational resources of stakeholders The book sheds light on how industrial policy which is experiencing a comeback in the United States and beyond can best be harnessed for upgrading It offers a valuable contribution to our understanding of the complex relationship between state politics and economic performance in the modern globalized world **Comparative Public**

Why Adjudicate? Christina L. Davis, 2012-05-27 The World Trade Organization WTO oversees the negotiation and enforcement of formal rules governing international trade Why do countries choose to adjudicate their trade disputes in the WTO rather than settling their differences on their own In *Why Adjudicate* Christina Davis investigates the domestic politics behind the filing of WTO complaints and reveals why formal dispute settlement creates better outcomes for governments and their citizens Davis demonstrates that industry lobbying legislative demands and international politics influence which

countries and cases appear before the WTO Democratic checks and balances bias the trade policy process toward public lawsuits and away from informal settlements Trade officials use legal complaints to manage domestic politics and defend trade interests WTO dispute settlement enables states and domestic groups to signal resolve more effectively thereby enhancing the information available to policymakers and reducing the risk of a trade war Davis establishes her argument with data on trade disputes and landmark cases including the Boeing Airbus controversy over aircraft subsidies disagreement over Chinese intellectual property rights and Japan's repeated challenges of U S steel industry protection In her analysis of foreign trade barriers against U S exports Davis explains why the United States gains better outcomes for cases taken to formal dispute settlement than for those negotiated Case studies of Peru and Vietnam show that legal action can also benefit developing countries

Shaping Nations and Markets Vinícius Guilherme Rodrigues Vieira, 2023-09-15 Shaping Nations and Markets employs a mixed methods approach to contend that economic ideas organization of domestic interests and their economic power asymmetries of information and political institutions do not sufficiently explain the formation of national interests in

processes of trade liberalization The author proposes that something is missing identity capital which also empowers economic sectors that share either liberalizing or protectionist interests Identity capital is an economic sector's contribution to the stability of a national identity narrative it correlates with the degree to which the workforce of any sector represents the dominant conception of national identity Identity capital creates political power asymmetries among those sectors and impacts the formation of populist movements in both developed and developing states This book offers a theoretical framework to unpack national identity trade liberalization nationalist populism domestic politics and globalization The author argues that the key for identifying whether liberalizing or protectionist coalitions prevail in trade negotiations is identity capital He offers a comparison of the three largest contemporary federal multicultural democracies Brazil India and the United States from the Doha Development Round of the World Trade Organization WTO in 2001 to the rise of populism in these countries in recent years This book will be of great interest to graduate students and scholars of international relations international studies political science comparative politics and economic sociology

Welfare and Capitalism in Postwar Japan Margarita Estevez-Abe, 2008-07-21 This book explains how postwar Japan managed to achieve a highly egalitarian form of capitalism despite meager social spending Estevez Abe develops an institutional rational choice model to

solve this puzzle She shows how Japan's electoral system generated incentives that led political actors to protect various groups that lost out in market competition She explains how Japan's postwar welfare state relied upon various alternatives to orthodox social spending programs The initial postwar success of Japan's political economy has given way to periods of crisis and reform This book follows this story up to the present day Estevez Abe shows how the current electoral system renders obsolete the old form of social protection She argues that institutionally Japan now resembles Britain and predicts that Japan's welfare system will also come to resemble Britain's Japan thus faces a more market oriented society and less equality

Economic Geography, Electoral Institutions, and the Politics of Redistribution Stephanie J. Rickard, 2018-04-19 Explores how political institutions and economic geography interact to shape governments policy decisions particularly with respect to subsidies

The Political Economy of Anti-dumping Protection Patricia Wruuck, 2015-02-09 This book deals with anti dumping measures AD and investigates two questions First what country characteristics affect AD use and notably do domestic political institutions have an effect Second how is the decision to impose a new AD measure affected by anticipation of trading partners potential retaliation This book applies a strategic perspective to AD to address these questions presenting a game theoretic model together with an empirical test The approach sheds light on the dynamics of interaction between trading partners and allows to capture selection processes which underpin the trade restrictions that can actually be observed The book provides a fresh look on when and how trading powers apply antidumping measures how this is shaped by strategic interaction and whether institutions do make a difference to the outcome In a period in which the international trading system has to cope with numerous stresses such as an increased resort to administered protection largely by big emerging economies this is a timely and important contribution Dr Klaus G nter Deutsch Managing Director Research Economic and Industrial Policy German Federation of Industries This book successfully integrates two research traditions in international politics the traditional view that looks at domestic factors of anti dumping policies and the strategic view that conditions the imposition of anti dumping measures on the likely retaliatory behavior of the trading partner The result is an informative and constructive examination of anti dumping protection and trade wars in the WTO Prof Dr Thomas Br uninger Chair of Political Economy University of Mannheim Germany

The Political Economy of Anti Dumping Protection A Strategic Analysis is a major contribution to the important and growing field international political economy Starting with the traditional comparative institutional analysis which focuses on the implications of democratic and non democratic regimes for using anti dumping measures in trade politics the second part applies a strategic perspective on this type of sanctions uncovering the dynamic interactions between a challenging and challenged countries For all those interested in understanding the logic of sanctions the role of institutions and in how to examine the implications of theoretical models for international political economy this book is a must read Prof Dr Thomas K nig Chair of Political Science II University of Mannheim Germany
