Questions Of Tenure:

The Questions of Tenure Richard P. Chait, Richard Chait, 2002 Children from low income backgrounds often experience fourth year slump despite the fact that their cognitive abilities may be consistent with the norm This book examines the causes of this disparity and outlines an active role for the schools in remedying weaknesses in literacy development

African Land Questions, Agrarian Transitions and the State Sam Moyo, 2008-05-15 This empirically grounded study provides a critical reflection on the land question in Africa research on which tends to be tangential conceptually loose and generally inadequate It argues that the most pressing research concern must be to understand the precise nature of the African land question its land reforms and their effects on development To unravel the roots of land conflicts in Africa requires thorough understanding of the complex social and political contradictions which have ensued from colonial and post colonial land policies as well as from Africa's development and capital accumulation trajectories especially with regard to the land rights of the continent's poor The study thus questions the capacity of emerging neo liberal economic and political regimes in Africa to deliver land reforms which address growing inequality and poverty It equally questions the understanding of the nature of popular demands for land reforms by African states and their ability to address these demands under the current global political and economic structures dictated by neo liberalism and its narrow regime of ownership The study invites scholars and policy makers to creatively draw on the specific historical trajectories and contemporary expression of the land and agrarian questions in Africa to enrich both theory and practice on land in Africa

,Desiree Forsythe,2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM

examine their possible consequences If the bonds between employee and employer are weakening who stands to benefit Frequent job switching can be a sign of success for a worker if each job provides a stepping stone to something better but research in this book shows that workers gained less from changing jobs in the 1980s and 1990s than in earlier decades The authors also evaluate the third party intermediaries such as temporary help agencies which profit from the new flexibility in the matching of workers and employers Besides opening up new angles on the evidence the authors mark out common ground and pin point those areas where gaps in our knowledge remain and popular belief runs ahead of reliable evidence On the Job provides an authoritative basis for spotting the trends and interpreting the fall out as U S employers and employees rethink the terms of their relationship **NLS News** ,1996 **Vision and Resilience** Joseph M. Beilein Jr.,2024-05-23 Vision and Resilience recounts the remarkable turnaround of a satellite campus that became one of the brightest spots in the Penn State University system Penn State Erie The Behrend College Covering the period from 1980 to 2010 this story serves as a blueprint for administrators who aspire to grow their institutions in challenging times Joseph M Beilein Jr writes about how at a time when tensions were high between faculty and the administration students and the administration students and the police and even among the students themselves The Behrend College saw an unprecedented increase in enrollment endowments land acquisition building and curricular opportunities He describes how administrators John Lilley and Jack Burke worked with local leaders faculty and other officials to transform The Behrend College into a research institution and how they worked with faculty coaches and even students to convince young people that Behrend was in fact a destination campus All of these efforts resulted in a college that bucked trends in higher education demography and economics to become the leading college in northwestern Pennsylvania Fascinating and instructive Vision and Resilience tells an encouraging story of college success against the odds It will be of interest to university administrators faculty and anyone with a personal connection to the Penn State campus farthest from University Park *Research Bulletin* National Education Association of the United States.
